MANAGEMENT DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

For the 3rd quarter ended March 31, 2011

Introduction

The Management Discussion and Analysis gives an overview of the Company's financial condition and results of operations for the second quarter ended March 31, 2011. The report includes forward-looking statements about objectives, strategies and expected financial results. These statements are inherently subject to risks and uncertainties beyond the Bank's control including, but not limited to, economic and financial conditions globally, technological development, competition, and regulatory developments in St. Kitts and Nevis and elsewhere. These and other factors may cause the Bank's actual performance to differ materially from that contemplated by forward-looking statements. The reader is therefore cautioned not to place undue reliance on these statements.

Income Statement

Results of Operations

The Bank's net income before taxes declined by 65.4% for the quarter ended 31 March 2011 when compared with the previous year. The bank's results continue to be challenged by declining economic growth however, we anticipate an improvement in results as we carefully adhere to prudent investment and lending policies and encourage operating cost curtailment.

	Mar 2011	Mar 2010	
	\$ mil	\$ mil	% Change
Income from Loans & Advances	56.1	58.8	-4.6%
Income from Investments	13.8	12.8	7.8%
Income from Deposits with financial Inst.	5.9	8.3	-28.9%
Non-interest income	12.8	16.2	-21.0%
Total income	88.6	96.1	-7.8%
Interest Expenses	61.1	54.5	12.1%
Non-interest expenses	20.4	21.1	-3.3%
Total expenses	81.5	75.6	7.8%
Net Income before taxes	7.1	20.5	-65.4%

Net Interest Income

At March 31, 2011, net interest income fell by \$10.6 million or 41.9 % when compared with the results attained for the same period in 2010. The decrease in net interest income resulted mainly from an increase in interest expense by \$6.5m and a reduction in interest income by \$4.1m.

The year-over-year increase in interest costs was due to the growth in interest bearing deposit accounts. On the other hand, the decrease in interest income was due mainly to the reduction in interest rates on some loans.

Net Fees & Commission Income

Net fees and commission income declined by 54% for the quarter ended March 31, 2011 when compared with one year ago. The year-over-year decrease in fees and commission income was due mainly to a fall in income from electronic business transactions.

Other Income

At March 31, 2011, other income increased by \$2.4 million or 85.9% when compared with March 31, 2010. This was mainly the result of gains derived from investments and foreign currency transactions.

Analysis of Revenue	Mar 2011	Mar 2010	
Interest Income	\$ 000	\$ 000	% Change
Interest from loans and advances	56,120	58,848	-4.6%
Interest from investments	13,775	12,816	7.4%
Interest from deposits with Fin. Inst.	5,914	8,268	-28.5%
Total interest	75,809	79,932	-5.2%
Non-interest income			
Income from fees and commissions, net	5,270	11,448	-54.0%
Gains from foreign exchange	2,599	2,268	14.6%
Gains from investments, net	2,209	(238)	1,028.1%
Dividend income	412	558	-26.2%
Other income	91	268	-66.0%
Total non-interest income	10,581	14,304	-26.0%
Total Revenue	86,390	94,236	-8.3%

Operating Expenses

Operating expenses, which were \$19.2 million at March 31, 2010 decreased to \$18.2 million at March 31, 2011 representing a decrease of 4.9%. The decrease in operating expenses resulted mainly from decreased staff costs and repairs and maintenance expenses.

The company anticipates continued reductions in operating expenses over the next quarter through continued emphasis on cost containment, effective risk management and operational efficiencies. Cost savings will also be attained through continued improvements in the technology infrastructure.

The Company believes that net income will show an improvement over the next quarter and beyond, through continued focus on exploring new avenues to diversify and enhance our non-interest income base.

Balance Sheet

Assets

Total assets grew from \$2,272.6 million at June 30, 2010 to \$2,389.0 million at March 31, 2011, representing a 5.1% increase. Growth in total assets was due mainly to an increase in loans & advances and other receivables during the period. Loans and advances contributed to 55.9% of total assets at March 31, 2011 (June 2010: 56.1%), while deposits with other financial institutions contributed to 14.8% (June 2010: 14.6%). All other assets accounted for the remaining 29.3% (June 2010: 29.3%).

Deposits

At the end of March 2011, customer deposits increased by 7.2% over the amount recorded at the end of fiscal year 2010. The Bank recognizes and appreciates the importance of its core deposit base and as such, management continues to encourage deposits through continuous marketing of new and improved products and services.

Loans and Advances

At March 31, 2011 loans and advances to customers increased by \$64.4 million representing a 5.6% rise from \$1,145.8 million recorded at June 30, 2010. The increase in loans and advances to customers resulted mainly from increased borrowings by both the public and private sectors.

Shareholders' Equity

The company continues to realize its goal of providing a satisfactory return to shareholders and increasing the value of investments. Shareholders' Equity was \$485.7 million at March 31, 2011 compared with \$466.0 million at June 30, 2010. This represents a 4.2% increase, resulting from fair value gains on available-for-sale investments for the period.

Corporate Governance

The Board of Directors continues to search for innovative ways to improve corporate governance, risk management, ethical conduct, best practices and maintenance of international standards. In this regard the Board is focused on:

- Adoption and implementation of corporate governance guidelines and codes of ethics and business conduct.
- Continued emphasis on the Corporate Strategic Plan, which includes management's philosophy, economic outlook and conditions, performance targets and plans for implementation of strategies over the next 5 years.

Additionally, the Board will continue to take vital steps towards culturing a strong corporate governance environment, improving transparency and fostering high levels of integrity, thereby strengthening shareholder confidence in the Company.

Risk Management

The management of risks has emerged as one of the greatest challenges that banks now face. This challenge must be tackled by developing new approaches and by adjusting current processes.

The Bank has taken up this challenge and has placed increased emphasis on the management of risks through the systematic development of tools and strategies to mitigate these risks. Risks are continuously being evaluated in terms of the level of impact they can have on income and asset values.

While the bank places strong emphasis on the management of risks, it does so with the objective of balancing risk taking with expected returns to our shareholders.

Outlook

Over the next quarter, the Company will continue to focus on cost containment, risk management and operational efficiency. We will continue to build on our existing infrastructure and technology to enhance our products and services and focus on initiatives to augment our interest income and non-interest income base.

These measures should boost total revenue. At the end of the final quarter ending June 30, 2011, we anticipate an increase in shareholders equity, deposits and assets when compared to the end of the same period in 2010.

1. Incorporation

The St. Kitts-Nevis-Anguilla National Bank Limited (the Bank) was incorporated on the 15th day of February 1971 under the Companies Act chapter 335, and was re-registered under the new Companies Act No. 22 of 1996 on the 14th day of April 1999. The Bank operates in both St Kitts and Nevis and is subject to the provisions of the Banking Act of 1991.

The Bank is a limited liability company and is incorporated and domiciled in St. Kitts. The address of its registered office is as follows: Central Street, Basseterre, St. Kitts.

The principal activity of the Bank is the provision of financial services.

The Bank is listed on the Eastern Caribbean Securities Exchange.

2. Adoption and amendments of published standards and interpretations

2.1 Amendments and published standards adopted in current period

- IAS 19 (Amendment, 'Employee benefits' (effective for annual periods beginning on or after January 1, 2009). This amendment is part of the IASB's annual improvement project published in May 2008. The amendment clarifies that a plan amendment that results in a change in the extent to which benefit promises are affected by future salary increases is a curtailment; an amendment that changes benefit attributable to past service gives rise to a negative past service cost if it results in a reduction in the present value of the defined benefit obligation. The definition of return on plan assets has been amended to state that plan administration costs are deducted in the calculation of return on plan assets only to the extent that such costs have been excluded from measurement of the defined benefit obligation. The distinction between short-term and long-term employee benefits is based on whether benefits are due to be settled within or after 12 months of employee service being rendered. IAS 37, 'Provisions, contingent liabilities and contingent assets' requires contingent liabilities to be disclosed not recognised. IAS 19 has been amended to be consistent in this regard.
- IAS 1 (Revised), 'Presentation of financial statements' (effective for annual periods beginning on or after January 1, 2009). The revised standard will prohibit the presentation of items of income and expenses (that is, 'non-owner changes in equity') in the statement of changes in equity, requiring 'non-owner changes in equity' to be presented separately from owner changes in equity. All non-owner changes in equity will be required to be shown in a performance statement, but entities can choose whether to present one performance statement (the statement of comprehensive income) or two statements (the income statement and statement of comprehensive income). The Bank chose two statements. Where entities restate or reclassify comparative information, they will be required to present a restated balance sheet as at the beginning comparative period in addition to the current requirement to present balance sheets at the end of the current period and comparative period.

- 2. Adoption and amendments of published standards and interpretations......continued
 - 2.1 Amendments and published standards adopted in current period......continued
 - IAS 1 (Amendment), 'Presentation of financial statements' (effective for annual periods beginning on or after January 1, 2009). This amendment is part of the IASB's annual improvement project published in May 2008. The amendment clarifies that some rather than all financial assets and liabilities classified as held for trading in accordance with IAS 39, 'Financial instruments: Recognition and Measurement', are examples of current assets and liabilities, respectively. IAS 39 (Amendment) has had no impact on the Bank financial statements
 - IAS 36 (Amendment), 'Impairment of assets' (effective for annual periods beginning on or after January 1, 2009). Where fair value less costs to sell is calculated on the basis of discounted cash flows, disclosures equivalent to those for value-in-use calculation should be made.
 - *IAS 38 (Amendment)*, '*Intangible assets*' (effective for annual periods on or after January 1, 2009). Prepayments may only be recognised in the event that those payments have been made in advance of obtaining right of access to goods or receipt of services. The amendment deletes the wording that states that there is 'rarely if ever' support for use of a method that results in a lower rate of amortization than the straight line method. The amendment does not have an impact on the Bank operations as all intangible assets are amortised using the straight line method.
 - IAS 7 (Amendment), 'financial instruments: Disclosures' (effective from March 1, 2009). The amendment requires enhanced disclosure about fair value measurements and liquidity risk. Also, the amendment requires disclosure of fair value measurements by level in a fair value hierarchy. This amendment has no impact on the Bank.
 - *IFRS* 8, 'Operating segments', replaces IAS 14, 'Segment reporting' (effective for annual periods beginning on or after January 1, 2009). The new standard requires that segment reporting be based on the internal reporting to the Board of Directors (in its function as chief operating decision-maker), which makes decisions on the allocation of resources and assesses the performance of each reportable segment. Application of this standard will have no material effect on the Bank.
 - IAS 37, 'Provisions, contingent liabilities and contingent assets', requires contingent liabilities to be disclosed, not recognised. As a result, IAS 19 has been amended to be consistent.
 - IAS 27 (Amendment), 'Consolidated and separate financial statements' (effective for annual periods beginning on or after January 1, 2009). Where an investment in a subsidiary that is accounted for under IAS 39, 'Financial instruments: Recognition and measurement' is classified as held for sale under IFRS 5, 'Non-current assets held for sale and discontinued operations', IAS 39 continues to be applied. The amendment has no impact on the Bank.

- 2. Adoption and amendments of published standards and interpretations......continued
 - 2.2 Standards and amendments to existing standards not yet effective and have not been early adopted
 - IFRS 9, 'Financial instrument: Classification and measurement' (effective for annual periods beginning on or after January 1, 2013). This standard replaces those parts in IAS 39 relating to the classification and measurement of financial assets. The principal features to the standard are as follows:
 - 1. Financial assets are required to be classified into two (2) measurement categories: those to be subsequently measured at amortised cost and those to be subsequently measured at fair value. The measurement decision is to be made at initial recognition. The classification depends on the entity's business model for managing its financial assets and the contractual cash flow characteristics of the financial assets.
 - 2. A financial asset is subsequently measured at amortised cost only if it is a debt instrument and both the objective of the entity's business model is to hold the financial asset to collect the contractual cash flows, and the financial asset's contractual cash flows represent only payments of principal and interest.
 - 3. All equity instruments are to be measured subsequent at fair value. Equity instruments that are held for trading will be measured at fair value through profit or loss. For all other equity instruments, an irrevocable election can be made at initial recognition, to recognize realized and unrealized gains or losses through other comprehensive income rather than profit or loss. This election may be made on an instrument-by-instrument basis.

3. Summary of significant accounting policies

3.1 Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS).

3.2 Basis of preparation

The financial statements have been prepared under the historical cost convention except for the revaluation of certain non-current assets and financial instruments. The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

3. Summary of significant accounting policies......continued

3.3 Foreign currency transaction

Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the Bank operates.

The financial statements are presented in Eastern Caribbean Dollars, which is the Bank functional and presentation currency.

Foreign currency transactions are accounted for at the mid-rate of exchange prevailing at the date of the transaction. Financial assets and financial liabilities denominated in foreign currencies at the balance sheet date are converted to Eastern Caribbean Currency at the mid-rate of exchange ruling on that day. Gains and losses resulting from such transactions and from the translation of financial assets and/or financial liabilities denominated in foreign currencies are recognized in the statement of income.

3.4 Financial assets

The Bank classifies its financial assets in the following categories: financial assets at fair value through profit or loss; loans and receivables; held-to-maturity; and available-for-sale financial assets. Management determines the classification of its investments at initial recognition.

(a) Financial assets at fair value through profit or loss

Certain investments, such as equity investments, principal protected investments and others, that are managed and evaluated on a fair value basis in accordance with a documented investment strategy and reported to management on that basis are designated at fair value through profit or loss.

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than: (1) those that the Bank intends to sell immediately or in the short term, which are classified as held for trading, and those that the Bank upon initial recognition designates as at fair value through profit or loss; (2) those that the Bank upon initial recognition designates as available for sale; or (3) those for which the holder may not receive substantially all of its initial investment, other than because of credit deterioration.

Loans and receivables are recognized when cash or the right to cash is advanced to a borrower.

(c) *Held-to-maturity financial assets*

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Bank management has the positive intention and ability to hold to maturity. If the Bank were to sell other than an insignificant amount of held-to-maturity assets, the entire category would be reclassified as available for sale.

3. Summary of significant accounting policies......continued

3.4 Financial assetscontinued

(d) Available-for-sale financial assets

Available-for-sale investments are those intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices.

Purchases and sales of financial assets at fair value through profit or loss, held to maturity and available for sale are recognized on trade-date – the date on which the Bank commits to purchase or sell the asset.

Financial assets are initially recognized at fair value plus transaction cost for all financial assets not carried at fair value through profit or loss. Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or where the Bank has transferred substantially all risks and rewards of ownership. Financial liabilities are derecognized when they are extinguished – that is, when the obligation is discharged, cancelled or expired.

Available-for-sale financial assets and financial assets at fair value through profit or loss are substantially carried at fair value. Loans and receivables and held-to-maturity investments are carried at amortised cost using the effective interest method. Gains and losses arising from changes in the fair value of the 'financial assets at fair value through profit or loss' category are included in the income statement in the period in which they arise. Gains and losses arising from changes in the fair value of available-for-sale financial assets are recognized directly in equity, until the financial assets is derecognized or impaired, at which time, the cumulative gain or loss previously recognized in equity is then recognized in profit or loss. However, interest calculated using the effective interest method and foreign currency gains and losses on monetary assets classified as available for sale are recognized in the income statement. Dividends on available-for-sale equity instruments are recognized in the income statement when the right to receive payment is established.

The fair values of quoted investments in active markets are based on the current bid prices. If the market for a financial asset is not active (such as investments in unlisted entities) and the fair value cannot be reliably measured, these assets are measured at cost.

3.5 Interest income and expense

Interest income and expense for all interest-bearing financial instruments are recognized within 'interest income' and 'interest expense' in the statement of income using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability.

3. Summary of significant accounting policies......continued

3.5 Interest income and expense.....continued

When calculating the effective interest rate, estimates of cash flows that consider all contractual terms of the financial instrument are included (for example, repayment options), except for future credit losses. The calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts. Once a financial asset or group of similar financial assets has been written down as a result of an impairment loss, interest income is recognized using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

3.6 Fee and commission income

Fees and commissions are generally recognized on an accrual basis when the service has been provided. Loan commitment fees for loans that are likely to be drawn down are deferred (together with related direct costs) and recognized as an adjustment to the effective interest rate on the loan. Loan syndication fees are recognized as revenue when the syndication has been completed and the Bank has retained no part of the loan package for itself or has retained a part at the same effective interest rate as the other participants. Commission and fees arising from negotiating, or participating in the negotiation of, a transaction for a third party – such as the arrangement of the acquisition of shares or other securities or the purchase or sale of business – are recognized on completion of the underlying transaction.

3.7 Dividend income

Dividends are recognized in the statement of income when the right to receive payment is established.

3.8 Impairment of financial assets

(a) Assets carried at amortised cost

The Bank assesses at each balance sheet date whether there is objective evidence that a financial asset or group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that the loss event (or events) has an impact on the estimated future cash flows of the financial assets or group of financial assets that can be reliably estimated.

The criteria that the Bank uses to determine that there is objective evidence of an impairment loss include:

- Cash flow difficulties experienced by the borrower;
- Delinquency in contractual payments of principal and interest;
- Breach of loan covenants or conditions;
- Deterioration in the value of collateral;
- Deterioration of the borrower's competitive position; and
- Initiation of bankruptcy proceedings.

- 3. Summary of significant accounting policies......continued
 - 3.8 Impairment of financial assets......continued
 - (a) Assets carried at amortised cost.....continued

The Bank first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If the Bank determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss on loans and receivable and or held-to-maturity investments carried at amortised cost has occurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in the statement of income. If a loan or held-to-maturity investment has a variable interest rate, the discounted rate for measuring any impairment loss is the current effective interest rate determined under the contract. As a practical expedient, the Bank may measure impairment on the basis of an instrument's fair value using an observable market price.

The calculation of the present value of the estimated future cash flows of a collateralized financial asset reflects the cash flows that may or may not result from foreclosure less cost for obtaining and selling the collateral, whether or not foreclosure is probable.

When a loan is uncollectible, it is written off against the related provision for loan impairment. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off are credited to the Bad Debt Recovered income account which is then used to decrease the amount of the provision for the loan impairment in the statement of income.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment loss is recognized (such as an improvement in the debtor's credit rating), the previously recognized impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognized in the statement of income.

3. Summary of significant accounting policies......continued

3.8 Impairment of financial assets......continued

(b) Assets classified as available for sale

The Bank assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity investments classified as available for sale, a significant or prolonged decline in the fair value of the security below its cost is considered in determining whether the assets are impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss – is removed from equity and recognized in the statement of income. Impairment losses recognized in the statement of income on equity instrument are not reversed through the statement of income. If, in a subsequent period, the fair value of a debt instrument classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss, the impairment loss is reversed through the statement of income.

(c) Renegotiated Loans

Loans and advances that are either subject to collective impairment assessment or individually significant and whose terms have been renegotiated are no longer considered to be past due but are treated as new loans. In subsequent years, the asset is considered to be past due and disclosed only if renegotiated.

3.9 Property, plant and equipment

Land and buildings held for use in the production and supply of services, or for administrative purposes, are stated in the balance sheet at their revalued amounts, being the fair value at the date of revaluation, less any subsequent depreciation and subsequent accumulated impairment losses. Revaluations are performed with sufficient regularity such that the carrying amounts do not differ materially from those that would be determined using values at the balance sheet date.

Any revaluation increase arising on the revaluation of such land and buildings is credited in equity to the revaluation reserve, except to the extent that it reverses a revaluation decrease for the same asset previously recognized in income, in which case the increase is credited to income to the extent of the decrease previously charged. A decrease in the carrying amount arising on the revaluation of such land and buildings is charged to income to the extent that it exceeds the balance, if any, held in the fixed asset revaluation reserve relating to a previous revaluation of that asset.

Depreciation on revalued buildings is charged to income. On the subsequent sale or retirement of a revalued property, any revaluation surplus remaining in revaluation reserve is transferred directly to retained earnings. No transfer is made from the revaluation reserve to retained earnings except when an asset is derecognised.

3 Summary of significant accounting policies......continued

3.9 Property, plant and equipment......continued

Freehold land is not depreciated. Fixtures and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is charged so as to write off the cost or valuation of assets, other than freehold land, over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at each-year, with the effect of any changes in estimate accounted for on a prospective basis.

All repairs and maintenance are charged to income during the financial period in which they are incurred.

The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in income.

3.10 Intangible assets – computer software

Acquired computer software licences are capitalized on the basis of the costs incurred to acquire and to bring into use the specific software. These costs are amortised on the basis of the expected useful lives of such software which is three to five years.

3.11 Impairment of non-financial assets

Assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment. Assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separate identifiable cash flows (cash-generating units).

3.12 Leases

The leases entered into by the Bank are primarily operating leases. The total payments made under the operating leases are charged to the statement of income on a straight-line basis over the period of the lease.

When an operating lease is terminated before the lease period has expired, any payment required to be made to the lessor by way of penalty is recognized as an expense in the period in which termination takes place.

3. Summary of significant accounting policies......continued

3.13 Cash and cash equivalents

For the purpose of the statement of cash flows, cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition, including cash and non-restricted balances with the Central Bank, treasury bills and other eligible bills, loans and advances to banks, amounts due from other banks and other financial institutions and short-term government securities.

3.14 Employee benefits

(a) Pension plan

The Bank operates a defined contribution plan for its employees. The Bank pays for annual insurance premiums to fund a post-employment benefit plan. Payment of premiums is used to purchase an insurance policy in the name of a specified plan participant or a group of plan participants that is separate and distinct from the Bank. The payment of fixed premiums under such contracts is, in substance, the settlement of the employee benefit obligation, rather than an investment to meet the obligation. Payments of premiums are charged to income.

(b) Gratuity

The Bank provides a gratuity plan to its employees after 15 years of employment. The amount of the gratuity payment to eligible employees at retirement is computed with reference to final salary and calibrated percentage rates based on the number of years of service.

3.15 Current and deferred income tax

Income tax payable on profits, based on applicable tax law, is recognized as an expense in the period in which profits arise, except to the extent that it relates to items recognized directly in equity. In such cases, the tax is recognized in a deferred tax liability account. The tax expense for the period comprises current and deferred tax.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or deferred tax liability is settled.

The principal temporary differences arise from depreciation of plant and equipment and revaluation of certain financial assets. However, deferred tax is not accounted for if it arises from initial recognition of an asset or a liability in a transaction other than a business combination that at the time of the transaction affects neither accounting, nor taxable profit or loss. The rates enacted or substantively enacted at the balance sheet date are used to determine deferred income tax.

Deferred tax asset is recognized where it is probable that future taxable profit will be available against which the temporary differences can be utilized.

3. Summary of significant accounting policies......continued

3.15 Current and deferred income tax.....continued

Deferred tax related to fair value re-measurement of available-for-sale investments, which is charged or credited directly to equity net of tax, is also credited or charged directly to deferred tax liability and subsequently recognized in the statement of income together with the deferred gain or loss.

3.16 Borrowings

Borrowings are recognized initially at fair value net of transaction costs incurred. Borrowings are subsequently stated at amortised cost with differences between proceeds net of transaction costs and the redemption value being recognized in the statement of income over the period of the borrowing using the effective interest method.

3.17 Guarantees and letters of credit

Guarantees and letters of credit comprise undertaking by the Bank to pay bills of exchange drawn on customers. The Bank expects most guarantees and letters of credit to be settled simultaneously with the reimbursement from the customers.

3.18 Share capital

(a) Share issue costs

Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction from the proceeds.

(b) Dividends on ordinary shares

Dividends on ordinary shares are recognized in equity in the period in which they are declared by the Board of Directors and/or approved by the Bank's shareholders.

Dividends for the year are dealt with in 'Note 28'.

3.19 Comparatives

Where it has been necessary, comparative figures have been adjusted to conform to changes in presentation in the current year.

4. Financial risk management

The Bank activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the commercial banking business, and the operational risks are an inevitable consequence of being in business. The Bank aim is therefore to achieve an appropriate balance between risk and return and minimize potential adverse effects on the Bank financial performance.

4. Financial risk management......continued

The Bank risk management policies are designed to identify and analyse risks, to set appropriated levels and controls, and to monitor the risks and adherence to limits by means of reliable and upto-date information systems. The Bank regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice.

Risk management is carried out by the Credit Division and Comptroller Division under policies approved by the Board of Directors. Management identifies and evaluates financial risks in close cooperation with the Bank operating units. The Board provides principles for overall risk management, as well as approved policies covering specific areas, such as foreign exchange, interest rate and credit risks. In addition, internal audit is responsible for the independent review of risk management and the control environment.

The most important types of risks are credit risk, liquidity risk, market risk and other operational risk. Market risk includes currency risk, interest rate risk and other price risk.

4.1 Credit risk

The Bank takes on exposure to credit risk, which is the risk that counterparty will cause a financial loss for the Bank by failing to discharge an obligation. Significant changes in the economy, or in the health of a particular industry segment that represents a concentration in the Bank portfolio, could result in losses that are different from those provided for at the balance sheet date. Management therefore carefully manages its exposure to credit risk. Credit exposures arises principally in lending activities that lead to loans and advances, and investment activities that bring debt security and other bills into the Bank asset portfolio. There is also credit risk in off-balance sheet financial instruments, such as loan commitments. The credit risk management and control are centralized and reported to the Board of Directors.

The Bank exposure to credit risk is managed through regular analysis of the ability of its borrowers and potential borrowers to meet interest and capital repayment obligations. Credit risk is managed also in part by the taking of collateral and corporate and personal guarantees as securities on advances.

4.1.1 Credit risk measurement

(a) Loans and advances

The prudential guidelines of the Bank regulators are included in the daily credit operational management of the Bank. The operational measurements can be contrasted with impairment allowances required under IAS 39, which are based on loans that have been incurred at the balance sheet date (the 'incurred loss model').

4. Financial risk management......continued

4.1.1 Credit risk measurement..... *continued*

The Bank assesses the probability of default of individual borrowers using internal rating tools tailored to the various categories of borrowers. These rating tools are fashioned from the guidelines of the Bank regulators. Advances made by the Bank are segmented into five rating classes that reflect the range of default probabilities for each rating class. The rating tools are kept under review and upgraded as necessary.

Bank rating	Description of the classification
1	Pass
2	Special mention
3	Sub-standard
4	Doubtful
5	Loss

(b) Debt securities and other bills

For debt securities and other bills, external rating such as Standard & Poor's rating or their equivalents are used by the Bank Treasury/Fund Managers for managing of the credit risk exposures. The investments in those securities and bills are viewed as a way to gain a better credit quality mapping and maintain a readily available source to meet the funding requirement at the same time.

4.1.2 Risk limit control and mitigation policies

The Bank manages, limits and controls concentrations of credit risk wherever they are identified – in particular, to individual counterparties and groups, and to industries and countries.

The Bank structures the levels of credit risks it undertakes by placing limits on the amount of risk acceptable in relation to one borrower, or groups of borrowers, and to geographical and industry segments. Such risks are monitored on a revolving basis and are subject to an annual or more frequent review, when considered necessary by the Board of Directors.

The exposure to any one borrower, including banks and other financial institutions, is further restricted by sub-limits covering on-balance sheet and off-balance sheet exposures. Actual exposures against limits are monitored.

Exposure to credit risk is also managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing these lending limits where appropriate. Other specific controls and mitigation measures are outlined below:

4. Financial risk management......continued

4.1.2 Risk limit control and mitigation policies......continued

(a) Collateral

The Bank employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security for funds advances, which is common practice. The Bank implements guidelines on the acceptability of specific classes of collateral or risk mitigation. The principal collateral types for loans and advances are:

- Mortgages over residential properties;
- Charges over business assets such as premises, inventory and accounts receivable;
- Charges over financial instruments such as debt securities and equities.

Longer-term finance and lending to corporate entities and individual credit facilities are generally secured. In addition, in order to minimize the credit loss, the Bank will seek additional collateral from the counterparty as soon as impairment indicators are noticed for the relevant individual loans and advances.

Collateral held as security for financial assets other than loans and advances is determined by the nature of the instrument. Debt securities, treasury and other eligible bills are generally unsecured.

(b) Credit-related commitments

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit carry the same credit risk as loans. Documentary and commercial letters of credit – which are written undertakings by the Bank on behalf of a customer authorizing a third party to draw drafts on the Bank up to a stipulated amount under specific terms and conditions – are collateralized by the underlying shipments of goods to which they relate and therefore carry less risk than a direct loan.

Commitments to extend credit represent unused portions of authorizations to extend credit in the form of loans and advances, guarantees or letters of credit. With respect to credit risk, the Bank is potentially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments, as most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Bank monitors the term of maturity of credit commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

4.1.3 Impairment and provisioning

The impairment provision shown in the balance sheet at year-end is derived from each of the five internal rating grades. The table below shows the percentage of the Bank on-balance sheet and off-balance sheet items relating to loans and advances and associated impairment provision for each of the Bank internal categories:

Bank rating

Dank rating	Ma 201		June 2010		
	Loans and advances (%)	Impairment provision (%)	Loans and advances (%)	Impairment provision (%)	
1 Pass	81.53	-	83.70	-	
2 Special mention	13.95	0.02	11.53	0.02	
3 Sub-standard	3.28	30.25	3.49	30.25	
4 Doubtful	1.20	68.66	1.27	68.66	
5 Loss	0.04	1.07	0.01	1.07	
	100.00	100.00	100.00	100.00	

The rating tool assists management to determine whether objective evidence of impairment exists under IAS 39, based on the following criteria:

Loans

- Cash flow difficulties experienced by the borrower;
- Delinquency in contractual payments of principal and interest;
- Breach of loan covenants or conditions; and
- Deterioration in the value of collateral.

Advances (overdrafts)

- Approval limit has been exceeded for three months;
- Interest charges for three months or more have not been covered by deposits; and
- Account has developed a hardcore which was not converted.

The Bank requires the review of individual financial assets that are above materiality thresholds on an annual basis or more regularly when individual circumstances require. Impairment allowances on individually assessed accounts are determined by an evaluation of the incurred loss at balance sheet date on a case-by-case basis, and are applied where necessary. Assessments take into account collateral held and anticipated cash receipts for individually assessed accounts.

4. Financial risk management......continued

4.1.4 Maximum exposure to credit risk before collateral held or other credit enhancements

	Maxir	num exposure
Credit risk exposures relating to on-balance sheet assets are as follows:	Mar <u>2011</u> \$	June <u>2010</u> \$
Treasury bills	90,715,601	90,715,601
Deposits with other financial institutions	354,139,775	331,347,078
Loans and advances:		
 Overdrafts 	195,447,423	168,488,332
 Corporate customers 	175,454,503	135,079,860
 Term loans 	726,937,950	735,337,536
 Mortgages (personal) 	112,278,067	106,849,444
 Originated debts 	125,702,550	130,074,490
 Available-for-sale investments 	73,271,182	120,467,552
 Other assets 	62,299,584	31,025,378
• Loan commitments and financial guarantees	41,115,319	53,693,153
Total	1,957,361,954	1,903,078,424

The above table represents a worse case scenario of credit risk exposure to the Bank at March 31, 2011 and June 30, 2010, without taking account of any collateral held or other credit enhancements attached. For on-balance sheet assets, the exposures set out above are based on net carrying amounts as reported in the balance sheet.

As shown above, 62% (June 2010-60%) of the total maximum exposure is derived from loans and advances to banks and customers; 10% (June 2010-13%) represents investments in debt securities.

Management is confident in its ability to continue to control and sustain minimal exposure of credit risk to the bank resulting from both its loans and advances portfolio and debt securities based on the following:

• 95% (June 2010 – 95%) of the loans and advances portfolio is categorized in the top two grades of the internal rating system;

4. Financial risk management.....continued

4.1.4 Maximum exposure to credit risk before collateral held or other credit enhancements......continued

- Term loans, which represent the largest group in the portfolio, are backed by security cash and real estate collateral and/or guarantees.
- 84% (June 2010 88%) of the loans and advances portfolio are considered to be neither past due nor impaired.
- The Bank continues to grant loans and advances in accordance with its lending policies and guidelines;
- 16% of the investments in debt securities and other bills have at least an A- credit rating. Many issuers in the region are not graded; consequently 81% of these investments are not rated.

4.1.5 Loans and advances

	Mar <u>2011</u> \$	June <u>2010</u> \$
Loans and advances are summarized as follows:	Ψ	Ψ
Loans and advances to customers		
Neither past due nor impaired	1,004,652,335	988,784,854
Past due but not impaired	130,108,000	81,710,843
Impaired	54,304,681	54,366,608
	1,189,065,016	1,124,862,305
Interest receivable (see Note 9)	60,127,510	59,967,449
Less allowance for impairment losses (Note 9)	(39,074,583)	(39,074,583)
Net	1,210,117,943	1,145,755,171

The total allowance for impairment losses on loans and advances is \$39,074,583 (June 2010-\$39,074,583). Further information of the allowance for impairment losses on loans and advances to customers is provided in Notes 25.

4.1.5 Loans and advances......continued

(d) Loans and advances renegotiated

Restructuring activities include extended payment arrangements, approved external management plans, modification and deferral of payments. Following restructuring, a previously overdue customer account is reset to a normal status and managed together with other similar accounts. Restructuring policies and practices are based on indicators or criteria which, in the judgment of management, indicate that payment will most likely continue. These policies are kept under continuous review. Restructuring is most commonly applied to term loans, in particular customer finance loans.

4.1.6 Debt securities, treasury bills and other eligible bills

The table below presents an analysis of debt securities, treasury bills and other eligible bills by rating agency designation at March 31, 2011, based on Standard & Poor's ratings or equivalent:

	Treasury Bills \$	Investment Securities \$	Loans and receivables - notes & bonds	Total \$

4.1.7 Geographical concentrations of assets, liabilities, income, capital expenditure and off balance sheet items

The Bank operates only one business segment (commercial and retail banking services) which is predominantly localized to St. Kitts and Nevis. Commercial banking activities, however, accounts for a significant portion of credit risk exposure. The credit risk exposure is, therefore, spread geographically and over a diversity of personal and commercial customers:

	St. Kitts & <u>Nevis</u> \$	United States & <u>Canada</u> \$	Europe \$	ther Caribbean <u>States</u> \$	Total \$

4. Financial risk management.....continued

4.2 Market risk

The Bank is exposed to market risk, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks arise from open positions in interest rate and equity products, all of which are exposed to general and specific market movements and changes in the level of volatility of the market rates or prices such as interest rates, credit spreads, foreign exchange rates and equity prices. The Bank exposures to market risks arise from its non-trading part of the investment portfolio.

Non-trading portfolios primarily arise from the interest rate management of the Bank retail and commercial banking assets and liabilities. Non-trading portfolios also consist of equity risks arising from the Bank available-for-sale investments.

4.2.1 Price risk

The Bank is exposed to equities price risk because of investments held by the Bank and classified on the balance sheet as available-for-sale. To manage this price risk arising from investments in equity securities, the Bank diversifies its investment portfolio.

4.2.2 Foreign exchange risk

The Bank is exposed to foreign exchange risk through fluctuation in certain prevailing foreign exchange rates on its financial position and cash flows. The Board of Directors limits the level of exposure by currency and in total which are monitored daily. The Bank exposure to currency risk is minimal since most of its assets and liabilities in foreign currencies are held in United States dollars. The Bank uses the mid-rate of exchange ruling on that day to convert all assets and liabilities in foreign currencies to Eastern Caribbean dollar (EC\$). The Bank has set the mid-rate of exchange rate of the Eastern Caribbean dollar (EC\$) to the United States dollar (US\$) at EC\$2.7026=US\$1.00 since 1976. The following table summarises the Bank exposure to foreign currency exchange rate risk at March 31, 2011. Included in the table are the Bank financial instruments at carrying amounts, categorized by currency.

4.2.3 Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Bank takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on both its fair value and cash flow risks. Interest margins may increase as a result of such changes but may reduce losses in the event that unexpected movements arise. The Board of Directors limits the level of mismatch of interest rates repricing that may be undertaken.

The table below summarises the Bank exposure to interest rate risks. It includes the Bank financial instruments at carrying amounts, categorised by the earlier of contractual repricing or maturity dates:

Interest Sensitivty of Assets and Liabilities

4. Financial risk management......continued

4.2.3 Interest rate risk..... *continued*

The Bank fair value arises from debt securities classified as available-for-sale. Cash flow interest rate risk arises from loans and advances to customers at available rates.

4.3 Liquidity risk

Liquidity risk is the risk that the Bank is unable to meet its payment obligations associated with financial liabilities when they fall due and to replace funds when they are withdrawn. The consequences may be failure to meet obligations to repay depositors and fulfill commitments to lend.

4.3.1 Liquidity risk management

The Bank liquidity is managed and monitored by the Comptroller Division with guidance, where necessary, by an executive director of the Board. This includes:

- Daily monitoring of the Bank liquidity position to ensure that requirements can be met. These
 include the replenishment of funds as they mature and/or are borrowed by customers. The
 Bank ensures that sufficient funds are held to meet its obligation by not converting into foreign
 deposits, demand deposits, reserve, provision for interest, provision for loan losses, and other
 net financial assets and liabilities.
- Maintaining a portfolio of marketable assets that can easily be liquidated as protection against unforeseen liquidity problems. Additionally, the investment portfolio is diversified by geography, product, currency and term.
- Daily monitoring of the balance sheet liquidity ratios against internal and regulatory requirements.
- Managing the concentration and profile of debt maturities.
- Formalised arrangements with non-regional financial institutions to fund any liquidity needs that may arise.

4.3.2 Funding Approach

Sources of liquidity are regularly reviewed to maintain a wide diversification of geography, currency, provider, product and term.

4. Financial risk management.....continued

4.3.3 Non-derivative cash flows

The table below analyses assets and liabilities of the Bank into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date.

4.3.4 Off-balance sheet items

(a) Loan commitments

The dates of the contractual amounts of the Bank off-balance sheet financial instruments that commit it to extend credit to customers and other facilities (Note 32), are summarized in the table below.

	Up to 1 year \$	<u>1 – 3 years</u> \$	Over 3 years \$	Total \$
As at March 31, 2011 Loan commitments	31,135,308	863,092	4,530,819	36,529,219
Guarantees and standby letters of credit	489,535	-	4,096,565	4,586,100
Total	31,624,843	863,092	8,627,384	41,115,319
As at June 30, 2010				
Loan commitments	39,217,448	3,052,861	6,376,744	48,647,053
Guarantees and standby letters of credit	949,535	-	4,096,565	5,046,100
Total	40,166,983	3,052,861	10,473,309	53,693,153

4.4 Fair values of financial assets and financial liabilities

Fair value amounts represent estimates of the consideration that would be agreed upon between knowledgeable willing parties who are under no compulsion to act and is best evidenced by a quoted market value, if one exists. The following methods and assumptions were used to estimate the fair of financial instruments.

The fair values of cash resources, other assets and liabilities, items in transit are assumed to approximate their carrying values due to their short term nature. The fair values of off balance sheet commitments are also assumed to approximate the amount disclosed in Note 32.

(a) Treasury bills

Treasury bills are assumed to approximate their carrying value due to their short term nature

4. Financial risk management......continued

4.4 Fair values of financial assets and liabilities..........continued

(b) Deposits with other financial institutions

Deposits with other financial institutions include cash on operating accounts and interest and non-interest bearing fixed deposits both with a maturity period under 90 days and over 90 days. These deposits are estimated to approximate their carrying values because they are another form of cash resources.

(c) Loans and advances to customers

Loans and advances are net of provisions for impairment. The estimated fair values of loans and advances represent the discounted amount of estimated future cash flow expected to be received. Expected cash flows are discounted at current market rate to determine fair value.

(d) Originated debt

Originated debt securities include only interest bearing assets; assets classified as available for sale are measured at fair value. Where market prices or broker/dealer price quotations are not available, fair value is estimated using quote market prices for securities with similar credit maturity and yield characteristics.

(e) Due to customer

The estimated fair value of deposits with no stated maturity, with includes non-interest bearing deposits, is the amount repayable on demand. Deposits payable on a fixed date are at rates, which reflect market conditions, are assumed to have fair values which approximate carrying values.

(f) Due to financial institutions

The estimated fair value of 'due to financial institutions' is the amount payable on demand which is the amount recorded.

(g) Other borrowed funds

Other borrowed funds are all interest bearing financial liabilities with amounts payable on demand and at a fixed maturity date. Fair value on this category is estimated to approximate carrying value.

4. Financial risk management......continued

4.4 Fair values of financial assets and liabilities......continued

The table below summarises the carrying amounts and fair values of the financial assets and financial liabilities

4.5 Capital management

The Bank objectives when managing capital, which is a broader concept than the "equity" on the face of the balance sheet, are:

- To comply with the capital requirement set by the Eastern Caribbean Central Bank.
- To safeguard the Bank ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- To maintain a strong capital base to support the development of its business.

Capital adequacy and the use of regulatory capital are monitored daily by the Bank management, employing techniques based on the guidelines developed by the Eastern Caribbean Central Bank ('the Authority') for supervisory purposes. The required information is filed with the Authority on a quarterly basis.

4. Financial risk management......continued

4.5 Capital management.....*continued*

The Authority requires each bank or banking group to: (a) hold the minimum level of the regulatory capital of \$5,000,000 and (b) maintain a ratio of total regulatory capital to the risk-weighted asset (the 'Basel ratio') at or above the international agreed minimum of 8%.

The Bank regulatory capital as managed by management is divided into two tiers:

- Tier 1 capital: share capital, retained earnings and reserves created by appropriation of retained earnings.
- Tier 2 capital: qualifying subordinated loan capital, collective impairment allowance and unrealized gains arising on the fair valuation of equity instruments held as available for sale.

The risk-weighted assets are measured by means of a hierarchy of five risk weights classified according to the nature of – and reflecting an estimate of credit, market and other risks associated with – each asset and counterparty, taking into account any eligible collateral or guarantees. A similar treatment is adopted for off-balance sheet exposure, with same adjustments to reflect the more contingent nature of the potential losses.

The table below summarises the composition of regulatory capital and the ratios of the Bank for the period ended March 31, 2011 and June 30, 2010. During these two periods, the Bank complied with all the externally imposed capital requirements to which it is subject.

	Mar 2011	June 2010
Tier 1 capital	<u> </u>	\$
Share Capital	135,000,000	135,000,000
Bonus shares from capitalization of unrealized asset		
revaluation reserve	(4,500,000)	(4,500,000)
Reserves	253,273,014	246,171,044
Retained earnings	20,096,532	26,981,532
Total qualifying Tier 1 capital	403,869,546	403,652,576
Tier 2 capital		
Revaluation reserve – available-for-sale investments	69,611,515	50,153,673

Total qualifying Tier 2 capital	120,906,719	101,448,877
Investment in subsidiaries	(26,750,000)	(26,750,000)
Total regulatory capital	498,026,265	478,351,453

4. Financial risk management......continued

4.5 Capital management......continued

	Mar <u>2011</u> \$	June <u>2010</u> \$
Risk-weighted capital		
On-balance sheet	889,388,758	770,768,399
Off-balance sheet	32,297,016	12,483,399
Total risk-weighted assets	921,685,774	783,251,798
Basel ratio	54%	61%

5. Critical accounting estimates and judgments

The Bank makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

(a) Impairment losses on loans and advances

The Bank reviews its loan portfolio of assets impairment at least on a quarterly basis. In determining whether an impairment loss should be recorded in the statement of income, the Bank makes judgment as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with an individual loan in that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a group, or local economic conditions that correlate with defaults on assets in the group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling its future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences in estimates and actual loss experienced.

(b) Impairment of available-for-sale equity investments

The Bank determines that available for sale equity investments are impaired when there has been a significant or prolonged decline in fair value below its cost. This determination of what is significant or prolonged requires judgment. In making this judgment, the Bank evaluates among other factors, when there is evidence of deterioration in the financial health of the investee industry and sector performance, changes in technology and operational and financing cash flows. There were no declines in fair value below cost considered significant or prolonged as at March 2011.

6.	Cash and balances with Central Bank	Mar <u>2011</u> \$	June <u>2010</u> \$
	Cash in hand	11,295,648	8,586,933
	Balances with Central Bank other than mandatory deposits	32,568,901	7,916,647
	Included in cash and cash equivalent		
	(Note 31)	43,864,549	16,503,580
	Mandatory deposits with Central Bank	90,355,084	85,956,375
	Total	134,219,633	102,459,955
		========	========

Commercial banks are required under Section 17 of the Banking Act, 1991 to maintain a reserve deposit with the Central Bank equivalent to 6 percent of their total deposit of customers. This reserve deposit is not available to finance the Bank's day-to-day operations. Cash and balances with Central Bank do not receive interest payments.

7. Treasury bills

		=======
maturing May 17, 2011 at 6.5% interest	90,715,601	90,715,601
Government of St. Kitts and Nevis		

Treasury bills are debt securities issued by a sovereign government. They also form part of cash and cash equivalent (Note 31).

8. Deposits with other financial institutions

Operating cash balances	111,679,628	92,290,660
Items in the course of collection	5,559,328	3,781,039
Interest bearing term deposits	21,905,354	19,905,354
Included in cash and cash equivalent		
(Note 31)	139,144,310	115,977,053

		154,653,586	154,653,586

Included in Other reserves are the following individual reserves:

General Reserve

General reserve is used from time to time to transfer profits from retained earnings. There is no policy of regular transfer.

Reserve for interest collected on non-performing loans

This reserve was created to set aside interest accrued on non-performing loans in accordance with International Accounting Standards (IAS) 39. The prudential guidelines of Eastern Caribbean Central Bank do not allow for the accrual of such interest. As a result, the interest is set aside in a reserve and is not available for distribution to shareholders until received.

Loan Loss Reserve

The Eastern Caribbean Central Bank requires all banks within it jurisdiction to establish a special reserve for the amount by which the regulatory requirement for loan loss provisioning exceeds that computed under IAS 39. This reserve is non-distributable and forms part of Tier 2 Capital.

27. Earnings per share

Earning per share is calculated by dividing the net income attributable to shareholders by the weighted average number of ordinary shares in issue during the year.

Basic earnings per share (annualized)	\$0.07	\$0.27
Weighted average number of ordinary shares in issue	135,000,000	121,500,000
Net income attributable to shareholders	7,101,970	33,200,171

28. Dividend

The financial statements reflect a final dividend of \$6,885,000 for the year ended June 30, 2009, which was approved by the Board of Directors and paid.

29. Other events

Bonus share dividend

At the 38th Annual General Meeting of the St Kitts-Nevis-Anguilla National Bank Limited held on 26th March 2009, shareholders approved a recommendation by the Board of Directors to issue a bonus share dividend of two (2) new shares for every three (3) existing shares. On 11th September 2009, shareholders received a total of 53,998,883 shares as bonus shares based on their holdings of shares at 31st August 2009.

The remaining 1,117 shares (arising from fractional allocations) were sold on the open market and the cash proceeds distributed to the shareholders in the same proportion of their fractional share holdings.

Litigation

Lynn Bass v. St. Kitts-Nevis-Anguilla National Bank Limited

High Court, Civil Appeal No. 4 of 2009. Lynn Bass, a former employee, filed a claim of wrongful dismissal against the Bank for special and general damages. The Bank was successful in judgment received on March 23, 2009 (with costs). The above decision was appealed in the High Court by way of Civil Appeal No. 4 of 2009, filed on April 28, 2009. There is a high likelihood of success on same ground as initial claim. The judge gave a detailed precise judgment.

National Consumer Mortgage, LLC (a California Limited Liability Company) (Debtor) John P Brincko, Chapter 11 Trustee (Plaintiff) v. St Kitts-Nevis-Anguilla National Bank Limited (Defendant) Case No. 8:06-10429-TA. The Trustee asserts that the Bank engaged in negligent, reckless and intentional misconduct that enabled a certain company to open and maintain an account into which the Debtor made fraudulent transfers. The assertion is based on a belief by the Trustee that the Bank knew or reasonably should have known that the Company was a fraudulent business entity. It is likely that this matter can/will be withdrawn as the Bank performed its due diligence and the company in question was a valid company properly registered to do business at all material times.

As a result, no provision for a contingent liability is included in these financial statements.

30. Related Parties

Parties are considered related if one party has the ability to control the other party or exercise significant influence over the other party in making operational or financial decisions.

A number of banking transactions are entered into with our subsidiaries and directors in the normal course of business. Those transactions, which include deposits, loans and other transactions, are carried out on commercial terms and conditions, at market rates.

Government of St Kitts and Nevis

The Government of St Kitts and Nevis holds 51% of the Bank issued share capital. The remaining 49% of the issued share capital are widely held by individuals and other institutions (over 5,200 shareholders). The Bank is the main bankers to the government and, as such, undertakes commercial banking transactions on behalf of the government on commercial terms and conditions at market rates.

Public sector indebtedness to the Bank as at March 31, 2011 was \$1.089 billion (June 30, 2010 - \$1.074 billion). Public Sector deposits stood at \$720.962 million as at March 31, 2011 (June 30, 2010 - \$657.757 million).

Subsidiaries

Advances outstanding as at March 31, 2011 amounted to \$9.790 million (June 30, 2010 - \$14.119 million).

Deposits balances as at March 31, 2011 amounted to \$134.963 million (June 30, 2010 - \$133.408 million).

Directors and Associates

Advances outstanding as at March 31, 2011 amounted to \$1,032,722 (June 30, 2010 - \$688,399).

Deposits balances as at March 31, 2011 amounted to \$1,038,415 (June 30, 2010 - \$992,162).

Senior Management

At the end of March 2011, the following amounts were in place:

- Gross salaries, allowances and bonus payments amounted to \$1,497,610
- Loans and advances amounted to \$2.453 million (June 2010 \$2.092 million);
- Deposit amounts were \$1.987 million (June 2010 \$1.886 million); and
- Total St. Kitts-Nevis-Anguilla National Bank Limited shares held were 1,152,417 (June 2010 1,152,417)
