And today's financial tip:

What is a stock split?

A stock split simply involves a company altering the number of its shares outstanding and proportionally adjusting the share price to compensate. This in NO WAY affects the intrinsic value or past performance of your investment, if you happen to own shares that are splitting. For example, if you own 100 shares of a company that trades at \$100 a share and it declares a two for one stock split, you will own a total of 200 shares at \$50 a share after the split.
