### **And today's financial tip:**

#### **What is a bid offer spread?**

This is the difference between the selling price and the purchase price for investments. When a broker is asked what price the shares of a company is trading at in the market, he will quote two prices: the bid price is the price at which you can sell your shares, and the offer price is the price at which you can buy them, and the difference between them is the spread.
