

## **ECSE and CariCRIS Partner on Regionally Acclaimed Credit Risk Programme**

The Eastern Caribbean Securities Exchange (ECSE) and the Caribbean Information and Credit Rating Services Limited (CariCRIS) partner to continue CariCRIS' regionally acclaimed 2-day professional development programme aimed at senior and mid-level professionals. This intensive credit risk training programme, which will be held at the **Jolly Beach Resort & Spa, Antigua** on **28 - 29 February 2012**, will introduce the specific processes and methodologies applied in credit risk assessment.

It is now well acknowledged that a breakdown in credit standards contributed in a large way to the global economic crisis we are experiencing. As the world and our region slowly work our way out of the crisis, managers need to ensure that they and their staff are equipped with the requisite training and skills to make wise, carefully-considered credit and investment decisions.

The CariCRIS' credit training programme is specifically designed to suit the needs of the regional financial sector and to equip its risk and credit professionals with an incisive approach to credit analysis, blending both analytical frameworks and relevant practical experience. This in-depth programme covers:

- Credit risk analysis from a credit ratings perspective
- Analysis of sovereigns, manufacturing/distribution/service type companies and banks & other financial institutions
- Analytical discussions supplemented with real-life case studies, which participants will discuss in groups and present for critical review by the faculty

Registration to the programme is open to senior and mid-level financial sector risk and credit professionals and other professionals of public and private companies, as well as public sector (statutory) corporations.
