THEME STATEMENT

021 saw a continuation of the global battle with the COVID-19 pandemic. Governments, organisations and people struggled through the curfews, hybrid work, conferences, meetings and schooling, the frequent adjustments to protocols, the health care challenges and the general air of uncertainty.

There were some additional challenges brought on by the extended impact of the pandemic international supply chain and logistics issues which had their ripple effects on the local economy and business operations. There were new-found opportunities and learnings too as we explored ways around these complications and learnt to live with COVID-19.

All this impacted LUCELEC operations, in one way or another, and tested the foundation on which the Company stands - provision of a safe and reliable electricity supply at a reasonable cost, delivering value for all stakeholders. Despite the challenges, we were able to do that, while simultaneously developing expanded and sturdier foundations for the Company's success in the future.

A key output was the development of our new Strategic Business Plan looking towards 2035. This plan builds on the cornerstones we have established through our core capabilities and infrastructure to expand our offerings to customers. The plan challenges LUCELEC to actively engage at the crossroads of energy and other sectors to help drive Saint Lucia's sustainable energy goals and economic development.

Through the efforts of our people and the shift of our culture into a more proactive, innovative organisation we are committed and excited to build on the foundations we have established to shape Saint Lucia's energy future.

CORPORATE INFORMATION

Vision

To be the energy that powers our nation's success

Mission

We deliver efficient energy services that are safe, reliable, and environmentally responsible. We meet the expectations of our customers, shareholders and employees and we are a catalyst for social and economic development in Saint Lucia.

Core Values

Accountability, Excellence, Caring, Ethics

CHAIRMAN'S MESSAGE

he COVID-19 pandemic continued to dominate world affairs in 2021, including the energy and electricity industries. Its extended impact on our lives, the global economy, travel, and business operations ebbed and flowed as we dallied between spurts of recovery and setbacks as new variants emerged. Nonetheless, 2021 saw a determined push towards 'normalcy' across the globe with increasing COVID-19 vaccination rates, loosening pandemic-related restrictions. and increased economic activity. This is the context for the Company's performance for 2021 and as we look ahead to 2022.

Industry Overview - International

In the global energy and electric utility industry, crude oil prices increased as economic activity and demand rose in the latter part of 2021. The price of oil averaged the highest it has been for the past three years, resulting in increases in electricity prices. It is anticipated that oil and fuel prices will continue to rise in 2022 averaging approximately US\$11 per barrel more than in 20212. If the current conflict in Ukraine continues, oil prices are likely to be even higher, as evidenced by the markets' immediate response to news of the invasion.

Despite rising cost for key materials used to make solar panels and wind turbines, renewables' percentage of the energy mix continued to grow at the expense of conventional generation. That trend is expected to continue in 2022.

Developing smarter, more resilient grids, maintaining system security, improving disaster response, and integrating renewable and distributed energy resources into the grid remained major imperatives for 2021. These tough challenges remain and utilities will continue to grapple with those while keeping costs down. To tackle this tall order, the industry will "likely continue to advance in its "3D" transformation: decarbonization, digitalization, and decentralization"3.

Industry Overview - Local

In St. Lucia, tourism, the main economic driver, registered a 52% improvement in stayover arrivals over 2020, although total arrivals (stayover, cruise and yachts) were well below 2020 and 2019 levels given the late return of cruise ships to our shores. This helped drive a slight improvement in economic activity and electricity demand.

The Company continued to focus its operations and capital expenditure programme only on what was absolutely necessary to manage risks, maintain a safe and reliable service, and preserve LUCELEC as a viable business entity.

The higher oil prices were reflected in higher electricity tariffs in 2021.

Challenges

A constantly present challenge for the Company during 2021 was keeping the lights on with increasing COVID-19-related absences, but the firm foundations of the protocols developed in 2020 served the Company well. We were not so fortunate with supply chain issues which delayed some of our projects. Acquiring land for renewable energy projects remained a challenge and may continue to be for some time. Unless alternative strategies are employed, renewable energy projects and their attendant benefits may continue to be delayed.

Sadly, despite extensive upgrades to the entire ventilation system, work on solving the air quality challenges at the Sans Souci Customer Service Offices continues into 2022. We remain hopeful that office will be reopened to the public shortly.

Company Performance

Given the prevailing conditions in 2021, the Company's overall performance is commendable. There were increases in electricity sales and total revenue. Profit after Tax, Earnings per share and retained earnings for the Group increased, while Return on Equity for the Group was only marginally lower than the prior year.

LUCELEC achieved target or better on 10 of its 12 measures of success and between threshold and target on the remaining two. Remarkably, the Company had its best reliability and customer satisfaction performances on record.

Outlook for 2022

2021 closed the book on our 2020 Strategic Business Plan. The Company was reasonably successful in implementing most of the proposals in the 'old plan', although COVID-19 coming in the final year of implementation resulted in delays on some major projects. Despite the constraints of the pandemic, the Company successfully developed a new Strategic Business Plan with broad-based stakeholder consultation. This plan will guide the decisions and investments LUCELEC makes to create greater value for all its stakeholders from now through 2035. It identifies where LUCELEC can better collaborate with others to address the country's needs including development, education economic strengthening, internet accessibility, and energy efficiency. We are excited to explore these initiatives with government, the business community, and other partners. Critically, the plan embraces the "3D" transformation: decarbonization, digitalization, and decentralization, that industry experts identify as essential for tackling the tough challenges ahead for utilities. In that regard, we believe, the plan builds on the firm foundations that the Company has developed over the years while challenging us to be more agile, more proactive, given the rapidly changing operating environment.

There is the expectation of some measure of economic recovery in 2022. The Company anticipates increases in unit sales, decreasing bad debt

provision, but increasing costs to maintain safety and reliability of the transmission and distribution network. Therefore, the following broad strategic objectives remain as priorities in 2022: achieve the minimum allowable rate of return of 10% to ensure an automatic increase in the base tariff is not triggered, manage cash flow, optimize operating costs and capital expenditure, manage risks, maintain a safe and reliable service, and preserve LUCELEC as a viable business entity.

There is also the expectation that a new suite of regulations will be enacted during the year to replace the existing Electricity Services Act (ESA) that will govern our operations going forward.

The Company will also be seeking to move forward with some of its critical capital projects to continue modernizing towards a smarter and more resilient grid and transforming its overall operations in keeping with the thrust of the new Strategic Business Plan.

Conclusion

Even as the world is beginning to learn to live with COVID-19, there is potentially more disruption on the horizon with the events taking place in eastern

Europe. Only time will tell its impact on a global and local economy that is already fatigued from the extended shocks of COVID-19. The last things we need are further supply chain disruptions and more rising prices that will shake the social and economic foundations of vulnerable states like ours. It seems like, my closing comments in last year's Annual Report are just as relevant today - the Company must proactively collaborate with the ecosystem to better manage and respond to such shocks to ensure our collective capacity to not just survive, but thrive.

I take the opportunity to express my appreciation for the support of the other Directors on the Board of St. Lucia Electricity Services Limited, the Directors of the subsidiaries (LUCELEC Cap Ins Inc., and Energyze Holdings Inc.), and the management and staff of LUCELEC for the effort they continue to put in every year to ensure we have decent results to report on, and continuously build on the solid foundation we have laid over the years.

BOARD OF DIRECTORS

John Joseph Acc. Dir. - Chairman

Trevor M. Louisy Acc. Dir. - Managing Dir.

Charles Serieux Acc. Dir.

Calixte I. S. N. George Director

John Joseph was appointed to the Board of Directors of St. Lucia Electricity Services Limited in January 2016 representing minority shareholders. Mr Joseph is the Chairman of the Board's Strategic Planning and Investments Committee and a member of the Human Resources Committee.

Mr Joseph is a consultant and regional associate consultant with Water and Waste Water Solutions of Canada (WWWS) specializing in the utilities sector. He has an MBA (Corporate Finance) from Fairleigh Dickinson University and a BSc in Economics (Upper Second-Class Honours) from The University of the West Indies as well as over thirty (30) years' experience in the utilities sector.

Trevor Louisy was appointed to the Board of Directors of St. Lucia Electricity Services Limited on January 1, 2004 and is the Managing Director of St. Lucia Electricity Services Limited. He holds a BSc in Electrical Engineering and is a member of the Board's Human Resources and Strategic Planning and Investments Committees.

Charles Serieux was appointed to the Board of Directors of St. Lucia Electricity Services Limited on December 2, 2016 representing minority shareholders. Mr Serieux is a Fellow of the Association of Chartered Certified Accountants (FCCA) and a member of the Institute of Chartered Accountants of the Eastern Caribbean (ICAEC). He has been the Managing Director of Ultramart Inc. chain of supermarkets since 2003. Mr Serieux is the Chairman of the Board's Audit Risk and Compliance Committee, a member of the Governance Committee and, the Board representative on the LUCE-LEC Staff (Grade II) Pension Scheme.

Calixte I. S. N. George was appointed to the Board of Directors on August 17, 2021, by the Government of Saint Lucia. Mr George has varied professional experience in Public Administration and Policy, Construction, Media and Communications. He is a University of the West Indies Open Scholar with an academic background in Electrical & Computer Engineering (Communication Systems) and is also certified in Solar PV Design & Installation. He is a member of the Board's Governance and Strategic Planning & Investment Committees.

Geraldine Lendor-Gabriel Acc. Dir

Geraldine Lendor - Gabriel was appointed to the Board St. Lucia Electricity Services Limited on October 19, 2021 by the Castries Constituencies Council. She is a Certified General Accountant and also the holder of an MSc in **Environmental Management** (University of Derby in the UK,) and a BSc (Hons) in Economics and Management (UWI, Cave Hill, Barbados). Ms Lendor-Gabriel is currently the Mayor of Castries. She has over 25 years' experience in the field of Finance and Accounting, over 15 years in the area of Waste and Environmental Management, and over 10 years in human resource development. Ms Lendor -Gabriel is a member of the Board's Strategic Planning and Investments Governance Committees.

Dr Frederick Isaac Director

Dr Frederick Isaac was appointed to the Board of Directors of St. Lucia Electricity Services Limited by the National Insurance Corporation (NIC) November 15, 2019. Dr Isaac is a multi-disciplinary consulting engineer. He has been the Chairman of Smart Technologies since 2019 and Energy & Advance Control Technologies since 2007. Dr Isaac is a member of the Board's Strategic Planning and Investment and **Audit** Risk and Compliance Committees.

Evaristus Jn Marie Acc. Dir.

Evaristus Jn Marie was appointed to the Board of St. Lucia Electricity Services Limited on November 5, 2021 by the National Insurance Corporation (NIC). Mr Jn Marie is currently the NIC Chairman and has been the Managing Director of Jn Marie & Sons Ltd since 1997. He is the holder of an MSc in Project Management from Salford University in Manchester, England, and a Member of the Association of Accounting Technicians. Mr Jn Marie is a member of the Board's Audit Risk and Compliance and Human Resources Committees.

Roger Blackman Acc. Dir.

Blackman Roger was appointed to the Board of St. Directors of Lucia Electricity Services Limited Emera (St. Lucia) by Limited on March 2016. Mr Blackman is a Mechanical Engineer by profession and holds a BSc in Engineering from The University of the West Indies, St. **Augustine** Campus and an MBA from Durham University, UK. He is also the Managing Director of Barbados Light & Power Company Limited. Mr Blackman is a member of the Board's Strategic Planning and Investments and Audit Committees.

Sharon Christopher Acc. Dir.

Lindi Ballah - Tull Director

Professor Sterling Frost

Sharon Christopher was appointed to the Board of Directors of St. Lucia Electricity Services Limited Emera (St. Lucia) Limited on May 13, 2016. Ms Christopher is the Chief Executive Officer of Sharon Christopher and Associates. She is an Attorney at Law, a leadership development coach and a motivational speaker. She holds an LLB (Upper Second - Class Honours), a Legal Education Certificate (LEC), and an LLM in Corporate Law. Ms Christopher is the Chairperson of the Board's Human Resources and Governance Committees.

Lindi Ballah - Tull was appointed to the Board of Directors of St. Lucia Electricity Services Limited by First Citizens Bank Limited on May 12, 2019. She is currently the Group Corporate Secretary/Head -Legal, Compliance and Governance of the First Citizens Group. She has 30 years' experience in the field of Corporate Law and Banking. Mrs Ballah - Tull holds a Bachelor of Laws (LLB) (Honours) from The University of the West Indies, Cave Hill, Barbados and a Legal Education Certificate (LEC) from the Hugh Wooding Law School, St Augustine, Trinidad and Tobago. She holds membership in the Law Association of Trinidad and Tobago and the Corporate Governance Institute of Trinidad and Tobago. She is a member of the Board's Audit Risk and Compliance Committee and Chairperson of the Governance Committee.

Professor Sterling Frost was appointed to the Board of Directors of St. Lucia Electricity Services Limited by First Citizens Bank Limited on April 27, 2021. He joined the First Citizens Group in 2016 as Deputy Chief Executive Officer -Operations and Administration. Professor Frost holds a Master's degree and a Doctorate in Business Administration from The University of the West Indies. Professor Sterling Frost has three decades of global corporate career experience in North America, Latin America and the Caribbean region. He currently serves on the Board's Governance and Strategic Planning and Investments Committees.

DIRECTORS' REPORT

The Directors present their report for the year ended December 31, 2021.

Principal Activities

The Company's principal activities consist of the generation, transmission and distribution of electricity. There were no significant changes to the nature of the Company's activities during the year.

Directors

The Directors of the Company since the 56th Annual Shareholders Meeting were:

Non-Executive Directors:

- Mr John Joseph
- Dr Frederick Isaac
- Mr Frank V. Myers (Resigned August 3, 2021)
- Ms Sharon Christopher
- · Mr Roger Blackman
- Mr Leslie Prospere (Resigned July 27, 2021)
- Mr Nicholas John (Resigned July 29, 2021)
- · Mr Charles Serieux
- Ms Lindi Ballah-Tull
- · Mrs Carole Eleuthere-Jn Marie (Resigned April 27, 2021)
- Ms. Geraldine Lendor Gabriel (Appointed October 19, 2021)
- Mr. Evaristus Jn Marie (Appointed November 5, 2021)
- Professor Sterling Frost (Appointed April 27, 2021)
- · Mr. Calixte I. S. N. George (Appointed August 17, 2021)

Executive Director:

Mr Trevor M. Louisy

Financial Results

The Company sold 352.9 million kWhs of electricity, a 4.9% increase from the previous year, attributable to increases in sales to the Domestic, Hotel and Industrial sectors, despite reductions in sales to the Commercial and Street Lights sectors. Total revenues were EC\$294.8 million, a 13.3% increase compared to the previous year due to an increase in unit sales and tariffs.

Net profit for the year for the Group was EC\$40.5 million, an increase of 10.7% compared to the previous year. The Group achieved Earnings per Share of EC\$1.77, an increase of 10.6 % compared to 2020 (EC\$1.60).

Assets acquired during the year amounted to EC\$20.7 million comprising mainly of upgrades to the transmission and distribution network, building and construction, station improvements and engine overhauls.

Dividend

The Board of Directors declared a total dividend of EC\$0.97 per ordinary share for 2020. The Company paid an interim dividend in December 2021 of EC\$0.45 per ordinary share.

In 2022, the Board of Directors will make a recommendation to the shareholders on the total dividend for the 2021 financial year.

State of Affairs

In the opinion of the Directors there were no significant changes in the state of affairs of the Company during the financial year.

Events Subsequent to Balance Sheet Date

Apart from the matters described under this heading and other matters discussed elsewhere in the Annual Report, the Directors are not aware of any other matters or circumstances which have arisen since December 31, 2021 that have significant effect or may significantly affect the operations of the Company in subsequent financial years, the results of those operations, or the state of affairs of the Company in future years.

By order of the Board of Directors

OPERATIONS

REVIEW

s the COVID-19 pandemic continued its protracted impact on world economies in 2021, LUCELEC remained focused on managing risks, ensuring a safe, reliable and cost-effective energy service to all of St. Lucia, and preserving LUCELEC as a viable business. The foundations laid in 2020 for successfully navigating the uncertainties of operating in a pandemic, held the Company in good stead. Despite increased absences arising out of community spread, the Company, once again, managed to limit work-place infections and spread.

Overall, energy demand increased gradually as economic activity picked up slowly, but demand remained below pre-COVID-19 levels. Supply chain disruptions resulted in delays on some projects. Nonetheless, the Company delivered one of its best operational performances, exceeding nearly all its targeted indices.

⁴See Corporate Performance Table on page 4

Corporate Performance⁴

Of the 12 performance targets approved by the Board of Directors for 2021, the Company achieved target or better on 10, and between target and threshold on two.

The Company performed better than target for Profit After Tax, Working Capital Ratio, System Average Interruption Duration Index (SAIDI), System Average Interruption Frequency Index (SAIFI), Fuel Efficiency, Customer Satisfaction, Megawatt Hours Sold per Full Time Employee (MWh Sold/FTE), Total Cost per Kilowatt Hour Sold (Total Cost/kWH Sold), Employee Engagement Levels - Implementation and Employee Engagement Levels - Survey. Performance for System Losses and All Injury/Illness Frequency Rate (AIFR) was between target and threshold.

Importantly, the Company's performance in those indices that impact customers the most - customer satisfaction, the frequency and duration of power

interruptions, and fuel efficiency - was well above target. The efforts by staff at all levels, and the improved focus and understanding of what needed to be done to close the performance gap was obvious. Also, in the two areas where the Company marginally missed the targeted performance, it should be noted that System Losses increased as a result of increased sales, while external influence ruined a zero-accident trend that had lasted 33 months, resulting in an AFIR just below target.

Strategy Management

Recognizing the unpredictable nature of business brought on by the pandemic, in 2021 the Company continued with its proactive stance to implement its "COVID-19 Short to Medium Term Action Plan." This plan was based on four possible scenarios of what the post COVID-19 external and local operating environment could look like. It required adjustments to the Company's capital and operating work programmes, such that expenditure was reduced without adversely affecting the quality, reliability and safety of supply in the short term. The results have justified this approach.

However, recognizing that the energy sector is rapidly evolving, and there is a need for LUCELEC to leverage available opportunities to build on the solid foundation laid over the years to secure its future as a strong, sustainable, and profitable utility, the Company utilised the first half of 2021 to develop a strategic business plan to span the period 2022 -2035. This plan maps out three transformative vision milestones. The first sub-horizon of the plan is 2025, and focuses on four related, ambitious outcomes: increase long-term shareholder value, reduce the impact of high-cost diesel fuel, contribute to growth of the local economy, and profitably enter adjacent business opportunities.

The transition to aggressive implementation of the initiatives to drive these objectives will be challenging given the level of change management and resources required. Hence, management, through the Office of Strategy Management has set out to strengthen its strategy governance process to allow dynamic management of the strategy, and broad engagement from the entire organization.

Update on Strategic Initiatives

The Company's Strategic Business Plan looking towards 2020 (which was extended into 2021 as a result of the pandemic) identified key strategic themes as the highest priorities for focused action by the Company. These were: System Improvement and Enhancements (includes renewable energy), Developing а Culture of Customer Care, Implementation of the Human Resource Strategic Plan. Optimisation and Management, Development of an Enterprise-wide Risk Management System (includes regulatory reform), Environmental Stewardship. The Company's efforts in these areas were led by various cross functional teams who engaged additional expertise as required to drive the initiatives linked to these themes.

In response to the pandemic, and the Company's COVID-19 Short to Medium Term Action Plan developed in 2020, much of the work associated with these initiatives was deferred as a result of a combination of cost management imperatives and the unavailability of external resources due to travel restrictions and supply chain disruptions. Some of the initiatives in progress, and which were foundational to the Company's continued success in the future, were incorporated into the new Strategic Business Plan. The updates summarised below, report on the progress of strategic initiatives in what was considered the final year of the previous Strategic Business Plan.

System Improvements and Enhancements

(including renewable energy)

The progress made on the strategic initiatives in this area was due to the solid foundation built over the years that has allowed us to quickly recover in the face of adversity.

The Company continued to develop the project plans for the introduction of a 7.5 megawatt (MW)/3 MWh utility scale battery storage system in Vieux Fort as well as a 10 MW solar PV with battery storage system on the east coast. In November, the project to replace the aging 66 kilovolt (kV) switchgear in the Castries Substation commenced.

In 2022 the 2nd phase of the first utility scale battery storage system will commence and will serve to further reduce fossil fuel usage in the generation of electricity. Unfortunately, supply chain challenges will push the start of commercial operation into 2023. Similarly, the project to replace the Castries Substation 66 kV switchgear will make substantial progress during 2022, but will be commissioned in 2023. The fibre network that will form the backbone for a smart grid will go through punch list repairs and final checks before it is handed over to LUCELEC in the first quarter of 2022.

Customer Care

Throughout 2021, the direct and indirect impacts of the COVID-19 pandemic continued to test the resilience of the Company's operations and systems. The Customer Service Department kept a sharp focus on ensuring business continuity, boosting staff morale and enhancing customer satisfaction, by building on the foundations established at the onset of the pandemic in 2020.

During the first half of 2021, walk-in services were available only at the Rodney Bay office, with the Southern office coming on stream in late June 2021, albeit at a new location on the Vieux Fort/Laborie highway. The Sans Souci Office remained unavailable for the year whilst remedial work was ongoing to fully resolve air quality concerns. Over time, the team reviewed and adjusted previously streamlined walk-in services, as well as remote service delivery systems developed in 2020, in an effort to remain flexible and responsive to customers' needs. All this was achieved against the backdrop of lower than usual electricity sales, high accounts receivables and manpower constraints arising from COVID-19 related absences.

The dedicated efforts of teams across the Company resulted in a performance improvement in both customer satisfaction surveys conducted during the year. The mid-year Exit Survey, which measures the level of customer satisfaction with walk-in and remote service delivery, resulted in a satisfaction rating of 88.7%. The annual Customer Satisfaction Survey, which focuses on the Company's overall service offerings, yielded a score of 89.8%.

A number of initiatives in the 2035 Strategic Business Plan to improve service efficiency and customer satisfaction started in 2021. These included the commencement of an omni-channel customer service support software system (Zoho Desk) which will facilitate the management of customer conversations across multiple channels such as email, chat, phone, social media, and the Company's website. In addition, Zoho Desk will automate repetitive manual tasks, and manage complex cross-functional service processes to improve efficiency and promote accountability.

Initial preparations for the upgrade of the Cayenta Utilities (CU) Customer Information System commenced in 2021 and will be completed in 2022. The availability of a technologically advanced version will provide the foundation for the roll out of other energy services and customer solutions in the future. Customers can look forward to doing more business online whilst saving time and money.

Going forward, the Company will continue to engage customers actively to properly assess their needs and expectations and implement the requisite initiatives to address them.

Enterprise Risk Management

In 2020 Management implemented GOAT Risk Solutions as its Governance, Risk and Compliance (GRC) software for recording, assessing and managing identified risks to its operations. Prior to this implementation, the Company maintained its risk register in Excel but as a natural progression along its risk maturity journey it became necessary to introduce GRC software that would automate the flow of risk information and improve the Company's visibility of risks to its operations.

To facilitate the next phase of its risk maturity journey, Management has secured additional resources to drive a new initiative designed to embed risk management in the Company's operations and decision-making. The new risk management initiative will seek to delegate the ownership and management of risks within departments, introduce the use of Key Risk Indicators (KRIs) for monitoring risks, drive accountability for measurable outcomes through regular risk update reviews, ensure that the Enterprise

Risk Management Framework is fit for purpose, provide support for presentations to the Audit Risk and Compliance Committee, if required, and facilitate the preparation of Company risk appetite statements.

Human Resources (HR) Strategic Plan

Disruptions to the normal work arrangements continued in 2021. Using the foundation set and lessons learnt in 2020 as a platform, LUCELEC seamlessly continued and enhanced hybrid work approaches. Managers and supervisors utilized various strategies and virtual spaces to ensure their teams remained focused, engaged and productive. Regular town hall and department meetings to communicate Company and departmental plans, staff wellness and engagement activities, formal coaching and feedback sessions, mostly done virtually, contributed to fostering collaborative relationships and ensure alignment of goals and effective leadership. These approaches paid off as the Company realized a better than target Employee Engagement Score of 81%.

The Human Resources Department (HRD) utilizes the feedback obtained from the Annual Engagement Survey to design an Engagement Plan geared towards addressing staff concerns, and intends to work even more closely with Department Heads to improve communication and employee recognition in 2022.

The Human Resources Department remains dedicated to fulfilling its unique contribution to the achievement of LUCELEC's strategic objectives by defining, measuring, tracking, creating and sustaining critical capabilities at all levels throughout the Company. In this vein, the Department is excited to lead the organizational redesign, performance management system strengthening, lessons learned and role-based competency profile initiatives in 2022 that are foundational to the achievement of the Company's 2035 Strategic Business Plan. These initiatives will be implemented simultaneously with new learning and development opportunities that seek to provide employees with the skills, knowledge, abilities and attitudes that meet the Company's current and future needs.

Operational Performance

Having established the foundational protocols and processes for working through a pandemic in 2020, LUCELEC achieved its best reliability performance ever (4.66 hours) as measured by System Average Interruption Duration Index (SAIDI) - the average total hours in a year that a customer lost power for. This

performance, adjusted by the IEEE 2.5 Beta Method for major events, represents a 26% improvement over the prior year. System Average Interruption Frequency Index (SAIFI) performance - the average total number of interruptions in a year that a customer experiences - improved to 5.66, another record low (for both SAIDI and SAIFI the lower the number, the better). The Technical Division's determination to find and deal with the root cause of some issues faced in the first quarter of 2021, resulted in our SAIFI performance gradually improving from below threshold, to exceeding our stretch target by year end.

The Technical Division performed very well on all other technical performance metrics taking into consideration challenges associated with Hurricane Elsa and two system shutdowns in quick succession on the same night.

Generation Department

The Generation Department prides itself on being the heartbeat of LUCELEC, as the electricity supplied to our consumers, starts at the Power Station. Despite an increase in sales of 4.9% over 2020, the demand was met with an improvement in fuel efficiency (4.31 kWh per litre) and an Average Plant Availability of

87%, slightly lower than last year which was a result of higher running hours in 2021. In addition, forced outages of generators had a minimal impact on customers, contributing only 0.26 hours to overall SAIDI performance.

The department demonstrated its solid foundation and resiliency in completing its planned maintenance programme for the year, despite having to take measures to keep COVID-19 at bay. An overhaul was completed on G8 and an overhaul was 80% completed on G9 at year end. A long outstanding operational issue on G8, which prevented it from automatically adjusting its load as the demand changed, was resolved and will help with system stability and reliability. Supply chain issues, as a result of COVID 19, significantly impacted the department's capital work programme.

The Garage and Laboratory both completed their scheduled work programmes, ensuring a high availability of the Company's fleet of vehicles, and that the testing of water, oil and fuel samples were done as required, to ensure the healthy operations of plant.

Three overhauls are planned for 2022 on G7, G6 and G3 along with the replacement of auxiliary equipment which was not completed in 2021 because of supply chain issues. Maintenance audits are also planned for the entire generating plant and in particular Station A, which houses our three oldest engines. This is to ensure the most optimal refurbishing plan to

keep these engines going until 2026 when the next phase of generation expansion is likely to come on stream, and to further enhance our maintenance practices.

Transmission and Distribution (T&D) Department

2021 was another challenging year for the T&D Department, due mainly to higher than normal levels of absenteeism as a result of the COVID-19 pandemic, the need to adjust the annual work programme, and dealing with the effects of Hurricane Elsa.

Despite these challenges, because of the strong foundation the department has established in its maintenance planning and disaster restoration efforts, it contributed significantly to the Company's best reliability statistics on record.

Customer requested relocations, new connections and line extensions for new supplies (suspense jobs) were well executed with the vast majority being completed within the stipulated timelines. Street lights, on the other hand, took a battering from Hurricane Elsa and because of supply chain issues, street light repairs and replacements were not to the normal standards of efficiency LUCELEC is known for. The Company expects the situation with street lighting to normalize by May of 2022.

In 2022, one of the main items of focus will be coming up with measures to enhance grid resiliency in support of the 2035 Strategic Business Plan. Along with this, and in collaboration with the System Control department, the T&D department will seek to increase the intelligence in our grid to more quickly identify faults and avoid 11 kV fuses from blowing for transient faults, such as lightning.

System Control

A rebound in electricity usage was evident in every quarter of 2021 other than Q1, with an average monthly increase in system demand of 11% as compared to the average 12.6% monthly reduction in system demand between April 2020 and December 2020.

With primary responsibility for the oversight of LUCELEC operations, System Control actively worked towards ensuring the safe, efficient and reliable provision of electricity as noted earlier in terms of performance against targets. It must be noted that there were three reportable major event days, all in Q3 of 2021, associated with the passage of Hurricane Elsa and consecutive total system shutdowns.

In an improvement over 2020 when the GIS Section had to forgo the majority of its planned data verification and pole labelling work, the Section was able to complete 90% of its 2021 data verification and capture work programme. In similar fashion, the Protection and Control Section continued work to upgrade the protection and control system by replacing 19 relays, installing two new auto-reclosers at Anse Ger and Vieux Fort Highway and replacing five out of six meters used for power and energy measurements. These improvements all contribute to reducing faults, faster fault finding and clearance, better power quality and improved reliability.

In 2022, the department will continue to undertake upgrades of the protection and control system including the installation of four additional auto-reclosers and relay upgrades at Vieux Fort and Union Substations. In addition, the department will Fault Circuit Indicators deploy improvements to the co-ordination of protective devices. All of this will facilitate faster fault clearance times and improved fault identification and isolation in order to improve the quality of electricity supply.

Recognizing the importance of having an accurate record of LUCELEC's assets for decision making and planning, the GIS Section will focus on increasing collaboration with operating departments through staff sensitization, training, decentralized GIS data capture, and updating workflows in an effort to increase the currency and accuracy of GIS data.

Facilities Construction and Management (FC&M) Section

The FC&M Section had an extremely productive year, despite having to manage projects in a way to minimize the effect of COVID-19.

The oversaw the Section installation commissioning of a new 200,000-gallon water tank, an improved water supply from WASCO, and refurbishment of the offices of the Generation management and administrative staff, all at the Cul-de-Sac facility.

The Section also oversaw the establishment of a temporary Customer Service Office in the Martha's Tyre Building along the Vieux Fort-Laborie highway in the South, to allow for the demolition of the existing office in Beanfield and the construction of a more modern building. It also supervised a significant amount of work at the Company's Sans Souci offices to upgrade the entire ventilation and air conditioning systems to deal with ongoing challenges with air quality. Some additional testing has been done, the results of which will determine the way forward.

For 2022, the Section expects to completely refurbish the T&D Building in the South, including upgrading the AC system in Q1, replace the ventilation system and refurbish the washrooms for the basement of Station B before mid-year, redesign offices to accommodate more staff, and establish better facilities at the various depots for the security guards, and install a new potable water and fire distribution system at Cul-de-Sac to bring an end to having to find and repair water leaks on the aged infrastructure.

Aspects of the drainage system at Cul-de-Sac most vulnerable to failure during heavy rainfall will also be addressed in 2022.

Industrial Relations

Collective Bargaining Negotiations with the CSA and the NWU remained outstanding at the end of 2021 due to the escalation of matters by both Unions to the Labour Department for intervention. In the case of the NWU, the matters are currently being discussed with the Labour Minister for resolution.

On September 30, 2021, the Labour Department met with LUCELEC and the CSA to discuss the CSA's disputes. Having received the Labour Department's recommendations in January 2022, the Company awaits the CSA's feedback on whether it intends on resubmitting to the Labour Tribunal, the matters related to the Grade Structure for a decision.

Bearing in mind that the matters escalated by the Unions all have financial implications for the Company, it is important that they are resolved as LUCELEC needs to accurately determine its payroll costs going into negotiations, as well as the sustainability of future salary increases given the prevailing economic conditions. Therefore, the Company is hopeful that these matters are resolved by the end of March 2022 to allow for the commencement of negotiations with the Unions.

Financial Operations

The following is an analysis of the consolidated results of St. Lucia Electricity Services Limited (the Company) and its subsidiaries - Energyze Holdings Inc. and LUCELEC Cap-Ins. Inc.

Sales & Revenues

The Company experienced an increase in sales of 4.9% compared to an 8.8% reduction in 2020. Sales increased in the Hotel (28.8%), Industrial (5.5%) and Domestic (0.7%) sectors, but decreased in the Commercial (0.2%) and Street Lighting (1.0%) sectors. This performance is primarily due to the reopening of the majority of hotels which had closed down in the prior year as a result of the pandemic.

Total revenue of EC\$294.8M was higher than 2020's EC\$260.2M by EC\$34.6M (13.3%) due to increases in unit sales (EC\$16.2M or 4.9%), the average price of electricity (EC\$12.6M), unbilled sales provision (EC\$4.7M) and sundry revenue (EC\$1.1M).

Operating Costs

Generation costs of EC\$25.2M (excluding fuel costs) were higher than the previous year's costs of EC\$25.0M by EC\$0.2M (0.8%) mainly as a result of increases in solar farm maintenance costs incurred of EC\$0.1M, payroll costs of EC\$0.3M, and building maintenance of EC\$0.3M, despite a decrease in depreciation of FC\$0.5M

Transmission and Distribution costs of EC\$32.7M increased by EC\$3.6M (12.4%) compared to the prior year's EC\$29.1M due to increases in depreciation of EC\$0.4M, payroll costs of EC\$1.4M, software maintenance of EC\$0.2M and T&D maintenance of EC\$1.8M, despite a decrease in building maintenance costs of EC\$0.2M.

Administrative expenditure of EC\$34.3M decreased by EC\$0.4M (1.2%) from the prior year's EC\$34.7M. This was due to increases in payroll cost (EC\$0.8M), insurance costs (EC\$0.9M), bank charges (EC\$0.4M), professional fees (EC\$1.0M), and inventory obsolescence (EC\$1.0M). These increases were offset by reductions in depreciation and amortisation costs (EC\$1.5M), debt collection expenses (EC\$0.4M), bad debts provision (EC\$2.3M) and repairs and maintenance costs (EC\$0.3M).

Finance Costs

Finance costs decreased by EC\$0.7M (13.7%) from EC\$5.1M in 2020 to EC\$4.4M in 2021 due to the decrease in the loan balances as the Company continued to repay its debt in accordance with loan agreements. The weighted average interest rate was 4.58% (2020 - 4.56%).

Profit

The Group achieved a Profit before Tax of EC\$57.0M, which was higher than the previous year's result of EC\$50.4M by 13.1%.

The Group's Profit after Tax of EC\$40.5M increased by 10.7% compared to the previous year's achievement of EC\$36.6M.

Earnings per share for the year for the Group was EC\$1.77 (2020 - EC\$1.60), an increase of 10.6% compared to the prior year.

The Group achieved a Return on Equity of 10.8% (2020) - 10.9%). The deterioration in this ratio is as a result of the increase in the retained earnings (\$13.7M). However, the Company achieved a Return on Contributed Capital (Rate of Return) of 14.63% as compared to 13.30% in 2020. The Rate of Return achieved is above the allowable range of 10% to 14.33% as stipulated by the existing legislation. As a result, the tariff for 2022 will be reduced for the industrial and hotel sectors.

The Return on Property, Plant and Equipment and Intangible Assets was 10.0% (2020 - 9.0%) and Return on Total Assets was 7.2% (2020 - 6.5%).

Retained Earnings for the Group increased from EC\$180.0M to EC\$193.7M while the Debt to Equity ratio was 17:83 (2020 - 21:79).

Capital Expenditure

Total expenditure for the year amounted to EC\$20.7M (2020 - EC\$26.2M), which was primarily due to upgrades to the transmission and distribution building network, and construction, station improvements and engine overhauls.

Working Capital Management

The Company's Days Sales Outstanding (DSO) of 62 days remained the same from the prior year. The DSO for the hotel sector improved while that of the commercial. industrial and domestic sectors deteriorated. Total trade receivables increased from EC\$48.1M at the end of 2020 to EC\$49.7M at the end of 2021.

Capital Financing

The Company continued to operate under debt covenants stipulated in Security Sharing Agreements (SSA) with its lenders which, among other provisions, set the maximum level of debt that the Company is allowed to undertake.

Credit Rating

CariCRIS, the Caribbean credit rating agency conducted a credit rating exercise at the end of 2021. The Company achieved a credit rating of CariBBB- (Adequate).

Risk Management

The Company maintains a Risk Register which, on a continuous basis captures all identified risks to the

Company and progress on mitigation measures. This register is reviewed by the Audit Risk and Compliance Committee of the Board of Directors at its regular meetings during the year.

Fuel Hedging

During the year, the Company utilised Fixed Price Swaps to hedge against fluctuations in the price of diesel fuel used for generating electricity. On December 31, 2021, swap contracts existed for the hedging of 35% of the fuel to be purchased in the first half of 2022.

Shareholders' Equity

The Company's shares closed at EC\$20 (2020 -EC\$20) resulting in a price earnings (P/E) ratio of 11.3 times (2020 - 12.5 times). The Company has issued share capital of 22,920,000 ordinary shares.

Energyze Holdings Inc.

In 2017 St. Lucia Electricity Services Limited purchased 100% shares in Energyze Holdings Inc., a company incorporated in January 2016. There have been no material transactions undertaken by the company since its incorporation.

LUCELEC Cap-Ins. Inc.

LUCELEC Cap-Ins. Inc., a wholly owned subsidiary of Electricity Services Limited, Lucia incorporated on December 29, 2014 as a vehicle for managing the self-insurance of the Company's transmission and distribution assets. At December 31, 2021 LUCELEC Cap-Ins Inc. had net assets of

EC\$49.3M (2020 - EC\$46.4M). The fund's investment portfolio comprised commercial paper, regional investment grade securities and foreign equities. The decline of the market value of the regional income funds held surpassed the increase in the market value of the foreign equities held at year end, giving rise to a decrease in profit before tax compared to the prior year.

Outlook

Increasing unit sales, decreasing bad debt provision and increasing cost to maintain safety and reliability of the transmission and distribution network, are being anticipated. With the gradual recovery of the local economy, unit sales are expected to return to pre COVID-19 levels in 2022 as visitor arrivals increase.

The following broad strategic objectives have been identified as priorities in 2022:

- Achieve the minimum allowable rate of return of 10%; however, management projects a rate of 11.7%.
- Manage cash flow
- Optimize operating costs and capital expenditure
- Risk management
- Maintain a safe and reliable service
- Preserving LUCELEC as a viable business entity.

Conclusion

Despite the pandemic the Group's overall performance was above target. Its future performance is dependent on the successful execution of its strategy which is focussed on maintaining an acceptable level of reliability, power quality, safety and customer care despite the anticipated economic fallout caused by the global pandemic in 2022, while seeking to contribute to growth of the local economy, and profitably enter adjacent business opportunities in the next few years.

LUCELEC's engagement with the society and the environment in which we do business is critical to our ability to operate effectively. In ensuring we do so in a socially responsible way we are guided by the ISO 26000 Guidance on Social Responsibility. It addresses seven core subjects - organizational governance, respect for human rights, labour practices, care for the environment, consumer issues, fair operating community involvement practices. and development. We consider these in the execution of our Corporate Social Responsibility (CSR) policy.

We continue to contribute to every aspect of Saint Lucian life, such that through our operations, services and various philanthropic and sponsorship initiatives, we engage communities and help them thrive socially and economically by our support for business, sports, arts, culture, health care, charitable institutions, faith-based and non-profit organisations.

In this section of the Annual Report, our focus is on the practical initiatives that drove our Power of Caring brand in 2021.

Governance

LUCELEC's business model was set and built on moral, ethical and sound business principles. These are guided by our core values of Accountability, Caring, Ethics and Excellence and our value proposition of timeliness in the delivery of services, reliability and safety of supply, high quality of power and value for money. These are the foundations of our culture and are part and parcel of and guide our day to day operations.

When the pandemic struck, our response was not of panic, but simply, an adjustment to planned operations. The principles we hold dear crafted the plan to remain financially sound in order to support the financially struggling customer base, an adversely impacted economy and a country that needed to be assured of a safe and reliable supply of electricity to ensure its recovery efforts.

2021 was a challenging but successful year due to our dedicated staff who live and breathe our foundational principles. Not only did we successfully deliver the service we were incorporated to provide, we also gave tangible support to quarantine centres and the purchase of critical and expensive respiratory and testing equipment while maintaining shareholder value.

It is said, "the tone is set at the top". In the midst of the chaos of the COVID-19 pandemic, the Board of LUCELEC lived that credo, maintaining a steady hand in good corporate governance within the Company. Board and Committee Meetings and the Annual Meeting of Shareholders returned to their scheduled time during the year and with that, timely decision-making and implementation of strategic projects and initiatives.

In addition to maintaining regular operations and ensuring the viability of the Company, the Board and Management, in customary visionary mode, recognised that the uncertainties resulting from the pandemic also presented opportunities. One of those was the 2035 Strategic Business Plan that was approved by the Board at its December 2021 meeting. The new Strategic Plan will ensure the Company continues to expand the foundation needed to thrive, especially in a post COVID-19 world with moves that will increase shareholder value, provide Saint Lucia with a continued safe and reliable supply of electricity and utilize new and innovative technologies, including the use of renewable energy in the provision of our essential service.

Environmental Responsibility

LUCELEC continues to use new and existing technologies to ensure it operates its business with little impact on the environment. That includes the use of renewable energy to produce some of the electricity we provide to our customers. The 3MW solar farm in La Tourney, Vieux-Fort remains our foundational renewable energy investment.

The 6.26 MWhs of electricity produced by the solar farm in 2021 reduced fuel consumption by 319.8 thousand imperial gallons for the year and led to a fuel costs savings of EC\$2.32M. To date the solar farm

has produced 24.7 MWhs of electricity since it went live in 2018 leading to a 1.27 million-imperial gallon reduction in fuel purchased since then and a cost savings of EC\$9.1M.

The Company also continued its pilot project of grid-tied solar photovoltaic (PV) systems. At the end of 2021 there were 174 distributed generation (roof top solar PV) systems connected to the LUCELEC grid providing 1.49 MW of renewable energy capacity.

Corporate Philanthropy

While we continued to provide the Government and subsidiaries with COVID-19 support this year - our long-established corporate philanthropy model of support for partners and programmes returned, albeit with some changes to the "business as usual" requests. We continued to support the GOSL Quarantine centres and made a second donation of over \$160,000 to the Ezra Long Laboratory at the Owen King EU Hospital for test kits and consumables that enabled the country to better manage its 5th wave of COVID-19 infections. In addition, nearly \$76,000 to the St Jude Hospital covered the cost of the electricity infrastructure needed to power its Oxygen Generating Plant - the first in the country that will lay the foundation to provide local life-saving oxygen to COVID-19 patients and others with respiratory conditions. Similarly, we assisted the St. Lucia Diabetes and Hypertension Association to purchase a vital signs monitor to service its expanding pool of clients.

We also extended support to the Ministry of Health towards the purchase of small kitchen appliances for use by medical staff at the Victoria Respiratory Hospital and baskets for nurses in recognition of Nurses week. In that same vein, we assisted the Millennium Heights Complex with a spectacular Christmas lights display at the OKEU that brought tremendous cheer to both staff and patients thoroughly fatigued from the extended battle with COVID-19.

The move to virtual learning continued to challenge our educational institutions even as schools made the slow, on-again-off-again return to the classrooms. At the Desruisseaux Combined School we laid the foundation for e-learning with the purchase of laptops for blended and online learning and provided fans for the Marchand Combined School, an

industrial printer for the Beane Field Comprehensive School and shelves for school supplies at the Roseau Combined School. This, as we continued our support for school graduation and recognition ceremonies, and the Caribbean Science Foundation (CSF) SPISE programme for talented young science students, including broadening our support of the CSF to include a regional coding workshop to build skills in computer coding and app development. We also assisted the OECS Commission with sponsorship of an intervention that enabled 20 participants to attend a virtual entrepreneurship training course.

We worked with sports clubs to facilitate the purchase of shirts, shoes and equipment for sports training and funded travel to competitions as well as contributed to the laying of a new rubberized court at the Post-Secondary School in Vieux Fort in collaboration with the St. Lucia Volleyball Association.

In the Arts, it was in the telling of our history that we made the most impact - funding the production of a book on the development of calypso in Saint Lucia produced by the Folk Research Centre and another on a History of Dance, both of which explored the early foundations of these artforms in Saint Lucia.

Our charitable support continued with assistance to the National Council of and for Persons with Disabilities for the establishment of an aquaponics facility by funding a renewable energy system that will power the facility. We fed hundreds, working with the Castries South Constituency Council in its feeding programme for 500 needy residents in addition to other food drives, and continued our usual support to the Feed the Poor Ministry, National Community Foundation (NCF) and the SSDF's Our Boys Matter programme that provide psychosocial. economic and educational support to secondary school boys at risk.

As much as the Company demonstrates its corporate social responsibility ideals, it is the work of our team members who do so through their own efforts that is particularly noble and gratifying. This year, we assisted the LUCELEC Club with its Operation School Box initiative that funded the purchase of 42 tablets to students in four schools, and our Generation Department to augment funds that they raised among themselves to support the sewing programme at the Lady Gordon Opportunity Centre. It is such expressions of our Power of Caring that speak volumes about the foundational values that we share with and instil in our people.

Conclusion

LUCELEC's corporate social responsibility thrust for 2021 continued to be driven by our deep commitment to helping our customers, our communities and country navigate the disruptions to their lives and livelihoods through the extended impact of the pandemic. Our Power of Caring is the foundation upon which we continue to serve, powering homes and business, empowering lives with opportunities that may not have been available otherwise.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of St. Lucia Electricity Services Limited

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the accompanying consolidated financial statements of St. Lucia Electricity Services Limited and its Subsidiaries ("the Group"), which comprise the consolidated statement of financial position as at December 31, 2021, and the consolidated statements of changes in equity, comprehensive income and cashflow for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the St. Lucia Electricity Services Limited and its subsidiaries (the Group) as at December 31, 2021, and the results of its operations for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in St. Lucia and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

BDO Eastern Caribbean, a network of firms registered in Anguilla, Antigua and Barbuda, St. Lucia and St. Vincent and the Grenadines, is a member of BDO International Limited, a UK Group Limited by guarantee, and forms part of the international BDO network of independent member firms.

Energy Sales

Revenue from energy sales is based on meter readings which are carried out on a rotational basis throughout each month. A provision for the current month's billing, excluding the fuel surcharge, is made to record unbilled energy sales at the end of each month. The estimate is based on the actual information for the preceding month and is periodically assessed for reasonableness. We consider energy sales to be a key audit matter because, in addition to the judgement involved in determining the unbilled energy sales, revenue recognised depends on (a) the complete capture of energy consumption based on meter readings on various dates, (b) the propriety of the rates computed and applied across customer categories and (c) the reliability of the IT systems involved in processing the billing transactions.

Note 4(I) to the consolidated financial statements provides the detailed disclosures related to this matter.

Audit response

We obtained an understanding and evaluated the design of, as well as tested the controls over, the customer file maintenance, accumulation and processing of meter data, and interface of data from the billing system to the financial reporting system. In addition, we performed a test recalculation of the billed amounts and compared them with the amounts reflected in the billing statements. We involved our internal Information Technology (IT) specialist in understanding the IT processes and in understanding and testing the IT general controls over the IT systems supporting the revenue process.

Impairment of Trade and Other Receivables

On July 24, 2014 the International Accounting Standards Board issued the final version of IFRS 9 Financial *Instruments* to replace IAS 39. IFRS 9 became effective for periods beginning on or after January 1, 2018. The Group adopted the standard on January 1, 2018. The standard requires the use of forward-looking information in arriving at the expected credit loss (ECL) for financial assets.

The Group applied the practical expedient allowed under IFRS 9 in determining the provision for impairment of trade receivables. This took the form of a provision matrix based on account categories of trade receivables except for accounts relating to related parties and other receivables and incorporated forward-looking information in arriving at a loss rate. For related parties and other receivables, the ECL was determined based on probability-weighted default outcomes, past events, current conditions and forward-looking information.

We considered the impairment provision for trade and other receivables to be a key audit matter as the assessment of the correlation between historical observed default rates, the selection of the forecast economic conditions and the expected credit loss are significant estimates which require judgement. The amount of ECL is sensitive to the changes in circumstances and the forecast economic conditions and can have a significant impact on the estimate of the provision for impairment of trade receivables.

Notes 11 and 36 to the consolidated financial statements provide the detailed disclosures related to this matter.

Audit response

We gained an understanding of management's process for determining the impairment provision for financial assets. In addition, we performed the following:

- a. Reviewed the IFRS 9 methodology document developed by management for providing guidance in determining the ECL.
- b. Gained an understanding of the assumptions underlying the model.
- c. Validated the underlying economic data applied in developing the forward-looking information.
- d. Tested the completeness and accuracy of the data inputs used in the model to the underlying accounting records.
- e. Checked the calculation of the resulting loss rate.

Provisions and contingencies

The Group is involved in certain proceedings and claims for which the Group has recognized provisions for probable costs and/or expenses, which may be incurred, and/or has disclosed relevant information about such contingencies. This matter is significant to our audit because the determination of whether any provision should be recognized and the estimation of the potential liability resulting from these assessments require significant judgment by management. The inherent uncertainty over the outcome of these matters is brought about by the differences in the interpretation and implementation of the relevant laws and regulations.

Note 38 to the consolidated financial statements provides the relevant disclosures related to this matter.

Audit response

We examined the bases of management's assessment of the possible outcomes and the related estimates of the probable costs and/or expenses that are recognized and/or disclosed in the Group's consolidated financial statements. We discussed with management the status of the claims and/or assessments and obtained correspondences with the relevant authorities and opinions from the legal counsels. We also reviewed the disclosures on provisions and contingencies in the Group's consolidated financial statements.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Other Information Included in the Group's 2021 Annual Report

Other information consists of the information included in the Group's 2021 Annual Report other than the consolidated financial statements and our auditor's report thereon. Management is responsible for the other information. The Group's 2021 Annual Report is expected to be made available to us after the date of this auditor's report. Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. When we read the 2021 Annual Report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charges with governance.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and where applicable, related safeguards.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements (Cont'd)

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner responsible for the audit resulting in this independent auditor's report is Andrea St.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

1. Incorporation and Principal Activity

St. Lucia Electricity Services Limited (the "Company") was incorporated under the laws of Saint Lucia on November 9, 1964 and re-registered as a public company on August 11, 1994. The Company was continued under the Companies Act 1996 of Saint Lucia on October 22, 1997 and is listed on the Eastern Caribbean Securities Exchange. The Company operates under the Electricity Supply Act, 1994 (as amended) (ESA), and its operations are regulated by the National Utilities Regulatory Commission. The Company has an exclusive licence, save for the generation of electricity from renewable resources of energy, for the exercise and performance of functions relating to the generation, transmission, distribution and sale of electricity in Saint Lucia. The other principal activity of the Company and its subsidiaries (the "Group") include the operation of a self-insurance fund.

The ESA defines the rates of electricity and the mechanism for rate adjustments. The rates of electricity consist of a Base Rate and a Fuel Rate. The Fuel Rate is calculated in a manner which reflects fluctuations in actual fuel costs including charges associated with derivative financial instruments employed by the Company.

The Group's registered office and principal place of business is situated at LUCELEC Building, Sans Souci, John Compton Highway, Castries, Saint Lucia.

2. Date of Authorisation of Issue

These consolidated financial statements were authorised for issue by the Board of Directors on March 11, 2022

3. **Basis of Preparation**

(a) Statement of compliance

> The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

(b) Basis of measurement

> The consolidated financial statements have been prepared using the historical cost basis except for land, derivative financial instruments and other financial assets which are measured at fair value. The methods used to measure fair values are discussed further in Note 5.

(c) Basis of consolidation

> The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company as disclosed in Note 39. Control is achieved when the Company:

- Has power over the investee:
- Is exposed, or has rights, to variable returns from its involvement with the investee; and
- Has the ability to use its power to affect its return.

The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of financial position and consolidated statement of comprehensive income from the date the Company gains control until the date the Company ceases to control the subsidiary.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

3. Basis of Preparation (Cont'd)

Basis of consolidation (Cont'd)

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Company's accounting policies.

All intracompany assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Company are eliminated on consolidation.

- (d) Functional and presentation currency These consolidated financial statements are presented in Eastern Caribbean dollars, which is the Group's functional currency. All financial information is rounded to the nearest thousand dollars.
- Use of estimates and judgments (e) The preparation of consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the consolidated financial statements is included in the following notes:

Note 4(b)(iii): Estimated useful lives of property, plant and equipment

Note 4(c): Estimation of the lease term and assessment of whether a right-of-use

asset is impaired

Estimated useful lives of intangible assets Note 4(d)(iii): Measurement of defined benefit obligations Note 4(e):

Note 4(g): Estimation of impairment

Note 4(h) Estimation of net realisable value of inventories Note 4(m): Estimation of unbilled sales and fuel surcharge

Determination of fair values Note 5: Valuation of financial instruments Note 36:

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

Significant Accounting Policies 4.

The accounting policies set out below have been applied consistently to all years presented in these consolidated financial statements, except where stated otherwise.

Foreign currency

Transactions in foreign currencies are translated to the Group's functional currency at the foreign exchange rates at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency at the foreign exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortised cost in foreign currency translated at the exchange rate at the end of the period. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined.

(b) Property, plant and equipment

(i) Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses, if any, except for land which is measured at fair value.

Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the asset to a working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as consolidated items (major components) of property, plant and equipment.

The gain or loss on the disposal of an item of property, plant and equipment is determined by comparing the proceeds from disposal with the carrying amount of the item and is recognised within "other gains, net" in the consolidated statement of comprehensive income.

(ii) Subsequent expenditure

The cost of replacing part of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of property, plant and equipment are recognised in the consolidated statement of comprehensive income as incurred.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

4. Significant Accounting Policies (Cont'd)

Property, plant and equipment (Cont'd) (b)

Depreciation (iii)

Depreciation is recognised in the consolidated statement of comprehensive income on a straight-line basis over the estimated useful lives of each item of property, plant and equipment. Land is not depreciated. No depreciation is provided on work-in-progress until the assets involved have been completed and are available for use.

Depreciation methods, useful lives and residual values are reviewed at each reporting date.

The annual rates of depreciation are as follows:

	2021	2020
Buildings	$2^{1}/_{2}\%$ - $12^{1}/_{2}\%$ per annum	$2^{1}/_{2}\%$ -12 ¹ / ₂ % per annum
Plant and machinery		
 Generator overhauls 	33¹/₃% per annum	33¹/₃% per annum
- Other	4% - 10% per annum	4% - 10% per annum
Motor vehicles	20% - 33¹/₃% per annum	20% - 33 ¹ / ₃ % per annum
Furniture and fittings		
 Computer hardware 	20% per annum	20% per annum
- Other	10% per annum	10% per annum

(iv) Revaluation reserve

Revaluation related to land is credited to revaluation reserve account in the equity section of the consolidated statement of financial position (Note 16).

(c) Leases

The Group as a lessee

The Group considers whether a contract is, or contains, a lease, at inception of the contract. A lease is defined as 'a contract, or part of a contract, that conveys the right to use an asset (the underlying asset) for a period of time in exchange for consideration'.

At the lease commencement date, the Group recognises a right-of-use asset and a lease liability on the consolidated statement of financial position.

Right-of-use assets

The right-of-use asset is measured at cost, which is made up of the initial measurement of the lease liability, any initial direct costs incurred by the Group, an estimate of any costs to dismantle and remove the asset at the end of the lease, and any lease payments made in advance of the lease commencement date (net of any incentives received).

The Group depreciates the right-of-use assets on a straight-line basis from the lease commencement date to the earlier of the end of the useful life of the right-to-use asset or the end of the lease term. The Group also assesses the right-of-use asset for impairment when such indicators exist.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

4. Significant Accounting Policies (Cont'd)

(c) Leases (Cont'd)

Lease liabilities

At the commencement date, the Group measures the lease liability at the present value of the lease payments unpaid at that date, discounted using the interest rate implicit in the lease if that rate is readily available, or the Group's incremental borrowing rate.

Subsequent to initial measurement, the carrying amount of the lease liability is increased to reflect the interest on the lease (calculated using the effective interest method) and is reduced to reflect the lease payments made.

The Group re-measures the lease liability to reflect any modification or reassessment of the lease contract, such as a change in the lease term or change in the assessment of whether a renewal option will be exercised, in which case the lease liability is re-measured by discounting the revised lease payments by a revised discount rate. When the lease liability is re-measured, the corresponding adjustment is reflected in the related right-of-use asset, or profit or loss if the right-of-use asset is already reduced to zero.

The Group has elected to account for short-term leases (defined as leases with a lease term of 12 months or less) using the practical expedients. Instead of recognising a right-of-use asset and lease liability, the payments in relation to these are recognised as an expense in profit or loss on a straight-line basis over the lease term.

The Group as a lessor

As a lessor, the Group classifies all its leases as operating as the leases do not transfer substantially all the risks and rewards incidental to ownership of the underlying asset.

The Group earns income from rental of poles. Rental from these operating leases is recognised on a straight-line basis over the term of the lease.

- (d) Intangible assets
 - Recognition and measurement (i)

Intangible assets that are acquired by the Group and have finite useful lives are measured at cost less accumulated amortisation and accumulated impairment losses, if any.

(ii) Subsequent expenditure

> Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is recognised in profit or loss as incurred.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

4. Significant Accounting Policies (Cont'd)

(d) Intangible assets (Cont'd)

(iii) **Amortisation**

Amortisation is calculated over the cost of the asset less its residual value. Amortisation is recognised in consolidated statement of comprehensive income on a straight-line basis over the estimated useful lives of the intangible assets, other than way leave rights and work-in-progress, from the date that they are available for use, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful lives for the assets that are amortised, that is, information systems, range from five (5) years to eight (8) years.

Amortisation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

(e) Employee benefits

Defined benefit plans (i)

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Group's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value. The fair value of any plan assets is deducted. The discount rate is the yield at the reporting date on government securities that have maturity dates approximating the terms of the Group's obligations and that are denominated in the same currency in which the benefits are expected to be paid. The calculation is performed annually by an actuary using the Projected Unit Credit method. When the calculation results in a benefit to the Group, the recognised asset is limited to the present value of any future refunds from the plan or reductions in future contributions to the plan.

When the benefits of a plan are improved, the portion of the increased benefit relating to past service by employees is recognised in profit or loss on a straight-line basis over the average period until the benefits become vested. To the extent that the benefits vest immediately, the expense is recognised immediately in the consolidated statement of comprehensive income.

The Group recognises actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions in other comprehensive income in the period in which they occur.

(ii) Pension benefits assumptions

The present value of the pension obligations depends on a number of factors that are determined by independent actuaries using a number of assumptions. The assumptions used in determining the net cost (income) for pension include the expected long-term rate of return on the relevant plans assets and the discount rate. Any changes in these assumptions will impact the carrying amount of pension obligations.

The Group determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of the estimated future cash outflows expected to be required to settle the pension obligations and also to determine the expected return on plan assets. In determining the appropriate discount rate, the Group considers the interest rates of the Government bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

4. Significant Accounting Policies (Cont'd)

- (e) Employee benefits (Cont'd)
 - (ii) Pension benefits assumptions (Cont'd)

Other key assumptions for pension obligations are based in part on current market conditions. Additional information is disclosed in Note 23.

(iii) Defined contribution plan

> For its defined contribution plan, the Group pays contributions to a privately administered pension insurance plan on a mandatory basis. The Group has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

(iv) Termination benefits

> Termination benefits are recognised as an expense when the entity is demonstrably committed, without realistic possibility of withdrawal, to a formal detailed plan to either terminate employment before the normal retirement date, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognised as an expense if the entity has made an offer encouraging voluntary redundancy, it is probable that the offer will be accepted. and the number of acceptances can be estimated reliably.

> If benefits are payable more than twelve (12) months after the reporting period, then they are discounted to that present value.

(f) Financial instruments

(i) Non-derivative financial instruments

> Non-derivative financial instruments comprise financial assets measured at fair value through other comprehensive income ("FVTOCI"), financial assets measured at fair value through profit or loss ("FVTPL"), trade and other receivables, cash and cash equivalents, borrowings, trade and other payables and consumer deposits.

> Non-derivative financial instruments are recognised initially at fair value plus, for instruments not at fair value through profit or loss, any directly attributable transaction Subsequent to initial recognition, non-derivative financial instruments are measured as described below.

FVTOCI financial assets

The Group's investments in treasury bills and commercial paper are classified as financial assets measured at FVTOCI. Subsequent to initial recognition, they are measured at fair value. Changes in the carrying amount of these financial assets relating to interest income calculated using the effective interest method, impairment losses and foreign exchange gains and losses are recognised in profit or loss. Other changes are recognised in other comprehensive income and presented within equity in the fair value reserve. When an investment is derecognised, the cumulative gain or loss in other comprehensive income is transferred to profit or loss.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

4. Significant Accounting Policies (Cont'd)

- (f) Financial instruments (Cont'd)
 - Non-derivative financial instruments (Cont'd)

FVTPL financial assets

The Group's investments in mutual and income funds and equity instruments are classified as financial assets measured at FVTPL. Subsequent to initial recognition, they are measured at fair value. Changes in the carrying amount of these mutual and income funds relating to interest income calculated using the effective interest rate, dividends earned from equity instruments, impairment losses, fair value and foreign exchange gains and losses are recognised in profit or loss.

Trade and other receivables

Trade and other receivables are carried initially at fair value and subsequently measured at amortised cost less any impairment. A provision for impairment of trade and other receivables is established based on lifetime expected credit losses. The amount of the provision is recognised in profit or loss.

Trade and other receivables, being short-term, are not discounted.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances and demand deposits with maturities three months or less. Bank overdrafts that are repayable on demand and form an integral part of the Group's cash management are included as a component of cash and cash equivalents for the purpose of the consolidated statement of cash flows.

Accounting for interest income and costs is discussed in Note 4(n).

Borrowings

Borrowings are recognised initially at fair value, being their issue proceeds, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest rate method. Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least twelve (12) months after the reporting date.

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use, are added to the costs of those assets until such time as the assets are substantially ready for their intended use. Investment income earned on the temporary investment of specific borrowings, pending their expenditure on qualifying assets, is deducted from the cost of those assets. All other borrowing costs are recognised in the consolidated statement of comprehensive income in the period in which they are incurred.

Trade and other payables

Liabilities for trade and other payables which are normally settled on 30 to 90-day terms and conditions are carried at cost, which is the fair value of the consideration to be paid in the future for goods and services received whether or not billed to the Group.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

4. Significant Accounting Policies (Cont'd)

- (f) Financial instruments (Cont'd)
 - Non-derivative financial instruments (Cont'd) (i)

Consumer deposits

Given the long-term nature of the consumer relationship in accordance with the provisions of the Electricity Supply Act, 1994 (as amended), consumer deposits are shown in the consolidated statement of financial position as non-current liabilities (that is, not likely to be repaid within twelve months of the reporting date).

Dividends payable

Dividends on ordinary shares are recognised as a liability and deducted from equity when they are approved by the Group's Board of Directors. Dividends for the year that are approved after the reporting date are dealt with as an event after the end of the reporting date.

(ii) Share capital

Ordinary shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares and share options are recognised as a deduction from equity, net of any tax effects.

- *Impairment* (q)
 - (i) Financial assets

In relation to the impairment of financial assets, IFRS requires the use of a forwardlooking expected credit loss ("ECL") approach.

The ECL allowance is based on the credit losses expected to arise over the life of the asset unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss.

The Group's financial assets mainly comprise of trade and other receivables and financial assets measured at FVTOCI and FVTPL. As permitted by IFRS 9, the Group has voluntarily elected to select an accounting policy which recognizes full lifetime expected credit losses for trade receivables.

A practical expedient method, in the form of a provision matrix, was applied for trade receivables based on customer categories, historical credit loss experiences and future economic expectations. The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future. The information about the ECLs on the Group's trade and other receivables is disclosed in Note 36.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

4. Significant Accounting Policies (Cont'd)

- Impairment (Cont'd) (q)
 - (i) Financial assets

For all other receivables that possess varying default occurrences, the ECL was determined based on probability-weighted default outcomes, past events, current conditions and forward-looking information.

For financial assets measured at FVTOCI, an ECL general approach was used based on:

- (a) an unbiased and probability-weighted amount that is determined by evaluating range of possible outcomes;
- the time value of money; and (b)
- reasonable and supportable information that is available without undue cost or (c) effort at the reporting date, about past events, current conditions and forecasts of future economic conditions.

The key elements of the ECL calculations are outlined below:

- (a) Probability of Default: This measures the instances of customer defaults over a period, divided by the number of accounts at the beginning of a period.
- Loss Given Default: This represents amounts never collected or amounts written (b) off once a receivable defaults.
- (c) Exposure at Default: This represents the outstanding amounts collectible at default.

Forward-looking information:

In its ECL models, the Group relied on a range of forward-looking information as economic inputs, such as:

- GDP growth
- Inflation
- Unemployment rates

Given that the investment funds and equity instruments are classified as FVTPL financial assets, no separate impairment assessment is necessary as all changes in fair value are immediately recognized through profit or loss.

Non-financial assets (ii)

The carrying amounts of the Group's non-financial assets, other than inventories, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit").

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

4. Significant Accounting Policies (Cont'd)

Impairment (Cont'd) (g)

(ii) Non-financial assets (Cont'd)

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its estimated recoverable amount. Impairment losses are recognised in profit or loss. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit (group of units) on a pro rata basis.

In respect of other assets, impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(h) Inventories

Inventories are measured at the lower of cost and net realisable value. The cost of inventories is based on the weighted average principle, and includes expenditure incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their existing location and condition. Allowance is made for slow-moving and damaged goods. Goods in transit are stated at their invoice cost.

(i) **Prepayments**

Prepayments represent expenses not yet incurred but are already paid. Prepayments are initially recorded as assets and measured at the amount paid. Subsequently, these are charged to the consolidated statement of comprehensive income as they are consumed in the operations or expire with passage of time.

Prepayments are classified in the consolidated statement of financial position as current asset when it is expected to be collected within one year. Otherwise, prepayments are classified as non-current.

(j) Provision for other liabilities

Provision for other liabilities are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

(k) Derivative financial instruments

The Group holds derivative instruments to manage the volatility of its fuel costs. Further details of derivative financial instruments are disclosed in Note 26.

Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently re-measured to their fair value at the end of each reporting period.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

4. Significant Accounting Policies (Cont'd)

(1)Deferred fuel costs

Management has developed an accounting policy to reflect the economic substance of the effects of engaging in the hedging programme as these costs are passed on to the customer. In developing this policy, management has considered the accounting standards of other standardsetting bodies and accepted industry practice.

Changes in the fair value of the derivative financial instruments held by the Group at the reporting date give rise to the recognition of deferred fuel costs. Deferred fuel costs recoverable represent future revenues and/or receivables associated with the hedging costs incurred that will be, or are expected to be, recovered from customers in future periods through the ratesetting process. Deferred fuel costs payable represents future reductions in revenue associated with amounts that will be or are expected to be refunded to customers through the rate-setting process. The resulting gain or loss is reported in trade and other payables or trade, other receivables and prepayments respectively.

(m) Revenue recognition

Sale of energy

Revenue from energy sales is based on meter readings, which are carried out on a rotational basis throughout each month. A provision for the current month's billings, excluding the fuel surcharge, is made to record unbilled energy sales at the end of each month. This estimate is based upon actual information for the preceding months and is reviewed periodically to assess reasonableness and adjusted where required. The provision for unbilled sales is included in accrued income.

In addition to the normal tariff rates charged for energy sales, a fuel surcharge is calculated which is based on the difference between the cost of fuel used to generate energy sales in the current month and the average fuel price for the 12 months preceding January of the current year. The surcharge is recovered by applying the month's surcharge rate to units billed in the following month. The provision for unbilled fuel surcharge revenue/rebate is included in accrued income.

Consumer contributions

In certain specified circumstances, consumers requiring line extensions for electricity supply are required to contribute the capital cost of the extensions. These contributions are recognised in income in the same period in which the costs are incurred. Contributions in excess of the applicable capital cost of line extensions, where the excess is greater than 5% of the estimated cost of the job, arising mainly as a result of changes to job specifications during the implementation stage, are refundable to the customers upon finalisation of the total cost of the job. The capital costs of consumer line extensions are included in property, plant and equipment.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

4. Significant Accounting Policies (Cont'd)

(n) Expenses

Expenses are recognised in the consolidated statement of comprehensive income when a decrease in future economic benefit related to a decrease in an asset or an increase in a liability has arisen that can be reliably measured. Expenses are recognised: on the basis of a direct association between the costs incurred and the earning of specific items of income; on the basis of systematic and rational allocation procedures when economic benefits are expected to arise over several accounting periods and the association with income can only be broadly or indirectly determined; or immediately when an expenditure produces no future economic benefits or when, and to the extent that, future economic benefits do not qualify, or cease to qualify, for recognition in the consolidated statement of financial position as an asset.

Expenses in the consolidated statement of comprehensive income are presented using the nature of expense method. These are costs incurred that are associated with the energy revenue and costs attributable to administrative and other business activities of the Group.

(0) Investment income and finance costs

Investment income comprises interest and dividends on funds invested and gains on the disposal of other financial assets that are recognised in profit or loss. Interest income is recognised using the effective interest method. Dividends are recognised when the right to receive payment is established.

Finance costs comprise interest expense on lease liabilities, borrowings, consumer deposits and pole rental deposits, losses on disposal of other financial assets and impairment losses recognised certain on financial assets. All borrowing costs are recognised in profit or loss using the effective interest method.

Foreign currency gains and losses are reported on a net basis in "other gains, net" in profit or loss.

(p) Income tax

Income tax expense comprises current and deferred tax. Income tax expense is recognised in profit or loss except to the extent that it relates to items recognised directly in equity, or in other comprehensive income.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised using the statement of financial position method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

4. Significant Accounting Policies (Cont'd)

(p) Income tax (Cont'd)

> Deferred tax is not recognised for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit, and differences relating to investments in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future. In addition, deferred tax is not recognised for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

> A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(q) Earnings per share

> The Group presents basic and diluted Earnings per Share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Group by the weighted average number of ordinary shares outstanding during the year. Diluted EPS is calculated by adjusting the inputs to the basic EPS computation for the effects of all dilutive potential ordinary shares, if any.

- (r) New standards, amendments to standards and interpretations
 - Amendments to standards effective in the 2021 financial year are as follows:

A number of amendments to standards effective for annual periods beginning on or after January 1, 2021 have been adopted in these consolidated financial statements. Note: those amendments effective for annual periods beginning on or after January 1, 2021 which do not affect the Group's consolidated financial statements have not been disclosed below.

IFRS 9, 'Financial Instruments', IAS 39, 'Financial Instruments, Recognition and Measurement', IFRS 7, 'Financial Instruments: Disclosures', IFRS 4, 'Insurance Contracts', and IFRS 16, 'Leases' were amended to introduce a practical expedient for modifications by the Interest Rate Benchmark Reform, clarify that hedge accounting is not discontinued solely because of the IBOR reform, and introduce disclosures that allow users to understand the nature and extent of risks arising from the IBOR reform to which the entity is exposed and how the entity manages those risks.

The application of these amendments did not have a material impact on amounts reported and disclosures in respect to the Group's consolidated financial statements.

IFRS 16, 'Leases' was amended to provide lessees with an exemption from assessing whether a COVID-19-related rent concession is a lease modification. This practical expedient was limited to rent concessions for which any reduction in lease payments affects only payments originally due on or before June 30, 2021.

The application of this amendment did not have a material impact on amounts reported in respect to the Group's consolidated financial statements.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

4. Significant Accounting Policies (Cont'd)

- (r) New standards, amendments to standards and interpretations (Cont'd)
 - Amendments to standards that are issued but not effective and have not been early adopted are as follows:
 - IAS 1, 'Presentation of Financial Statements' and IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors' were amended to help companies determine whether, in the statement of financial position, debt and other liabilities with an uncertain settlement date should be classified as current (due or potentially due to be settled within one year) or non-current. An additional amendment deferred the effective date by one year.

This amendment is applicable for annual periods beginning on or after January 1, 2023. It is not anticipated that the application of this amendment will have a material impact on amounts reported in respect to the Group's consolidated financial statements.

IAS 1, 'Presentation of Financial Statements' was amended to change the requirements with regard to disclosure of accounting policies. The amendments replace all instances of the term "significant accounting policies" with "material accounting policies". Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of generalpurpose financial statements make on the basis of those financial statements. The amendments also clarify that accounting policy information that relates to immaterial transactions, other events or conditions Is immaterial and need not be disclosed.

This amendment is applicable for annual periods beginning on or after January 1, 2023. It is not anticipated that the application of this amendment will have a material impact on amounts reported in respect to the Group's consolidated financial statements.

- IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors' was amended to replace the definition of a change in accounting estimates with a definition of accounting estimates. Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty". The amendments also clarify the following:
 - that a change in accounting estimate that results from new information or new developments is not the correction of an error; and,
 - the effects of a change in an input or a measurement technique used to develop an accounting estimate are changes in accounting estimates if they do not result from the correction of prior period errors.

This amendment is applicable for annual periods beginning on or after January 1, 2023. It is not anticipated that the application of this amendment will have a material impact on amounts reported in respect to the Group's consolidated financial statements.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

4. Significant Accounting Policies (Cont'd)

- (r) New standards, amendments to standards and interpretations (Cont'd)
 - Amendments to standards that are issued but not effective and have not been early (ii) adopted are as follows (Cont'd):
 - IAS 12, 'Income Taxes' was amended to clarify that the initial recognition exemption does not apply to transactions that give rise to equal deductible and taxable temporary differences.

This amendment is applicable for annual periods beginning on or after January1, 2023. It is not anticipated that the application of this amendment will have a material impact on amounts reported in respect to the Group's consolidated financial statements.

IAS 16, 'Property, Plant and Equipment' was amended to prohibit deducting from the cost of an item of PPE any, proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognizes the proceeds from selling such items, and the cost of producing those items in profit or loss.

This amendment is applicable for annual periods beginning on or after January 1, 2022. It is not anticipated that the application of this amendment will have a material impact on amounts reported in respect to the Group's consolidated financial statements.

IAS 37, 'Provisions, Contingent Liabilities and Contingent Assets' was amended to specify that the "cost of fulfilling" a contract comprises the "costs that relate directly to the contract", which can be either incremental costs of fulfilling that contract or an allocation of other costs that relate directly to fulfilling contracts.

This amendment is applicable for annual periods beginning on or after January 1, 2022. It is not anticipated that the application of this amendment will have a material impact on amounts reported in respect to the Group's consolidated financial statements.

IFRS 9, 'Financial Instruments' was amended to clarify which fees an entity includes when it applies the "10 per cent test" in assessing whether to derecognize a financial liability. An entity includes only fees paid or received between the entity and the lender, including fees paid or received by either the entity or the lender on the other's behalf.

This amendment is applicable for annual periods beginning on or after January 1, 2022. It is not anticipated that the application of this amendment will have a material impact on amounts reported in respect to the Group's consolidated financial statements.

IFRS 16, 'Leases' was amended to permits lessees to apply the practical expedient regarding COVID-19-related rent concessions to rent concessions for which any reduction in lease payments affects only payments originally due on or before June 30, 2022 (rather than only payments originally due on or before June 30, 2021).

This amendment is applicable for annual periods beginning on or after April 1, 2021. It is not anticipated that the application of this amendment will have a material impact on amounts reported in respect to the Group's consolidated financial statements.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

4. Significant Accounting Policies (Cont'd)

- (r) New standards, amendments to standards and interpretations (Cont'd)
 - Amendments to standards that are issued but not effective and have not been early adopted are as follows (Cont'd):
 - IFRS 16, 'Leases' was amended to remove from Illustrative Example 13 (which accompanies IFRS 16) the illustration of the reimbursement of leasehold improvements by the lessor in order to resolve any potential confusion regarding the treatment of lease incentives that might arise because of how lease incentives are illustrated in that example.

This amendment is applicable for annual periods beginning on or after January 1, 2022. It is not anticipated that the application of this amendment will have a material impact on amounts reported in respect to the Group's consolidated financial statements.

5. **Determination of Fair Values**

A number of the Group's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

Fair value measurements are categorised into Levels 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurements in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The carrying values of trade and other receivables, cash and cash equivalents and trade and other payables are assumed to approximate their fair values at the reporting date due to their short-term nature.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

5. Determination of Fair Values (Cont'd)

The following table presents the level, valuation techniques and key inputs of the Group's assets and liabilities that are measured or disclosed at fair value at the reporting date:

	As at December 31, 2021	As at December 31, 2020	Laval	Valuation techniques and
Non-Financial Assets Measured at	\$'000	\$'000	Level	key inputs
Fair Value				Market comparable approach.
Land (Note 7)	73,417	73,417	2	Key inputs-Price per square foot
Financial Instruments Measured at Fair Value				
Financial Assets				Ousted prices in an active
FVTOCI financial assets (Note 12)	14,585	21,617	1	Quoted prices in an active market
FVTPL financial assets (Note 12)	23,912	23,150	3	Discounted cash flows using unobservable inputs
FVTPL financial assets (Note 12)	9,616	<u>-</u>	1	Quoted prices in an active market
				Discounted cash flow. Future cash flows are estimated based on futures prices and
Derivative financial asset (Note 26)	1,368	571	2	discount rates (swap prices and LIBOR) rates
Financial Liabilities				Discounted such flow. Future
				Discounted cash flow. Future cash flows are estimated based on futures prices and
Derivative financial liability (Note 26)	252	-	2	discount rates (swap prices and LIBOR) rates
Financial Instruments Disclosed at Fair Value				
Financial Liabilities				Present value of future principal and interest cash
				flows, discounted at the market rate of interest at the
Borrowings (Note 36)	74,318	89,755	2	reporting date

There were no transfers between levels 1, 2 or 3 during the year.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

6. Financial Risk Management

Overview

The Group has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk (including currency risk and interest rate risk)
- Operational risk

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital. Further quantitative disclosures are included throughout these consolidated financial statements.

Risk management framework

The Board of Directors (the "Board") has overall responsibility for the establishment and oversight of the Group's risk management framework. The Board has established an Audit Committee, which oversees how management monitors compliance with the Group's risk management policies and procedures, and which also reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Audit Committee is assisted in its oversight role by the Internal Audit Department, which undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

6. Financial Risk Management (Cont'd)

Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Group's receivables from customers, other financial assets and cash and cash equivalents.

Trade and other receivables

The Group's exposure to credit risk is influenced significantly by the individual characteristics of each customer. The demographics of the Group's customer base, including the default risk of the industry in which customers operate also have an influence on credit risk.

The Board of Directors has established a credit policy under which each new customer is analysed individually for creditworthiness before the Group's standard payment and service terms and conditions are offered.

These payment terms are stipulated under the provisions of the Electricity Supply Act, 1994 (as amended) and include providing discretion to the Group to require a deposit not exceeding an estimated two month's supply of electricity from any consumer as security for sums due from time to time, and which is refundable with interest upon permanent termination of services. Customers that fail to meet the Group's benchmark creditworthiness may have their electricity supply withdrawn or terminated in accordance with the provisions of the Act. In order to provide some reprieve to its customers during the ongoing COVID-19 pandemic, the Group temporarily ceased electricity supply withdrawals in instances where they failed to meet this creditworthiness benchmark. Management closely monitored the ageing of the Group's trade receivables with the intention of reinstating withdrawals as deemed appropriate.

The Group establishes an allowance for impairment that represents the expected credit losses over the lifetime of trade and other receivables. The collective loss allowance is determined using a practical expedient method in the form of a provision matrix, based on customer categories, historical credit loss experiences and future economic expectations. For all other receivables, the ECL was determined based on probability-weighted default outcomes, past events, current conditions and forward-looking information.

Other financial assets

The Group limits its exposure to credit risk by investing in liquid securities. Credit risk is minimised by placing investments with reputable financial institutions.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits with maturities of three months or less from the acquisition date that are subject to an insignificant risk of changes in their fair value and are used by the Group in the management of its short-term commitments. Credit risk is minimised by placing cash and cash equivalents with reputable financial institutions.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

Financial Risk Management (Cont'd)

Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

Typically, the Group ensures that it has sufficient cash on demand to meet expected operational expenses including the servicing of financial obligations; this excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters. In addition, the Group maintains the following lines of credit:

- An overdraft facility of EC\$10,000 which is secured. Interest is payable at the rate of 5.00% (2020 - 5.00%) per annum.
- Customs bond valued at \$600.

Liquidity risk of derivative financial instruments is minimised as the Group is required to post collateral when the mark-to-market exposures have surpassed the credit limits agreed with the relevant counterparties.

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Currency risk

The Group is exposed to currency risk on purchases denominated in currencies other than its functional currency. The Group's exposure to currency risk is minimal since most of its obligations are denominated in United States Dollars and the United States dollar has been formally pegged to the Eastern Caribbean Dollar at EC\$2.70 = US\$1.00 since 1976.

Interest rate risk

There is no significant interest rate risk arising on the Group's cash and cash equivalents as at December 31, 2021 and 2020. The Group is not exposed to interest rate risk on its interest-bearing financial assets and liabilities. The Group's interest-bearing financial assets are its investments in treasury bills and commercial paper which have fixed rates of interest as disclosed in Note 12. The Group's interest-bearing financial liabilities are its lease liabilities, borrowings and consumer deposits which have fixed rates of interest as disclosed in Notes 18, 19 and 20, respectively.

Equity price risk

The Group is exposed to equity price risk as at December 31, 2021 on its investments in equity instruments.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

6. Financial Risk Management (Cont'd)

Market risk (Cont'd)

Commodity price risk

Commodity price risk is the risk that the fair value or future cash flows of financial instruments will fluctuate because of changes in commodity prices. Prices for these commodities are impacted by world economic events that dictate the levels of supply and demand. The Group is not exposed to commodity price risk on its derivative financial instruments as, although these instruments are affected by changes in the price of fuel, the changes in the value of these instruments are recoverable from customers as disclosed in Note 4(k).

Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Group's processes, personnel, technology and infrastructure, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour. Operational risks arise from all of the Group's operations. The Group's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Group's reputation with overall cost effectiveness and to avoid control procedures that restrict initiative and creativity.

The primary responsibility for the development and implementation of controls to address operational risk is assigned to the Board of Directors and the senior management. This responsibility is supported by the development of overall Group standards for the management of operational risk in the following areas:

- requirements for appropriate segregation of duties, including the independent authorisation of transactions
- requirements for the reconciliation and monitoring of transactions
- compliance with regulatory and other legal requirements
- documentation of controls and procedures
- requirements for the periodic assessment of operational risks faced, and the adequacy of controls and procedures to address the risks identified
- requirements for the reporting of operational losses and proposed remedial action
- development of contingency plans
- training and professional development
- ethical and business standards
- risk mitigation, including insurance where this is effective

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

6. Financial Risk Management (Cont'd)

Capital management

The Board's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The Board of Directors monitors the return on capital, which the Group defines as net profit for the year divided by average shareholders' equity. The Board of Directors also monitors the level of dividends to ordinary shareholders.

The Board seeks to maintain a balance between the higher returns that might be possible with higher levels of borrowings and the advantages and security afforded by a sound capital position. Under the terms of the mortgage debenture agreement, the Group's total debt shall not exceed two times its tangible net worth which currently comprises its share capital and retained earnings. The Group complied with this requirement as at December 31, 2021 and 2020.

There were no changes in the Group's approach to capital management in 2021 and 2020.

7. Property, Plant and Equipment (Cont'd)

Fair value measurement of the Group's land

The Group's lands are stated at their revalued amounts, being the fair value at the date of revaluation at various dates between February 1, 2021 and April 8, 2021. The fair value measurements were performed by an independent valuation practitioner /quantity surveyor. The fair values of the land were determined based on the market comparable approach that reflects recent transactions prices for similar properties.

The carrying amounts of the Group's land would have been \$13,555 (2020 - \$13,555) had they been measured at the historical cost basis.

Assets pledged as security

As stated in Note 19, borrowings are secured by hypothecary obligations and mortgage debentures creating fixed charges over all immovable properties and floating charges over all other assets, all ranking pari passu pursuant to a security sharing agreement, and assignment of insurance policies.

8. Right-of-use Assets

January 1, 2020	1,015	723	1,738
December 31, 2020	855	868	1,723
December 31, 2021	987	1,230	2,217

The Group has leases for office premises, land and Company vehicles for management staff. With the exception of short-term leases on certain office premises and land, each lease is reflected on the consolidated statement of financial position as a right-of-use asset and a lease liability (see Note 18).

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

8. Right-of-use Assets (Cont'd)

The table below describes the nature of the Group's leasing activities by type of a right-of-use asset:

	No. of	Range of remaining	Average remaining	No. of leases with
	leases	term	lease terms	renewal options
Buildings	2	4-8 years	6 years	1
Motor vehicles	13	1-5 years	3 years	-

The Group has elected not to recognise a right-of-use asset and lease liability for short-term leases (leases with a lease term of 12 months or less). Payments made under such leases are expensed over a straight-line basis. The expense relating to lease payments for 2021 was \$50 (2020 - \$45) and is included in administrative expenses of \$34,251 (2020 - \$34,734) as disclosed in the consolidated statement of comprehensive income. Total cash outflow for leases for 2020 was \$520 (2020 - \$478) as disclosed in the consolidated statement of cash flows.

Way leave rights, which have an indefinite life period, allow the Group access to properties owned by third parties for the purpose of installing and maintaining the Group's transmission and distribution network.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

4	^	
1	()	Inventories

11.

	2021	2020
	\$'000	\$'000
Fuel inventories	4,071	2,857
Generation spare parts	6,139	5,093
Transmission, distribution and other spares	5,772	5,823
Goods-in-transit	555	830
	16,537	14,603
Provision for inventory obsolescence	(3,113)	(2,052)
	13,424	12,551
Trade, Other Receivables and Prepayments		
	2021	2020
	\$'000	\$'000
Trade receivables, gross (Note 36)	53,368	48,079
Less: provision for impairment of trade receivables (Note 36)	(17,687)	(15,569)
Trade receivables, net (Note 36)	35,681	32,510
Other receivables, gross	7,229	13,897
Less: provision for impairment of other receivables	(918)	(1,069)
Other receivables, net	6,311	12,828
Accrued income	20,325	16,411
	62,317	61,749
Prepayments	2,310	2,335
	64,627	64,084

The movement in the provision for impairment of trade receivables was as follows:

	2021	2020
	\$'000	\$'000
Balance at January 1	15,569	10,781
Impairment loss recognized per IFRS 9	2,118	4,788
Balance at December 31	17,687	15,569

The movement in the allowance for impairment in respect of other receivables was as follows:

	2021	2020
	\$'000	\$'000
Balance at January 1	1,069	1,494
Impairment gain recognized per IFRS 9	(151)	(425)
Balance at December 31	918	1,069

The allowance accounts in respect of trade and other receivables are used to record impairment losses unless the Group is satisfied that no recovery of the amount owing is possible; at that point the amounts considered irrecoverable are written-off against the asset directly.

The Group's exposure to credit risk related to trade and other receivables is disclosed in Note 36.

2020

	Preference shares	1,214	1,214
		2021	2020
		\$'000	\$'000
	Issued and fully paid		
	22,400,000 voting ordinary shares	77,563	77,563
	520,000 non-voting ordinary shares	2,600	2,600
		80,163	80,163
15.	Fair Value Reserve		
		2021	2020
		\$'000	\$'000
	Balance at beginning of year	2,158	981
	Fair value loss on FVTOCI financial assets	(16)	(15)
	Transferred from retained earnings	(480)	1,192
	Balance at end of year	1,662	2,158

The fair value reserve represents the cumulative fair value gains and losses arising on the revaluation of financial assets measured at both FVTPL and FVTOCI, net of tax.

16. **Revaluation Reserve**

	2021	2020
	\$'000	\$'000
Balance at beginning of year	59,862	15,351
Gain on revaluation of land		44,511
Balance at end of year	59,862	59,862

The revaluation reserve represents the unrealized gain on the revaluation of the Group's land. When land is sold, the portion of the revaluation reserve that relates to that asset is transferred directly to retained earnings. Items of other comprehensive income included in the revaluation reserve will not be reclassified subsequently to profit or loss.

17. Self-insurance Reserve

Because of the difficulty experienced by the Group in obtaining adequate and reasonably priced commercial insurance coverage primarily on its Transmission and Distribution ("T&D") assets, the Board of Directors gave approval for the establishment of a Self-insurance Fund to provide coverage for its T&D assets in the first instance, in the event of natural disasters or similar catastrophic events. From 2008, the Group therefore ceased commercial insurance cover of its T&D assets and undertook on an annual basis, to provide for insurance cover and to place amounts into the fund which will be independently managed under the terms of a registered Trust Deed.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

Self-insurance Reserve (Cont'd)

During 2011, the Group received formal notification from the Registrar of Insurances of the approval in principle, subject to certain conditions, for the establishment of the fund in accordance with the Insurance Act of Saint Lucia. Payments into the fund are exempted from income tax under the authority of Statutory Instrument No. 172 of 2007.

LUCELEC Cap-Ins. Inc. was incorporated on December 31, 2014. This subsidiary company has established a reserve which is not available for distribution to the shareholder.

The fund balance comprises the following:

		2021	2020
		\$'000	\$'000
	FVTOCI financial assets (Note 12)	14,585	21,617
	FVTPL financial assets (Note 12)	33,528	23,150
	Cash and cash equivalents (Note 13)	1,302	1,701
		49,415	46,468
	The movements in the Self-insurance Reserve were as follows:		
		2021	2020
		\$'000	\$'000
	Balance at beginning of year	44,212	40,805
	Transferred from retained earnings	3,413	3,407
	Balance at end of year	47,625	44,212
18.	Lease Liabilities		
		2021	2020
		\$'000	\$'000
	Current	504	377
	Non-current	1,790	1,399
		2,294	1,776

The weighted average rate of interest applied to lease liabilities is 7.62% (2020 - 7.23%).

Lease liabilities are secured by the related underlying asset (see Note 8).

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

18. Lease Liabilities (Cont'd)

Future minimum lease payments at year end were as follows:

	2021	2020
	\$'000	\$'000
Between 1 and 2 years	530	312
Between 2 and 5 years	945	671
Greater than 5 years	315	416
	1,790	1,399

The Group's exposure to liquidity risks related to lease liabilities is disclosed in Note 36.

19. Borrowings

	2021	2020
	\$'000	\$'000
Current		
Bank borrowings	9,424	9,087
Related parties	9,024	8,565
	18,448	17,652
Non-current	<u> </u>	
Bank borrowings	25,731	35,154
Related parties	32,802	41,827
	58,533	76,981
Total borrowings		
Bank borrowings	35,155	44,241
Related parties (Note 33(d)(v))	41,826	50,392
	76,981	94,633
		.,,

Borrowings are secured by hypothecary obligations and mortgage debentures creating fixed charges over all immovable properties and floating charges over all other assets, all ranking pari passu pursuant to a security sharing agreement, and assignment of insurance policies (Note 7).

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

19. Borrowings (Cont'd)

The weighted average effective rates at the reporting date were as follows:

	2021	2020
	%	%
Bank borrowings	3.65	3.66
Related parties	5.35	5.35
Maturity of non-current borrowings:		
	2021	2020
	\$'000	\$'000
Between 1 and 2 years	19,281	18,448
Between 2 and 5 years	34,674	49,058
Over 5 years	4,578	9,475
	58,533	76,981

The Group's exposure to liquidity risks related to borrowings is disclosed in Note 36.

20. **Consumer Deposits**

Consumers requesting energy connections are required to pay a deposit that is refundable when the service is terminated. Interest is accrued on these deposits at the rate of 2% (2020 - 2%) per annum.

		2021	2020
		\$'000	\$'000
	Consumer deposits	15,480	15,655
	Interest accrual	4,679	4,551
		20,159	20,206
21.	Provision for Other Liabilities		
21.	1 Tovision for other Elabilities		
		2021	2020
		\$'000	\$'000
	Balance at beginning and end of year	1,485	1,485

The provision represents the most recent reasonable estimated decommissioning costs of the old power stations located at Union and Vieux Fort.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

22. **Deferred Tax Liability**

Deferred tax liability is calculated in full on temporary differences under the statement of financial position liability method using a principal tax rate of 30% (2020 - 30%). The movement on the deferred tax liability account is as follows:

	2021	2020
	\$'000	\$'000
Balance at beginning of year	34,059	32,492
Recognised in profit and loss (Note 29)	1,439	1,885
Recognised in other comprehensive income (Note 29)	(123)	(318)
Balance at end of year	35,375	34,059
Deferred tax liability is attributed to the following items:		
	2021	2020
	\$'000	\$'000
Property, plant and equipment	36,137	34,813
Post-employment medical benefit liabilities	(739)	(739)
Leased assets	665	517
Lease liabilities	(688)	(532)
	35,375	34,059

23. **Retirement Benefit Liabilities**

(a) Background

Grade I Employees

The Group contributes to a defined benefit pension scheme for Grade I employees who were employed prior to January 1, 2008. The plan is administered and managed by Sagicor Life, Inc.("Sagicor")

Grade II Employees

The Group contributes to a defined benefit pension scheme for Grade II employees who were employed prior to January 1, 2008 which, up to December 31, 2008, was administered by CLICO International Life Insurance Group Limited ("CLICO"). Subsequent funding to the plan is currently administered by RBC Investments Management (Caribbean) Limited.

The most recent actuarial valuations of these two plans were completed December 31, 2018 using the "Projected Unit Credit" method of valuation.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

23. Retirement Benefit Liabilities (Cont'd)

(b) The principal actuarial assumptions used for all plans were as follows:

	Grade	Grade II		es I
	2021	2020	2021	2020
	%	%	%	%
Discount rates	7.5	7.5	7.5	7.5
Future salary increases	4.0	4.0	4.0	4.0
Future NIS earnings increases	-	-	2.0	2.0

Assumptions regarding future mortality are based on standard mortality tables.

(c) The amounts recognised in the consolidated statement of financial position are determined as follows:

	Grade II		Grad	le I	Total	
	2021 \$'000	2020 \$'000	2021 \$'000	2020 \$'000	2021 \$'000	2020 \$'000
Present value of defined benefit	Ψ 000	Ψ 000	Ψ 000	Ψ 000	Ψ σσσ	Ψ 000

23. Retirement Benefit Liabilities (Cont'd)

(f) Composition of plan assets (Cont'd)

Grade I

The asset value as at December 31, 2021 was estimated using the asset value as at December 31, 2021 provided by the Plan's Investment Manager - Sagicor. The value is reliant on Sagicor's financial strength.

The Grade I Plan's assets are invested in a strategy agreed with the Grade I Plan's Trustees which is largely driven by statutory constraints and asset availability. The Trustees have agreed to invest the Grade I Plan's assets in Sagicor's International Balanced Fund, which is a collective investment vehicle for regional pension plans investing in a diversified portfolio of bonds and equities. There are no asset-liability matching strategies used by the Grade I Plan.

Grade II

The values of the Grade II Plan assets as at December 31, 2021 were estimated using the asset value as at November 30, 2021 provided by the Plan's Investment Manager (RBC) and an estimate of the value of the Grade II Plan's immediate annuity policies which was calculated using the same assumptions used to calculate the defined benefit obligation (it is assumed that these annuities have not been impaired). The Investment Manager calculates the fair value of the Government bonds by discounting expected future proceeds using a constructed yield curve.

All of the Grade II Plan's government bonds were issued by the governments of countries within Caricom. The Scheme's immediate annuity policies that were purchased from CLICO were transferred to Nagico during 2021. The value of these policies is reliant on Nagico's financial strength and its ability to pay the pension secured.

The Grade II Plan's assets are invested in a strategy agreed with the Grade II Plan's Trustees which is largely driven by statutory constraints and asset availability. There are no asset-liability matching strategies used by the Grade II Plan.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

23. Retirement Benefit Liabilities (Cont'd)

(g) The actual return on plan assets was as follows:

	Grade II		Grade I		Total	
	2021	2020	2021	2020	2021	2020
	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000
Return on plan assets	1,052	1,641	822	505	1,874	2,146

(h) The net pension costs recognised in the consolidated statement of comprehensive income were as follows:

	Grade II		Grade I		Total	
	2021	2020	2021	2020	2021	2020
	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000

Retirement Benefit Liabilities (Cont'd) 23.

Sensitivity Analysis

The calculation of the defined benefit obligations for Grades I to II is sensitive to the assumptions used. The following tables summarise how the defined benefit obligations would have changed as a result of a change in the assumptions used.

Grade I

December 31, 2021

	1% p.a. increase	1% p.a. decrease
	\$'000	\$'000
Discount rate	(1,303)	1,619
Future salary increases	926	(760)
December 31, 2020		
	1% p.a. increase	1% p.a. decrease
	\$'000	\$'000
Discount rate	(1,316)	1,641
Future salary increases	952	(791)

An increase of one year in the assumed life expectancies would increase the defined benefit obligations at December 31, 2021 by \$191 (2020 - \$189).

Grade II

December 31, 2021

	1% p.a. increase 1%	p.a. decrease
	\$'000	\$'000
Discount rate	(1,858)	2,224
Future salary increases	500	(456)
December 31, 2020		
	1% p.a. increase 1%	p.a. decrease
	\$'000	\$'000
Discount rate	(1,855)	2,228
Future salary increases	568	(520)

An increase of one year in the assumed life expectancies would increase the defined benefit obligations at December 31, 2021 by \$364 (2020 - \$347).

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

23. Retirement Benefit Liabilities (Cont'd)

Duration (I)

The weighted average duration of the defined benefit obligation at year end for each of the plans was as follows:

	2021	2020
Grade 1	10.5 years	10.9 years
Grade II	11.5 years	11.9 years

(m) **Funding Policy**

Grade I

The Group meets the balance of the cost of funding the defined benefit pension plan and the Group must pay contributions at least equal to those paid by members, which are fixed. The funding requirements are based on regular (at least every 3 years) actuarial valuations of the plan and the assumptions used to determine the funding required may differ from those set out above. The Group expects to pay \$410 to the pension plan during 2022.

Grade II

The Group meets the balance of the cost of funding the defined benefit pension plan and the Group must pay contributions at least equal to those paid by members, which are fixed. The funding requirements are based on regular (at least every 3 years) actuarial valuations of the plan and the assumptions used to determine the funding required may differ from those set out above. The Group expects to pay \$1,000 to the pension plan during 2022.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

24. Post-employment Medical Benefit Liabilities

The Group contributes to a post-employment medical scheme with The Beacon Insurance Co. Limited for all its current employees and retirees.

The principal actuarial assumptions used were as follows: (a)

	2021	2020	
	%	%	
Discount rate	7.5	7.5	
Medical expense increase	5.0	5.0	

Assumptions regarding future mortality are based on standard mortality tables.

(b) The amounts recognised in the consolidated statement of financial position are determined as follows:

	2021	2020
	\$'000	\$'000
Present value of defined benefit obligations	2,462	2,464
Defined benefit liabilities	2,462	2,464

(c) The movements in the present value of defined medical benefit obligations were as follows:

	2021	2020
	\$'000	\$'000
Defined benefit obligations as at January 1	2,464	2,220
Current service costs	74	70
Interest costs	182	164
Benefits paid	(66)	(54)
Re-measurements: experience adjustments	(192)	64
Defined benefit obligations as at December 31	2,462	2,464

(d) The amounts recognised in the consolidated statement of comprehensive income were as follows:

	2021	2020
	\$'000	\$'000
Current service costs	74	70
Interest on defined benefit obligations	182	164
Net medical benefit costs	256	234

(e) Re-measurements recognised in other comprehensive income were as follows:

	2021	2020
	\$'000	\$'000
Experience (gain)/loss	(192)	64
Total amount recognised in other comprehensive income	(192)	64

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

24. Post-employment Medical Benefit Liabilities (Cont'd)

(f) Reconciliation of opening and closing defined benefit liabilities:

	2021	2020
	\$'000	\$'000
Opening defined benefit liabilities	2,464	2,220
Net medical benefit costs	256	234
Re-measurement (gain)/loss recognised in other		
comprehensive income	(192)	64
Benefits paid	(66)	(54)
Closing defined benefit liabilities	2,462	2,464

The calculation of the defined benefit obligations is sensitive to the assumptions used. The following tables summarise how the defined benefit obligations would have changed as a result of a change in the assumptions used.

December 31, 2021

1% p.a. increase	1% p.a. decrease
\$'000	\$'000
(371)	480
488	(382)
1% p.a. increase	1% p.a. decrease
\$'000	\$'000
(372)	482
490	(383)
	\$'000 (371) 488 1% p.a. increase \$'000 (372)

An increase of 1 year in the assumed life expectancies would increase the defined benefit obligations at December 31, 2021 by \$77 (2020 - \$77).

Duration (g)

The weighted average duration of the defined benefit obligation was 18.4 years (2020 - 18.4 years).

(h) **Funding Policy**

The Group insures the medical benefits for retirees with an external insurer and pays 50% of the retiree only premiums to the insurer as they fall due. The retiree meets the remaining 50%. In addition, if the retiree wishes to provide for his dependents, the retiree meets the full cost of this additional benefit.

The Group expects to pay \$69 to the plan in 2022.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

25. **Trade and Other Payables**

	2021	2020
	\$'000	\$'000
Trade payables	17,092	13,721
Accrued expenses	11,017	16,154
Other payables	7,205	9,145
	35,314	39,020
Deferred fuel costs	1,116	571
	36,430	39,591

The Group's exposure to liquidity risks related to trade and other payables is disclosed in Note 36.

Deferred fuel costs relate to fair value adjustments of derivative financial instruments as disclosed in Notes 4(I) and Note 26. The movements in deferred fuel costs are as follows:

	2021	2020
	\$'000	\$'000
Balance at beginning of year	571	2,549
Balances arising from new hedge contracts	1,116	571
Reversals	(571)	(2,549)
Balance at end of year	1,116	571

Future recovery/reversals of the amounts in deferred fuel costs are exposed to the risk that possible changes in the regulations could result in gains or losses associated with derivative financial instruments no longer being recovered from/refunded to customers.

26. **Derivative Financial Instruments**

The underlying strategy and imperative related to the Group's objective of its fuel price hedging programme is to reduce, in some measure, the price volatility to its customers caused by the existing arrangements whereby fuel is purchased on a regular basis at market prices.

The Board of Directors, as part of the hedging strategy, approved a rolling 12-month hedging programme that commenced in January 2012 utilising Fixed Price Swaps covering up to 75% of estimated monthly volumes. This strategy was further expanded in December 2015 to include the use of Options.

Under the provisions of the Electricity Supply Act (as amended) 1994, fuel prices are passed through to customers at cost.

The fair value of these hedging contracts at year end as disclosed on the consolidated statement of financial position is as follow:

	2021	2020
	\$'000	\$'000
Derivative financial asset - Fixed price swaps	1,368	571
Derivative financial liability - Fixed price swaps	252	<u> </u>

The Group's exposure to credit risk related to its derivative financial asset is disclosed in Note 36.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

30. Basic and Diluted Earnings per Share

Basic and diluted earnings per share is calculated by dividing the net profit for the year of \$40,542 (2020) - \$36,585) by the weighted average number of shares outstanding during the year of 22,920 (2020 -22,920).

31. **Tariff Reduction**

In accordance with the provisions of the Electricity Supply Amendment Act Nos. 12 of 2006 and 13 of 2006, a mechanism was put into effect for the computation of the Allowable Rate of Return, based on a predetermined range of Return on Average Contributed Capital.

The Allowable Rate of Return is between 2% and 7% above the cost of the most recent long-term bonds issued by the Government of St. Lucia on the Regional Government Securities Market, with a minimum return of 10%. This was equal to a range of 10.00% to 14.33% in respect of 2021 (2020 - 10.00% to 14.33%).

In the event that the actual Rate of Return exceeds the Allowable Rate of Return, 50% of the amount in excess of the maximum of the range will be distributed proportionately to hotel and industrial consumers as a decrease in the basic energy rate based on the total kilowatt hours consumed in the preceding calendar year. The Minister may also, by Order, apply the decrease in the basic energy rate to consumers or groups of consumers in need of special protection.

In the event that the actual Rate of Return falls below the minimum of 10%, provision is also made for the upward adjustment of the basic energy rate.

32. **Ordinary Dividends**

	2021	2021	2020	2020
	\$	\$'000	\$	\$'000
	Dividends		Dividends	
	Per share	Total	Per share	Total
Final - relating to 2019		-	0.50	11,460
Interim - relating to 2020	-	-	0.39	8,939
Final - relating to 2020	0.58	13,294	_	-
Interim - relating to 2021	0.45	10,314	-	_
	1.03	23,608	0.89	20,399

The final dividend for the year 2021 had not been declared as at December 31, 2021.

Related Parties 33.

(a) Identification of related party

A party is related to the Group if:

- (i) Directly or indirectly the party:
 - Controls, is controlled by, or is under common control with the Group;
 - Has an interest in the Group that gives it significant influence over the Group; or
 - Has joint control over the Group.
- The party is a member of the key management personnel of the Group, (ii)
- (iii) The party is a close member of the family of any individual referred to in (i) or (ii),
- The party is a post-employment benefit plan for the benefit of employees of the Group or any Group that is a related party of the Group,
- The party is an entity that is controlled or jointly controlled by a party referred to in (i) to (v) (iii).
- Related party transactions and balances (b)

A number of transactions have been entered into with related parties in the normal course of business. These transactions were conducted at market rates, or commercial terms and conditions.

(c) Transactions with key management personnel

> In addition to their salaries, the Group also provides non-cash benefits to executive officers and contributions to post-employment retirement plans on their behalf. The key management personnel compensations are as follows:

2021 \$'000	2020 \$'000
4,588	4,395
150	155
318	340
5,056	4,890
	4,588 150 318

(i) Transactions with the key management personnel during the year were as follows:

	2021	2020
	\$'000	\$'000
Supply of electricity services	132	126
Supply of other services	<u>-</u>	79
	132	205

(ii) Balances at the reporting date arising from transactions with key management personnel were as follows:

	2021	2020
	\$'000	\$'000
Supply of electricity services	6	9

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

33. Related Parties (Cont'd)

Transactions with shareholders (d)

The Group's major shareholders are as follows:

	2021	2020
	%	%
Emera St. Lucia Ltd.	20.00	20.00
First Citizens Bank Limited	20.00	20.00
National Insurance Corporation	20.00	20.00
Castries Constituency Council	15.50	15.50
Government of Saint Lucia	10.05	10.05
	85.55	85.55

The remaining 14.45% (2020 - 14.45%) of the shares is widely held.

(i) Transactions with shareholders during the year were as follows:

Supply of Electricity Services

2021	2020
\$'000	\$'000
86	90
1,637	1,516
1,495	1,409
27,388	24,934
30,606	27,949
	\$'000 86 1,637 1,495 27,388

The Government of Saint Lucia receives a 10% (2020 - 10%) discount on electricity charges in respect of all accounts other than Street lighting, except where the minimum charges apply.

Supply of Other Services

	2021	2020
	\$'000	\$'000
Government of Saint Lucia	375	332
Services Rendered to the Group

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

Financial Instruments (Cont'd) 36.

Credit risk (Cont'd)

Expected credit loss assessment

The Group uses a provision matrix to measure the expected credit losses of trade receivables. The expected loss rates are based on the Group's historical credit loss rates per ageing category, which reflects the percentage of the ageing category which migrates over to 120 days, adjusted for factors specific to the debtor. The historical loss rates are then adjusted for current and forward-looking information based on the impact of macroeconomic factors and the COVID-19 pandemic on the Group's customers. The Group has identified the unemployment rate, inflation rate and gross domestic product as the key macroeconomic factors. These loss rates are applied to the outstanding receivable balances less security deposits and interest.

The following provides information about the Group's exposure to credit risk and expected credit losses for trade receivables:

December 31,	2021
--------------	------

	Gross		Net
	carrying	Loss	carrying
	amount	allowance	amount
	\$'000	\$'000	\$'000

The basis of determining fair values is disclosed in Note 5.

Interest rates used for determining fair values

The interest rates used to discount estimated cash flows of borrowings are based on the market interest rates at the reporting date.

The Group also has liabilities totaling \$20,159 (2020 - \$20,206) relating to consumer deposits (Note 20) that are refundable upon the cessation of the supply of services. It is not practicable to determine the fair values of these liabilities.

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

36. Financial Instruments (Cont'd)

Equity price risk

An average pricing volatility of 1.29% was observed during 2021 for the Group's investments in equity instruments. This volatility figure is considered to be a reasonable basis for estimating how profit or loss could have been affected by changes in market risk that were reasonably possible at the reporting date. If the quoted stock price for these equity instruments increased or decreased by that amount, profit before taxation could have changed by \$124.

37. Commitments

Capital commitments

The Group had capital commitments at December 31, 2021 of \$3,949 (2020 - \$1,324).

Operating lease commitments

Pole rental (i)

The Group expects to earn annual income from pole rentals of \$1,086 (2020 - \$1,075) for the foreseeable future.

38. Contingent Liabilities

Claims

The Group has been named a defendant to a number of claims as at December 31, 2021, the most significant being a claim alleging unlawful interference by the Group. The claimant alleges that the Group has abused its position as the sole distributor of electricity to force the claimant's customers to breach contracts for the installation of photovoltaic systems. While it is impossible to be certain of the outcome of this and any particular case or of the amount of any possible adverse verdict, the Group believes that their defenses to all these various claims are meritorious on both the law and the facts. Having regard to the foregoing, the Group (i) does not consider it appropriate to make any provision in respect of any pending matters and (ii) does not believe that the ultimate outcome of these matters will significantly impair the Group's financial condition. Payments, if any, arising from these claims will be recorded in the period that the payment is made.

Wage Negotiations

Negotiations with the trade unions representing the employees commenced in 2021. It is not practicable to reliably estimate the full retroactive pay that would be due to staff until the union agreements are signed.

Pension Benefits

The Eastern Caribbean Utilities Pension Scheme was terminated on July 8, 2018 and the deferred active members were invited to join the Group's Defined Contribution Pension Plan at the current rate of 15.35% of base salary. The Group is currently negotiating the pension benefits for the deferred active members of the plan with effect from the wind-up date of the plan. It is not practical to reasonably estimate the costs to the Group until an agreement has been finalized.

St. Lucia Electricity Services Limited

Notes to the Consolidated Financial Statements For the Year Ended December 31, 2021 (Expressed in thousands of Eastern Caribbean Dollars)

38. Contingent Liabilities (Cont'd)

Income Tax

From the date of incorporation, LUCELEC Cap-Ins Inc. has treated all its income as tax exempt given the purpose of the self-insurance fund. Having recognized that the existing tax exemption only provides for income received in the form of contributions from St. Lucia Electricity Services Limited, the Company is seeking an amendment to the Income Tax Act to legitimize the treatment of all other income. Should the Company be unsuccessful in securing this amendment, the Group's current tax liability including penalties and interest and deferred tax liability, could be \$1,155 and \$499 respectively.

39. **Subsidiary Companies**

	Country of <u>Incorporation</u>	Equity %		
LUCELEC Cap-Ins. Inc.	Saint Lucia	100		
Energyze Holdings Inc.	Saint Lucia	100		

40. Comparatives

Where necessary, comparative figures have been adjusted to conform with changes in the presentation in the current year.
