

Schedule 1
FORM ECSRC – K
ANNUAL REPORT
PURSUANT TO SECTION 98(1) OF THE SECURITIES ACT, 2001

For the financial year ended

December 31, 2019

Issuer Registration number
St. Lucia Electricity Services Limited

(Exact name of reporting issuer as specified in its charter)

Saint Lucia

(Territory of incorporation)

John Compton Highway, Sans Soucis, Castries, Saint Lucia

(Address of principal office)

REPORTING ISSUER'S:

Telephone number (including area code): 758-457-4400

Fax number: 758-457-4409

Email address: connected@lucelec.com

(Provide information stipulated in paragraphs 1 to 14 hereunder)

Indicate whether the reporting issuer has filed all reports required to be filed by section 98 of the Securities Act, 2001 during the preceding 12 months

Yes

No

Indicate the number of outstanding shares of each of the reporting issuer's classes of common stock, as of the date of completion of this report.

CLASS	NUMBER
Ordinary Shares	22,400,000
Non Voting ordinary shares	520,000

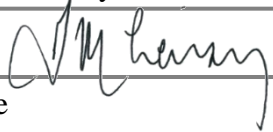

SIGNATURES

A Director, the Chief Executive Officer and Chief Financial Officer of the company shall sign this Annual Report on behalf of the company. By so doing each certifies that he has made diligent efforts to verify the material accuracy and completeness of the information herein contained.

The Chief Financial Officer by signing this form is hereby certifying that the financial statements submitted fairly state the company's financial position and results of operations, or receipts and disbursements, as of the dates and period(s) indicated. The Chief Financial Officer further certifies that all financial statements submitted herewith are prepared in accordance with International Accounting Standards consistently applied (except as stated in the notes thereto) and (with respect to year-end figures) including all adjustments necessary for fair presentation under the circumstances.

Name of Chief Executive Officer:

Trevor M. Louisy

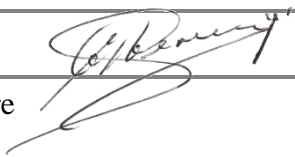

Signature

Date: November 11, 2020

Name of Director:

Charles Serieux

Signature

Date: November 11, 2020

Name of Chief Financial Officer:

Ian Peter

Signature

Date November 11, 2020

INFORMATION TO BE INCLUDED IN FORM ECSRC-K

1. Business.

Provide a description of the developments in the main line of business including accomplishments and future plans. The discussion of the development of the reporting issuer's business need only include developments since the beginning of the financial year for which this report is filed.

The Company continued to explore and analyze the technical, financial, operational and other aspects of renewable energy sources such as geothermal, wind and solar, as well as other traditional sources like natural gas, as part of the long term strategy to guide its expansion capacity.

Implementation of the Automatic Metering Infrastructure (AMI) was completed at the end of 2019. This Project involved replacing old electromechanical meters and transitioning the balance of the customer base to automatic billing. The Company expects to experience moderate reductions in system losses and meter reading costs as a result of the installation of these meters.

Grid modernization to improve remote control capabilities, efficiency and reliability continued in 2019, primarily as a result of the new SCADA system commissioned in 2018.

The Company plans to construct a new Substation in the north east corridor between the Cul-De-Sac and Union Substations that will be capable of relieving the demand on the Castries, Cul-de-Sac and Union substations. The new Substation will also help to reduce loads on the Redit substation, located in the fastest growing area of the country. It is anticipated that the major load growth in Castries and its environs will occur in the north east corridor rather than in the city centre.

As part of its routine preventative maintenance regime, the Company intends to complete an ongoing overhaul on one of its Generator sets and perform two others before the end of the year. Two upgrades on turbo chargers were completed in 2019 and another two are scheduled for 2020. There were signs of improving fuel efficiency at the end of 2019 as a result of these upgrades.

The project to harness the waste heat from the generators for cooling the buildings at the Cul De Sac Power facility, will continue in 2020. Work will also continue on the construction of a fibre optic network on its distribution poles.

As the company prepares to deal with the economic fallout from the COVID 19 pandemic, the focus in 2020 will be on the optimization of Generation and maintenance of a reliable and safe supply of electricity to its customers. Although the major capital expenditure is likely to be deferred to 2021, work will continue on the addition of battery storage to firm renewable capacity in the south as well as necessary Transmission & Distribution System expansion to cater for growth and improved reliability, in the North Eastern corridor. The Company will continue its efforts towards the integration of renewable energy into the grid.

2. *Properties*

Provide a list of properties owned by the reporting entity, detailing the productive capacity and future prospects of the facilities. Identify properties acquired or disposed of since the beginning of the financial year for which this report is filed.

PROPERTIES	PRODUCTIVE CAPACITY	FUTURE PROSPECTS
Cul De Sac Complex	Power station and Transmission substation	Completion of development of generation and related activity
Union Complex	Transmission Substation	Replacement of 11KV switchgear
Union Complex	Retired generation station	Station to be demolished and the site to be cleared
Faux a Chaud	NIL	For construction of sub station
Soufriere Power Station	Former Power Station	Site to be disposed of
Vieux Fort Power Station	Former Power Station	Station to be demolished and site to be cleared
Cantonement Complex	Transmission Substation and Technical Office	As existing
Soufriere Substation	Transmission Substation	As existing
Reduit Substation	Transmission Substation	As existing
Praslin Substation	Transmission Substation	As existing
Castries Substation	Transmission Substation	Upgrade facility
Sans Soucis Office	Head Administration Office	As existing
Vieux Fort Admin Office	Sub Office	As existing
Monchy	NIL	Site to be disposed of
Ti Rocher/Bocage	NIL	As existing

3. **Legal Proceedings.**

Furnish information on any proceedings that were commenced or were terminated during the current financial year. Information should include date of commencement or termination of proceedings. Also include a description of the disposition thereof with respect to the reporting issuer and its subsidiaries.

The Company was the defendant in various legal actions some of which were concluded during the year. In the opinion of Management, after taking appropriate legal advice, the results of the outstanding matters will not have a material effect on the Company's financial position. There were no significant pending legal actions against the Company as at the end of the financial year.

4. **Submission of Matters to a Vote of Security Holders**

If any matter was submitted to a vote of security holders through the solicitation of proxies or otherwise during the financial year covered by this report, furnish the following information:

- (a) The date of the meeting and whether it was an annual or special meeting.

54th Annual Meeting of Shareholders held on Friday 10th May 2019

- (b) If the meeting involved the election of directors, the name of each director elected at the meeting and the name of each other director whose term of office as a director continued after the meeting.

5.

RE-ELECTION OF DIRECTORS

- The following Directors retired by rotation and were re-elected at the 54th Annual Meeting of Shareholders:
 - Mr. John Joseph
 - Mr. Charles Serieux
 - Mrs. Carol Eleuthere Jn. Marie

The name of each other director whose term of office as a director continued after the 54th Annual Meeting of Shareholders.

1.	John Joseph
2.	Trevor Louisy
3.	Frank Myers
4.	Sharon Christopher
5.	Nicholas John
6.	Roger Blackman
7.	Carole Eleuthere Jn Marie
8.	Matthew Lincoln Mathurin
9.	Karen Darbasie
10.	Leslie Prospere
11.	Charles Serieux

- (c) A brief description of each other matter voted upon at the meeting and a statement of the number of votes cast for or against as well as the number of abstentions as to each such matter, including a separate tabulation with respect to each nominee for office.

Votes are on a show of hands and not votes unless a ballot is called for. The following matters were tabled and unanimously passed on a show of hands:

1. To consider and adopt the Directors' Report.
2. To consider and adopt the Auditor's Report and the Financial Statements for the year ended 31st December 2018.
3. To appoint the Auditor.
4. To sanction a final dividend in respect of the year ended 31st December 2018.
5. To re-elect Directors.

- (d) A description of the terms of any settlement between the registrant and any other participant.

N/A

- (e) Relevant details of any matter where a decision was taken otherwise than at a meeting of such security holders.

N/A

5. Market for Reporting issuer's Common Equity and Related Stockholder Matters.

Furnish information regarding all equity securities of the reporting issuer sold by the reporting issuer during the period covered by the report.

N/A

6. Financial Statements and Selected Financial Data

Attach Audited Financial Statements, which comprise the following:

For the most recent financial year

- (i) Auditor's report; and
- (ii) Statement of Financial Position;

For the most recent financial year and for each of the two financial years preceding the date of the most recent audited Statement of Financial Position being filed

- (iii) Statement of Comprehensive Income;
- (iv) Statement of Cash Flows;
- (v) Statement of Changes in Equity; and
- (vi) Notes to the Financial Statements.

7. Disclosure about Risk Factors

Provide a discussion of the risk factors that may have an impact on the results from operations or on the financial conditions. Avoid generalized statements. Typical risk factors include untested products, cash flow and liquidity problems, dependence on a key supplier or customer, management inexperience, nature of business, absence of a trading market (specific to the securities of the reporting issuer), etc. Indicate if any risk factors have increased or decreased in the time interval between the previous and current filing.

1. The Company faces the risk of disruption in its utility operations, adverse financial results, poor liquidity, and reduction in workforce productivity during the Covid-19 outbreak. This is due to the decline in electricity demand from the closure of the hotels, restrictions on non-essential businesses and the need to observe social distancing, particular at the work place. Initial forecasts indicate that the Company will not achieve its revenue and profit targets this year. In response, the company has taken proactive steps to defer capital investments and reduce cost of operations as much as possible without compromising service quality in the short term. The company also faces the risk of disruption to its supply chain and may experience delays in the fulfillment of orders for critical parts required for maintenance and restoration works.
2. The Company had identified certain risks in the process of preparing for the new regulatory framework. To mitigate this risk, the Company established a Regulatory Reform Team to spearhead the Company's involvement in the regulatory reform process. This risk is considered stable.
3. A significant portion of the total electricity price to consumers is the cost of fuel. The Company has identified this, as well as the volatility of fuel prices on the world market, to be significant risks. The Company continues to use fuel price hedging to help mitigate the risk of volatility in fuel prices.
4. The inability to meet consumer demand for electricity is considered a major risk to the Company. This can be caused by either an unforeseen increase in the demand for power or the loss of generators or substations. The Company employs a robust preventative maintenance programme to mitigate the risk of unplanned asset downtime. Uncertainty regarding the implementation of investment projects in the private and public sector, contributes significantly to the assessment of this risk. This risk is considered low to moderate. As the existing generation assets near the end of their useful lives, and the uncertainty of future demand increases, this risk will increase.

5. Obtaining insurance coverage for the Transmission & Distribution (T&D) plant on the market at a cost-effective rate continues to be a challenge. As such, the Company established a Self- Insurance Fund as a vehicle to mitigate losses in the event of catastrophic events. As at December 31, 2019, the Fund balance was EC\$42.9M. The Company has access to a standby credit facility of EC\$10.0M to meet any emergency asset restoration costs should the need arise. The Net Book Value of the T&D assets was EC\$142.7M at the end of December 2019. Although the Company's contribution to the Self Insurance Fund is deemed to be adequate, the fund would not be sufficient to cover a total loss of its T&D infrastructure. This risk is considered high. The Company continues to explore options for mitigating the impact of such a catastrophic event.
6. With a new regulatory framework, the threat of loss of sales due to the introduction of renewables and competition for generation is likely; however, at the current rate of growth of renewables this threat appears to be low. Although this risk is considered low, uncertain events such as the price of fuel, the cost of renewable technology, the tariff regime and the response to the economic fallout from COVID-19, can increase the risk within a short period.
7. Receivables management remained a priority for the Company. All accounts continue to be monitored on an on-going basis to keep delinquency at its minimum. Credit risk is considered to be high at this time with the Covid-19 outbreak.
8. The Company utilizes Return on Equity as one of the measures of its performance. As shareholders' equity increases and profit levels remain fairly constant, the Company is faced with the risk of continued diminishing Return on Equity. In the wake of the COVID 19 crisis, this risk has increased and is considered high.
9. System Losses, specifically due to electricity theft, continue to be a concern for the Company, given the implications for unrecognized revenues and ultimately reduced shareholder returns. This risk is stable but as the country grapples with the economic fallout from the COVID 19 pandemic, this risk could increase.
10. The fallout from industrial action can affect the Company's reputation and by extension that of the country, with regards to foreign direct investment. Employee engagement and staff relations continue to be a priority in the Company's annual work plan.

8. Changes in Securities and Use of Proceeds

- (a) Where the rights of the holders of any class of registered securities have been materially modified, give the title of the class of securities involved. State briefly the general effect of such modification upon the rights of holders of such securities.

NONE

- (b) Where the use of proceeds of a security issue is different from that which is stated in the registration statement, provide the following:

- Offer opening date (provide explanation if different from date disclosed in the registration statement)

- Offer closing date (provide explanation if different from date disclosed in the registration statement)

- Name and address of underwriter(s)

- Amount of expenses incurred in connection with the offer _____

- Net proceeds of the issue and a schedule of its use

- Payments to associated persons and the purpose for such payments

- (c) Report any working capital restrictions and other limitations upon the payment of dividends.

Reserves have been set up for the Company's self insurance, distribution of which is not permitted.

9. Defaults upon Senior Securities

- (a) If there has been any material default in the payment of principal, interest, a sinking or purchase fund instalment, or any other material default not satisfied within 30 days, with respect to any indebtedness of the reporting issuer or any of its significant subsidiaries exceeding 5 per cent of the total assets of the reporting issuer and its consolidated subsidiaries, identify the indebtedness. Indicate the nature of the default. In the case of default in the payment of principal, interest, or a sinking or purchase fund instalment, state the amount of the default and the total arrears on the date of filing this report.

N/A

- (b) If any material arrears in the payment of dividends have occurred or if there has been any other material delinquency not satisfied within 30 days, give the title of the class and state the amount and nature of the arrears or delinquency.

N/A

10. Management's Discussion and Analysis of Financial Condition and Results of Operation.

Discuss the reporting issuer's financial condition covering aspects such as liquidity, capital resources, changes in financial condition and results of operations during the financial year of the filing. Discussions of liquidity and capital resources may be combined whenever the two topics are interrelated.

The Management's Discussion and Analysis should disclose sufficient information to enable investors to judge:

1. The quality of earnings;
2. The likelihood that past performance is indicative of future performance; and
3. The issuer's general financial condition and outlook.

It should disclose information over and above that which is provided in the management accounts and should not be merely a description of the movements in the financial statements in narrative form or an otherwise uninformative series of technical responses. It should provide management's perspective of the company that enables investors to view the business from the vantage point of management.

The discussion should focus on aspects such as liquidity; capital resources; changes in financial condition; results of operations; material trends and uncertainties and measures taken or to be taken to address unfavourable trends; key performance indicators; and non- financial indicators.

General Discussion and Analysis of Financial Condition

The Company registered a profit after tax above its budget for the year. This performance was primarily due to higher than budgeted sales and the delays in execution of certain initiatives resulting in lower than budgeted costs. Management was able to translate these profits into operating cash inflows through its aggressive working capital management. These operating cash flows were supplemented by additional loan financing for the funding of its capital programme.

The Company implemented International Financial Reporting Standard 16, Leases (IFRS 16) effective January 1, 2019. This standard replaced International Accounting Standard 17. The changes which have impacted the Company's Financial Statements deal with recognition, measurement, presentation and disclosure of leases.

Liquidity and Capital Resources

Provide a narrative explanation of the following (but not limited to):

- i) The reporting issuer's financial condition covering aspects such as liquidity, capital resources, changes in financial condition and results of operations.
- ii) Any known trends, demands, commitments, events or uncertainties that will result in, or that are reasonably likely to result in, the issuer's liquidity increasing or decreasing in any material way. If a deficiency is identified, indicate the course of action that the reporting issuer has taken or proposes to take to remedy the deficiency.
- iii) The issuer's internal and external sources of liquidity and any material unused sources of liquid assets.
- iv) Provisions contained in financial guarantees or commitments, debt or lease agreements or other arrangements that could trigger a requirement for an early payment, additional collateral support, changes in terms, acceleration of maturity, or the creation of an additional financial obligation such as adverse changes in the issuer's financial ratios, earnings, cash flows or stock price or changes in the value of underlying, linked or indexed assets.
- v) Circumstances that could impair the issuer's ability to continue to engage in transactions that have been integral to historical operations or are financially or operationally essential or that could render that activity commercially impracticable such as the inability to maintain a specified level of earnings, earnings per share, financial ratios or collateral.
- vi) Factors specific to the issuer and its markets that the issuer expects will affect its ability to raise short-term and long-term financing, guarantees of debt or other commitment to third parties, and written options on non-financial assets.
- vii) The relevant maturity grouping of assets and liabilities based on the remaining period at the balance sheet date to the contractual maturity date. Commentary should provide information about effective periods and the way the risks associated with different maturity and interest profiles are managed and controlled.
- viii) The issuer's material commitments for capital expenditures as of the end of the latest fiscal period, and indicate the general purposes of such commitments and the anticipated source of funds needed to fulfil such commitments.
- ix) Any known material trends, favorable or unfavorable, in the issuer's capital resources, including any expected material changes in the mix and relative cost of capital resources, considering changes between debt, equity and any off-balance sheet financing arrangements.

Discussion of Liquidity and Capital Resources

(1) Liquidity

The main revenue source of the Company continued to be from the sale of electricity to customers in Saint Lucia.

Capital programmes for 2019 were funded from operational cash flows and a long-term bank loan.

Trends in economic activity and performance were continually monitored to gauge the effects on the Company's operations and where necessary corrective actions taken.

The Company's working capital ratio at December 31, 2019 was 2.4 compared to 2.3 in 2018 as a result of the loan funds received in the latter half of the year coupled with the increase in operating profits.

There are no provisions contained in financial guarantees or commitments, debt or lease agreements or other arrangements that could trigger a requirement for an early payment, additional collateral support, changes in terms, acceleration of maturity, or the creation of an additional financial obligation.

The Company expects to face challenges in the significant reduction in sales and in the collection of cash from its customers, a ripple effect of the global pandemic associated with the novel corona virus, COVID-19. The country's largest contributor to GDP, the tourism industry, is expected to be hit the hardest, directly impacting the hotel sector and filtering to the commercial and other sectors. The future is uncertain as the major markets; the United States, Canada and United Kingdom continue to grapple with this disease. Working capital management will be a key focus for the Company in the upcoming months.

The Company has not identified factors specific to it and its markets that it expects will affect its ability to raise short-term and long-term financing, fulfil its debt servicing or other commitment to third parties, and written options on non-financial assets.

(2) Capital Resources

Capital expenditure for the year amounted to EC40.3M, which was primarily upgrades to the transmission and distribution network, station improvements, engine overhauls and Information Technology system upgrades.

At the end of the year the Company had capital commitments of \$2.1M relating to its generation plant, transmission and distribution system and upgrades to its Information Technology systems.

Off Balance Sheet Arrangements

Provide a narrative explanation of the following (but not limited to):

- i) Disclosures concerning transactions, arrangements and other relationships with unconsolidated entities or other persons that are reasonably likely to materially affect liquidity or the availability of, or requirements for capital resources.
- ii) The extent of the issuer's reliance on off-balance sheet arrangements should be described fully and clearly where those entities provide financing, liquidity, market or credit risk support, or expose the issuer to liability that is not reflected on the face of the financial statements.
- iii) Off-balance sheet arrangements such as their business purposes and activities, their economic substance, the key terms and conditions of any commitments, the initial on-going relationship with the issuer and its affiliates and the potential risk exposures resulting from its contractual or other commitments involving the off- balance sheet arrangements.
- iv) The effects on the issuer's business and financial condition of the entity's termination if it has a finite life or it is reasonably likely that the issuer's arrangements with the entity may be discontinued in the foreseeable future.

N/A

Results of Operations

In discussing results of operations, issuers should highlight the company's products and services, facilities and future direction. There should be a discussion of operating considerations and unusual events, which have influenced results for the reporting period. Additionally, any trends or uncertainties that might materially affect operating results in the future should be discussed.

Provide a narrative explanation of the following (but not limited to):

- i) Any unusual or infrequent events or transactions or any significant economic changes that materially affected the amount of reported income from continuing operations and, in each case, the extent to which income was so affected.
- ii) Significant components of revenues or expenses that should, in the company's judgment, be described in order to understand the issuer's results of operations.
- iii) Known trends or uncertainties that have had or that the issuer reasonably expects will have a material favorable or unfavorable impact on net sales or revenues or income from continuing operations.
- iv) Known events that will cause a material change in the relationship between costs

and revenues (such as price increases, costs of labour or materials), and changes in relationships should be disclosed.

- v) The extent to which material increases in net sales or revenues are attributable to increases in prices or to increases in the volume or amount of goods or services being sold or to the introduction of new products or services.
- vi) Matters that will have an impact on future operations and have not had an impact in the past.
- vii) Matters that have had an impact on reported operations and are not expected to have an impact upon future operations
- viii) Off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships that have or are reasonably likely to have a current or future effect on the registrant's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.
- ix) Performance goals, systems and, controls,

Overview of Results of Operations

Results of Operations

The following is an analysis of the audited consolidated results of St. Lucia Electricity Services Limited (the Company) and its subsidiaries - Energyze Holdings Inc. and LUCELEC Cap-Ins. Inc.

Electricity sales grew by 2.0% in 2019 compared to a 0.5% increase in 2018. Sales increased in the Industrial (4.8%), Commercial (3.0%), Domestic (2.6%) and hotel (0.1%) sectors, while there was a decrease in the Street Light sector (5.1%).

This growth trend is not anticipated for 2020 as the country is expected to face significant economic challenges as a result of the global pandemic associated with the novel corona virus, COVID-19.

Total revenue (EC\$312.4M) in 2019 increased by EC\$1.7M (0.5%) over 2018 (EC\$310.7M), primarily due to the increase in sales dampened by the reduction in tariffs. The overall average tariff decreased by 1.2% from EC\$0.85 in 2018 to EC\$0.84 in 2019, driven by lower fuel prices incurred during the year compared to the previous year.

Movements in the tariff reflect the effect of changes in the price of fuel including charges/gains associated with derivative financial instruments employed by the Company. Any future changes in oil prices will have a direct impact on electricity prices given the current mechanism whereby tariffs are adjusted for changes in fuel prices.

Generation costs (EC\$28.8M) (excluding fuel costs) were higher than the previous year's costs (EC\$25.8M) by EC\$3.0M (11.6%) mainly as a result of increases in payroll costs (\$1.5M), depreciation (EC\$0.8M), maintenance on generation engines (EC\$0.2M), solar farm maintenance (EC\$0.3M) and building maintenance (EC\$0.2M).

Transmission and distribution costs (EC\$40.7M) decreased by EC\$1.2M (2.9%) compared to the prior year (EC\$41.9M) primarily due to a decrease in depreciation (EC\$2.7M) and T&D maintenance costs (EC\$1.4M), offset by increases in payroll costs (EC\$2.6M) and software maintenance (EC\$0.3M).

Administrative expenditure (EC\$34.0M) increased by EC\$1.0M (3.0%) from the prior year (EC\$33.0M). This was primarily due to increases in depreciation and amortisation (EC\$0.5M), public relations and sponsorship costs (EC\$0.3M), insurances (EC\$0.4M) and bad debts provision, offset by decreases in employee costs (EC\$0.4M) and motor vehicle costs (EC\$0.5M).

Finance costs increased by EC\$0.3M (5.8%) from EC\$5.2M (2018) to EC\$5.5M (2019) due to the increase in the loan balance and the change in accounting for leases. The weighted average interest rate in 2019 was 4.6% compared to 4.8% in 2018.

The Group experienced gains in the fair value of its captive insurance investments of EC\$2.5M compared to a loss of EC\$1.8M in the preceding year.

During the year the Company made additional provisions for retroactive payments to staff in the amount of \$4.0M.

The Group achieved a Profit before Tax of EC\$51.7M which was higher than the previous year's result of EC\$47.6M by 8.6%.

The Group's Profit after Tax of EC\$38.0M (2019) increased by 8.6% from EC\$35.0M (2018).

Earnings per share for the year was EC\$1.66 (2018 - \$1.53).

The interim dividend per share is EC\$0.45 (2018 - EC\$0.45). The Board of Directors will be making a recommendation to the shareholders on the 2019 final dividend at the Annual Meeting of Shareholders in 2020.

The Company achieved a rate of Return on Equity of 12.7% (2018 – 12.0%).

11. Changes in and Disagreements with Auditors on Accounting and Financial Disclosure.

Describe any changes in auditors or disagreements with auditors, if any, on financial disclosure.

N/A

12. Directors and Executive Officers of the Reporting Issuer. (*Complete Biographical Data Form attached in Appendix 1 and Appendix 1(a) for each director and executive officer*)

Furnish biographical information on directors and executive officers indicating the nature of their expertise.

13. Other Information

The reporting issuer may, at its option, report under this item any information, not previously reported in a Form ECSRC – MC report provided that the material change occurred within seven days of the due date of the Form ECSRC – K report. If disclosure of such information is made under this item, it need not be repeated in a Form ECSRC – MC report which would otherwise be required to be filed with respect to such information.
