INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Republic Bank (Grenada) Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of Republic Bank (Grenada) Limited ("the Bank") which comprise the statement of financial position as at 30 September 2022 and the statement of income, statement of comprehensive income, statement of changes in equity and cash flows for the year then ended and a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Bank as at 30 September 2022, and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRS").

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the *Audit* of *the Financial Statements section* of our report. We are independent of the Bank in accordance with the International Ethics Standards Board for Accountants' (IESBA) International Code of Ethics for Professional Accountants (including International Independence Standards) ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Matters

The financial statements of Republic Bank (Grenada) Limited for the year ended 30 September 2021 were audited by another auditor who expressed a qualified opinion on those financial statements in their audit report dated 11 February 2022. The qualified opinion resulted from two matters as described below:

i. Expected credit losses (ECL) on the Stage 1 and Stage 2 loans

The Bank acquired Scotiabank Grenada's banking operations on 1 November 2019. At this date deferred tax on ECL for Stage 1 and Stage 2 loans was not computed and accounted for as part of the acquisition accounting. The Bank subsequently recorded the ECL on these loans. However, the adjustment was recorded in retained earnings instead of goodwill.

ii. Depreciation expense on assets acquired not recorded

The Bank acquired assets from Scotiabank Grenada which were not depreciated. The entry to record the depreciation was recorded in retained earnings instead of goodwill. In addition, the deferred tax liability related to these assets was not recorded.

To the Shareholders of Republic Bank (Grenada) Limited

Report on the Audit of the Financial Statements (continued)

Other Matters (continued)

As part of our audit of the 2022 financial statements, we also audited the adjustments described in Note 26 that were applied to amend the 2021 financial statements. In our opinion, such adjustments are appropriate and have been properly applied to the earliest period presented. We were not engaged to audit, review, or apply any procedures to the 2021 financial statements of the Bank other than with respect to these adjustments described in Note 26 and, accordingly, we do not express an opinion or any other form of assurance on the 2021 financial statements taken as a whole.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have fulfilled the responsibilities described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

To the Shareholders of Republic Bank (Grenada) Limited

Report on the Audit of the Financial Statements (continued)

Key Audit Matters (continued)

Key audit matter	How our audit addressed the key audit matter
Determination of expected credit losses (ECLs)	
Refer to Notes 4 & 18.2	
IFRS 9: "Financial Instruments" requires the Bank to record an allowance for Expected Credit Losses (ECLs) for all advances and other financial assets not held at fair value through profit and loss (FVPL), together with loan commitments and financial guarantee contracts. Advances (loans) and other financial assets held at amortised cost comprised 63% of the Bank's total assets. The estimation of ECLs on financial assets is inherently uncertain and is subject to significant judgment. Furthermore, models used to determine credit impairments are complex and certain inputs used are not fully observable.	We assessed and tested the modelling techniques and methodologies developed by the Bank in order to estimate ECLs and evaluated its compliance with the requirements of IFRS 9. We reviewed the completeness and accuracy of data from underlying systems through to the models used to determine the ECLs. We considered the methodologies applied in determining Probabilities of Default (PDs) and the data used to estimate Loss Given Defaults (LGDs), and tested the Exposures at Default (EADs) against asset subledgers and amortization schedules. Where PDs and LGDs were based on assigned global credit ratings, we independently tested to the source data. We tested the aging of the portfolios and performed an independence assessment for a sample of commercial facilities to assess the accuracy and timely assignment of risk ratings in compliance with Management's policy, both of which are inputs in the staging of the portfolios. We concluded on the accuracy of the staging applied against the methodologies and assessed the reasonableness of all assumptions used to determine whether the Bank appropriately reflected additional risks where identified.

To the Shareholders of Republic Bank (Grenada) Limited

Report on the Audit of the Financial Statements (continued)

Key Audit Matters (continued)

Key audit matter	How our audit addressed the key audit matter		
Determination of expected credit losses (ECLs)			
 Key areas of judgment included: The interpretation of the requirements to determine impairment under the application of IFRS 9, which is reflected in the Bank's ECL models; The application of assumptions where there was limited or incomplete data; The identification of exposures with a significant deterioration in credit quality Assumptions used in the ECL model such as the financial condition of the counterparty or valuation of security; The need to apply overlays, the quantification of which can be highly subjective, to reflect current or future external factors that are not appropriately captured by the ECL model, including the effects of the pandemic; and Additional credit risk that could stem from the impact of the pandemic, on the ability of the Bank's customers/ investors to meet their financial commitments. 	We also ensured that the definition of a significant deterioration in credit risk and staging adopted by the Bank was in compliance with IFRS 9. Management's judgmental provisions applied on specific high-risk customers of the Bank were reviewed in detail, in assessing the reasonableness of the resulting ECL overlay applied by management on advances. For ECLs calculated on an individual basis, we tested the factors underlying the default identification and quantification including forecasts of the amount and timing of future cash flows, valuation of assigned collateral and estimates of recovery on default. We utilized on EY valuation specialists to assess the appropriateness of the models and assumptions used by the Bank, including monitoring/ validation and mathematical accuracy. Finally, we assessed the disclosure in the financial statements considering whether it satisfies the requirements of IFRS.		

To the Shareholders of Republic Bank (Grenada) Limited

Report on the Audit of the Financial Statements (continued)

Key Audit Matters (continued)

To the Shareholders of Republic Bank (Grenada) Limited

Report on the Audit of the Financial Statements (continued)

Other information included in the Bank's 2022 Annual Report

Other information consists of the information included in the Bank's 2022 Annual Report other than the financial statements and our auditor's report thereon. Management is responsible for the other information. The Bank's 2022 Annual Report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Responsibilities of Management and the Audit Committee for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

The Audit Committee is responsible for overseeing the Bank's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion.

To the Shareholder of Republic Bank (Grenada) Limited

Report on the Audit of the Financial Statements (continued)

Auditor's Responsibilities for the Audit of the Financial Statements (continued)

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

To the Shareholder of Republic Bank (Grenada) Limited

Report on the Audit of the Financial Statements (continued)

Auditor's Responsibilities for the Audit of the Financial Statements (continued)

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner in charge of the audit resulting in this independent auditor's report is Rishi Ramkissoon.

Ernot & Jung.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated

1. Corporate information

Republic Bank (Grenada) Limited (the 'Bank') is incorporated in Grenada and provides banking services through eight branches in Grenada and Carriacou. The Bank was continued under the provision of the Companies Ordinance Section 365, 1995 on March 23, 1998 and its registered office is located at Republic House, Grand Anse, St. George, Grenada. It is a subsidiary of Republic Financial Holdings Limited of Trinidad and Tobago formerly Republic Bank Limited.

Republic Financial Holdings Limited the financial holding company for the Republic Group is incorporated in the Republic of Trinidad and Tobago and its registered office is located at Republic House, 9-17 Park Street, Port of Spain. Republic Financial Holdings Limited is listed on the Trinidad and Tobago Stock Exchange.

The Republic Group (the 'Group') is a financial services group comprising several subsidiaries and associated companies. The Group is engaged in a wide range of banking, financial and related activities mainly in the caribbean community (CARICOM) region, Cayman Islands, Ghana, St. Maarten, Anguilla and the British Virgin Islands. It has most recently launched an insurance subsidiary in Trinidad and Tobago.

2. Significant accounting policies

These financial statements provide information on the accounting estimates and judgements made by the Bank. These estimates and judgements are reviewed on an ongoing basis. The continued impact of the COVID-19 pandemic, in addition to global economic uncertainty exacerbated by the Ukraine/Russia war has increased the estimation in the preparation of these financial statements. The estimation uncertainty is associated with:

- the extent and duration of disruption to business as a result of actions from consumers, businesses and governments to contain the spread of the virus;
- the extent and duration of the expected economic downturn in the economies in which we operate. This includes forecasts for economic growth, unemployment, interest rates and inflation

The Bank has formed estimates based on information that was available on September 30, 2022, which was deemed to be reasonable in forming these estimates. The actual economic conditions may be different from the estimates used and this may result in differences between the accounting estimates applied and the actual results of the Bank for future periods.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated (Continued)

2. Significant accounting policies (continued)

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied across the Bank.

2.1 Basis of preparation

The financial statements of the Bank are prepared in accordance with International Financial Reporting Standards (IFRS), and are stated in Eastern Caribbean Dollars. These financial statements have been prepared on a historical cost basis except for financial instruments measured at fair value through profit or loss. The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions. Actual results could differ from those estimates. Significant accounting judgements and estimates in applying the Bank's accounting policies have been described in Note 3.

2.2 Changes in accounting policies

The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the preparation of the Bank's annual financial statements for the year ended September 30, 2021 except for the adoption of new standards and interpretations below.

The following amendment and interpretation applies for the first time in 2022, but did not have any impact on the financial statements of the Bank. This is also described in more detail below. The Bank has not early adopted any standards, interpretations or amendments that have been issued but are not yet effective.

Interest Rate Benchmark Reform - Phase 2 - Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 (effective January 1, 2021)

The amendments provide temporary reliefs which address the financial reporting effects when an interbank offered rate (IBOR) is replaced with an alternative nearly risk-free interest rate (RFR).

The amendments include a practical expedient to require contractual changes, or changes to cash flows that are directly required by the reform, to be treated as changes to a floating rate, equivalent to a movement in a market rate of interest. Inherent in allowing the use of this practical expedient is the requirement that the transition from an IBOR benchmark rate to an RFR takes place on an economically equivalent basis with no value transfer having occurred.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated (Continued)

- 2. Significant accounting policies (continued)
 - 2.2 Changes in accounting policies (continued)

Interest Rate Benchmark Reform - Phase 2 - Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 (effective January 1, 2021) (continued)

The amendments are mandatory, with earlier application permitted. Hedging relationships must be reinstated if the hedging relationship was discontinued solely due to changes required by IBOR reform and it would not have been discontinued if the phase two amendments had been applied at that time. While application is retrospective, an entity is not required to restate prior periods.

This amendment had no impact on the financial statements of the Bank. The Bank intends to use the practical expedients in future periods if they become applicable.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.3 Standards in issue not yet effective

The following standards and interpretations are not yet effective up to the date of issuance of the Bank's financial statements. These standards and interpretations will be applicable to the Bank at a future date and will be adopted when they become effective. The Bank is currently assessing the impact of adopting these standards and interpretations.

IFRS 3 Business Combinations - Amendments to IFRS 3 (effective January 1, 2022)

The amendments are intended to replace a reference to a previous version of the IASB's Conceptual Framework (the 1989 Framework) with a reference to the current version issued in March 2018 (the Conceptual Framework) without significantly changing its requirements.

The amendments add an exception to the recognition principle of IFRS 3 to avoid the issue of potential 'day 2' gains or losses arising for liabilities and contingent liabilities that would be within the scope of IAS 37 Provisions, Contingent Liabilities and Contingent Assets or IFRIC 21 Levies, if incurred separately. The exception requires entities to apply the criteria in IAS 37 or IFRIC 21, respectively, instead of the Conceptual Framework, to determine whether a present obligation exists at the acquisition date.

At the same time, the amendments add a new paragraph to IFRS 3 to clarify that contingent assets do not qualify for recognition at the acquisition date.

The amendments must be applied prospectively. Earlier application is permitted if, at the same time or earlier, an entity also applies all of the amendments contained in the Amendments to References to the Conceptual Framework in IFRS Standards (March 2018).

The amendments are intended to update a reference to the Conceptual Framework without significantly changing requirements of IFRS 3. The amendments will promote consistency in financial reporting and avoid potential confusion from having more than one version of the Conceptual Framework in use.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.3 Standards in issue not yet effective

IAS 16 Property, Plant and Equipment - Amendments to IAS 16 (effective January 1, 2022)

The amendment prohibits entities from deducting from the cost of an item of property, plant and equipment (PP&E), any proceeds of the sale of items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognises the proceeds from selling such items, and the costs of producing those items, in profit or loss.

The amendment must be applied retrospectively only to items of PP&E made available for use on or after the beginning of the earliest period presented when the entity first applies the amendment.

IAS 37 Provisions, Contingent Liabilities and Contingent Assets - Amendments to IAS 37 (effective January 1, 2022)

The amendments apply a 'directly related cost approach'. The costs that relate directly to a contract to provide goods or services include both incremental costs (e.g., the costs of direct labour and materials) and an allocation of costs directly related to contract activities (e.g., depreciation of equipment used to fulfil the contract as well as costs of contract management and supervision). General and administrative costs do not relate directly to a contract and are excluded unless they are explicitly chargeable to the counterparty under the contract.

The amendments must be applied prospectively to contracts for which an entity has not yet fulfilled all of its obligations at the beginning of the annual reporting period in which it first applies the amendments (the date of initial application). Earlier application is permitted and must be disclosed.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.3 Standards in issue not yet effective (continued)

IAS 37 Provisions, Contingent Liabilities and Contingent Assets - Amendments to IAS 37 (effective January 1, 2022) (continued)

The amendments are intended to provide clarity and help ensure consistent application of the standard. Entities that previously applied the incremental cost approach will see provisions increase to reflect the inclusion of costs related directly to contract activities, whilst entities that previously recognised contract loss provisions using the guidance from the former standard, IAS 11 Construction Contracts, will be required to exclude the allocation of indirect overheads from their provisions. Judgement will be required in determining which costs are "directly related to contract activities", but we believe that guidance in IFRS 15 Revenue from Contracts with Customers will be relevant.

IAS 1 Presentation of Financial Statements - Amendments to IAS 1 (effective January 1, 2023)

The IASB issued amendments to paragraphs 69 to 76 of IAS 1 Presentation of Financial Statements to specify the requirements for classifying liabilities as current or non-current.

The amendments clarify:

- What is meant by a right to defer settlement
- That a right to defer must exist at the end of the reporting period
- That classification is unaffected by the likelihood that an entity will exercise its deferral right
- That only if an embedded derivative in a convertible liability is itself an equity instrument, would the terms of a liability not impact its classification

IFRS 17 Insurance Contracts (effective January 1, 2023)

IFRS 17 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The main features of the new accounting model for insurance contracts are as

- The measurement of the present value of future cash flows, incorporating an explicit risk adjustment, remeasured every reporting period (the fulfilment cash flows)
- A Contractual Service Margin (CSM) that is equal and opposite to any day one gain in the fulfilment cash flows of a group of contracts, representing the unearned profit of the insurance contracts to be recognised in profit or loss over the service period (i.e., coverage period)
- The effect of changes in discount rates will be reported in either profit or loss or other comprehensive income, determined by an accounting policy choice
- The presentation of insurance revenue and insurance service expenses in the statement of comprehensive income based on the concept of services provided during the period
- Amounts that the policyholder will always receive, regardless of whether an insured event happens (non-distinct investment components) are not presented in the statement of income, but are recognised directly on the statement of financial position

 - 2.3 Standards in issue not yet effective (continued)

IFRS 17 Insurance Contracts (effective January 1, 2023) (continued)

• Insurance services results (earned revenue less incurred claims) are presented separately from the insurance finance income or expense

A loss-recovery component of the asset for the remaining coverage of a group of reinsurance contracts held is determined and recorded in profit or loss when an entity recognises a recovery of a loss on initial recognition of an onerous group of underlying issued contracts as well as for subsequent measurement of the recovery of those losses

Entities should present separately in the statement of financial position, the carrying amounts of portfolios of insurance contracts issued that are assets and those that are liabilities, with the same requirement applying to portfolios of reinsurance contracts held

Extensive disclosures to provide information on the recognised amounts from insurance contracts and the nature and extent of risks arising from these contracts

IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 -Amendments to IAS 1 (effective January 1, 2023)

In February 2021, the IASB issued amendments to IAS 1 and IFRS Practice Statement 2 Making Materiality Judgements (the PS), in which it provides guidance and examples to help entities apply materiality judgements to accounting policy disclosures.

- Replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies and
- Adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.3 Standards in issue not yet effective (continued)

IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 -Amendments to IAS 1 (effective January 1, 2023) (continued)

Replacement of the term 'significant' with 'material'

In the absence of a definition of the term 'significant' in IFRS, the IASB decided to replace it with 'material' in the context of disclosing accounting policy information. 'Material' is a defined term in IFRS and is widely understood by the users of financial statements, according to the IASB. In assessing the materiality of accounting policy information, entities need to consider both the size of the transactions, other events or conditions and the nature of them.

IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors -Amendments to IAS 8 (effective January 1, 2023)

The amendments clarify the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors. Also, they clarify how entities use measurement techniques and inputs to develop accounting estimates.

The amended standard clarifies that the effects on an accounting estimate of a change in an input or a change in a measurement technique are changes in accounting estimates if they do not result from the correction of prior period errors. The previous definition of a change in accounting estimate specified that changes in accounting estimates may result from new information or new developments. Therefore, such changes are not corrections of errors. This aspect of the definition was retained by the IASB.

The amendments are intended to provide preparers of financial statements with greater clarity as to the definition of accounting estimates, particularly in terms of the difference between accounting estimates and accounting policies. Although the amendments are not expected to have a material impact on entities' financial statements, they should provide helpful guidance for entities in determining whether changes are to be treated as changes in estimates, changes in policies, or errors.

2.3 Standards in issue not yet effective (continued)

IAS 12 Income Taxes - Amendments to IAS 12 (effective January 1, 2023)

The amendments to IAS 12, narrows the scope of the initial recognition exception under IAS 12, so that it no longer applies to transactions that give rise to equal taxable and deductible temporary differences.

The amendments clarify that where payments that settle a liability are deductible for tax purposes, it is a matter of judgement (having considered the applicable tax law) whether such deductions are attributable for tax purposes to the liability recognised in the financial statements (and interest expense) or to the related asset component (and interest expense). This judgement is important in determining whether any temporary differences exist on initial recognition of the asset and liability.

Under the amendments, the initial recognition exception does not apply to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. It only applies if the recognition of a lease asset and lease liability (or decommissioning liability and decommissioning asset component) give rise to taxable and deductible temporary differences that are not equal.

Nevertheless, it is possible that the resulting deferred tax assets and liabilities are not equal (e.g., if the entity is unable to benefit from the tax deductions or if different tax rates apply to the taxable and deductible temporary differences). In such cases, which the IASB expects to occur infrequently, an entity would need to account for the difference between the deferred tax asset and liability in profit or loss.

An entity should apply the amendments to transactions that occur on or after the beginning of the earliest comparative period presented. In addition, at the beginning of the earliest comparative period presented, it should also recognise a deferred tax asset (provided that sufficient taxable profit is available) and a deferred tax liability for all deductible and taxable temporary differences associated with leases and decommissioning obligations.

2.3 Standards in issue not yet effective (continued)

Lease Liability in a Sale and Leaseback – Amendments to IFRS 16 (Effective for annual periods beginning on or after 1 January 2024)

In September 2022, the Board issued Lease Liability in a Sale and Leaseback (Amendments to IFRS 16). The amendment to IFRS 16 specifies the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction, to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains. After the commencement date in a sale and leaseback transaction, the seller-lessee applies paragraphs 29 to 35 of IFRS 16 to the right-of-use asset arising from the leaseback and paragraphs 36 to 46 of IFRS 16 to the lease liability arising from the leaseback. In applying paragraphs 36 to 46, the seller-lessee determines 'lease payments' or 'revised lease payments' in such a way that the seller-lessee would not recognise any amount of the gain or loss that relates to the right of use retained by the seller-lessee. Applying these requirements does not prevent the seller-lessee from recognising, in profit or loss, any gain or loss relating to the partial or full termination of a lease, as required by paragraph 46(a) of IFRS 16.

The amendment does not prescribe specific measurement requirements for lease liabilities arising from a leaseback. The initial measurement of the lease liability arising from a leaseback may result in a seller-lessee determining 'lease payments' that are different from the general definition of lease payments in Appendix A of IFRS 16. The seller-lessee will need to develop and apply an accounting policy that results in information that is relevant and reliable in accordance with IAS 8.

2.4 Improvements to International Financial Reporting Standards

The annual improvements process of the International Accounting Standards Board deals with non-urgent but necessary clarifications and amendments to IFRS. The following amendments are applicable to annual periods beginning on or after January 1, 2022:

IFRS	Subject of Amendment
IFRS 1	First-time Adoption of International Financial Reporting Standards – Subsidiary as a first-time adopter (effective January 1, 2022)
IFRS 9	'Financial Instruments – Fees in the '10 per cent' test for derecognition of financial liabilities (effective January 1, 2022)
IAS 41	Agriculture - Taxation in fair value measurements (effective January 1, 2022)

2.5 Summary of significant accounting policies

a) Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents consist of highly liquid investments, cash at hand, due from bank, Treasury Bills and bankers' acceptances with original maturities of three months or less. Bankers' acceptances and due from banks with maturities greater than three months are classified as investments.

b) Statutory deposits with Central Bank

Pursuant to the Banking Act of Grenada 2015, Republic Bank (Grenada) Limited is required to maintain specified assets as a reserve requirement for its deposit liabilities. The minimum requirement is 6% of the average deposit liabilities over a four-week period.

Deposits with the Central Bank represent mandatory reserve deposits and are not available for use in day-to-day operations. These amounted to \$96.3 million (2021: \$92.8 million).

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

c) Financial instruments - initial recognition

i) Date of recognition

Financial assets and liabilities, with the exception of loans and advances to customers and balances due to customers, are initially recognised on the trade date, i.e., the date that the Bank becomes a party to the contractual provisions of the instrument. This includes regular way trades: purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place. Loans and advances to customers are recognised when funds are transferred to the customers' accounts. The Bank recognises balances due to customers when funds are transferred to the Bank.

ii) Initial measurement of financial instruments

The classification of financial instruments at initial recognition depends on their contractual terms and the business model for managing the instruments, as described in Note 2.5 (d) (i). Financial instruments are initially measured at their fair value, except in the case of financial assets and financial liabilities recorded at fair value through profit or loss ('FVPL') transaction costs are added to, or subtracted from, this amount.

iii) Measurement categories of financial asset and liabilit

The Bank classifies all of its financial assets based on the business model for managing the assets and the assets' contractual terms, measured at either:

- Amortised cost, as explained in Note 2.5 d (i)
- FVPL, as explained in Note 2.5 d (ii)

Financial liabilities, other than loan commitments and financial guarantees are measured at amortised cost.

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

d) Financial assets and liabilities

i) Due from banks, Treasury bills, Advances and Investment securities

The Bank only measures Due from banks, Treasury bills, Advances to customers and Investment securities at amortised cost if both of the following conditions are met:

- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding and
- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows.

The details of these conditions are outlined below.

The SPPI test

For the first step of its classification process, the Bank assesses the contractual terms of financial assets to identify whether they meet the SPPI test.

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Bank applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVPL or FVOCI without recycling.

NOTES TO THE FINANCIAL STATEMENTS

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

- d) Financial assets and liabilities (continued)
 - *i)* Due from banks, Treasury bills, Advances and Investment securities (continued)

Business model assessment

The Bank determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

The Bank's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed
- The expected frequency, value and timing of sales are also important aspects of the Bank's assessment

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Bank's original expectations, the Bank does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

d) Financial assets and liabilities (continued)

ii) Financial assets at fair value through profit or loss

Financial assets in this category are those that are designated by management upon initial recognition or are mandatorily required to be measured at fair value under IFRS 9. Management may designate an instrument at FVPL upon initial recognition.

The designation eliminates, or significantly reduces, the inconsistent treatment that would otherwise arise from measuring the assets or recognising gains or losses on them on a different basis.

Financial assets at FVPL are recorded in the statement of financial position at fair value. Changes in fair value are recorded in profit and loss. Interest earned or incurred on instruments designated at FVPL is accrued in interest income, using the Effective Interest Rate (EIR), taking into account any discount/ premium and qualifying transaction costs being an integral part of instrument. Dividend income from equity instruments measured at FVPL is recorded in profit or loss as other income when the right to the payment has been established.

iii) Undrawn loan commitments

Undrawn loan commitments and letters of credit are commitments under which, over the duration of the commitment, the Bank is required to provide a loan with pre-specified terms to the customer. These contracts are in the scope of the ECL requirements but no ECL was determined based on historical observation of defaults.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

e) Reclassification of financial assets and liabilities

The Bank does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which the Bank acquires, disposes of, or terminates a business line. Financial liabilities are never reclassified.

f) Derecognition of financial assets and liabilities

Derecognition due to substantial modification of terms and conditions

The Bank derecognises a financial asset, such as a loan to a customer, to facilitate changes to the original loan agreement or arrangement due to weaknesses in the borrower's financial position and/or non-repayment of the debt as arranged and terms and conditions have been restructured to the extent that, substantially, it becomes a new loan, with the difference recognised as an impairment loss. The newly recognised loans are classified as Stage 2 for ECL measurement purposes.

When assessing whether or not to derecognise a loan to a customer, amongst others, the Bank considers the following factors:

- Change in currency of the loan
- Change in counterparty
- If the modification is such that the instrument would no longer meet the SPPI criterion

If the modification does not result in cash flows that are substantially different, the modification does not result in derecognition. Based on the change in cash flows discounted at the original rate, the Bank records a modification gain or loss, to the extent that an impairment loss has not already been recorded.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

- 2. Significant accounting policies (continued)
 - 2.5 Summary of significant accounting policies (continued)
 - f) Derecognition of financial assets and liabilities (continued)

Derecognition other than for substantial modification (continued)

Financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when the rights to receive cash flows from the financial asset have expired. The Bank also derecognises the financial asset if it has both transferred the financial asset and the transfer qualifies for derecognition.

The Bank has transferred the financial asset if, and only if, either:

- The Bank has transferred its contractual rights to receive cash flows from the financial asset, or
- It retains the rights to the cash flows, but has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement.

Pass-through arrangements are transactions whereby the Bank retains the contractual rights to receive the cash flows of a financial asset (the 'original asset'), but assumes a contractual obligation to pay those cash flows to one or more entities (the 'eventual recipients'), when all of the following three conditions are met:

- The Bank has no obligation to pay amounts to the eventual recipients unless it has collected equivalent amounts from the original asset, excluding short-term advances with the right to full recovery of the amount lent plus accrued interest at market rates
- The Bank cannot sell or pledge the original asset other than as security to the eventual recipients
- The Bank has to remit any cash flows it collects on behalf of the eventual recipients without material delay. In addition, the Bank is not entitled to reinvest such cash flows, except for investments in cash or cash equivalents including interest earned, during the period between the collection date and the date of required remittance to the eventual recipients.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

- 2. Significant accounting policies (continued)
 - 2.5 Summary of significant accounting policies (continued)
 - f) Derecognition of financial assets and liabilities (continued)

Derecognition other than for substantial modification (continued)

Financial assets (continued)

A transfer only qualifies for derecognition if either:

- The Bank has transferred substantially all the risks and rewards of the asset, or
- The Bank has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

The Bank considers control to be transferred if and only if, the transferee has the practical ability to sell the asset in its entirety to an unrelated third party and is able to exercise that ability unilaterally and without imposing additional restrictions on the transfer.

When the Bank has neither transferred nor retained substantially all the risks and rewards and has retained control of the asset, the asset continues to be recognised only to the extent of the Bank's continuing involvement, in which case, the Bank also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Bank has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration the Bank could be required to pay.

Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognised in profit or loss.

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

g) Impairment of financial assets

i) Overview of the ECL principles

The Bank records an allowance for expected credit losses (ECL) for all loans and other debt financial assets not held at FVPL, together with loan commitments and financial guarantee contracts, in this section all referred to as 'financial instruments'. Equity instruments are not subject to impairment under IFRS 9.

The Bank uses the general probability of default approach when calculating ECLs. The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss or LTECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss (12mECL) as outlined in Note 2.5 (g) (ii). The Bank's policies for determining if there has been a significant increase in credit risk are set out in Note 18.2

The 12mECL is the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

Both LTECLs and 12mECLs are calculated on either an individual basis or a collective basis, depending on the size and nature of the underlying portfolio of financial instruments. The Bank's policy for grouping financial assets measured on a collective basis is explained in Note 18.2.6.

Where the financial assets meets the definition of purchased or originated credit impaired (POCI), the allowance is based on the change in the ECLs over the life of the asset.

The Bank has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

g) Impairment of financial assets (continued)

i) **Overview of the ECL principles** (continued)

Based on the above process, the Bank classifies its loans and investments into Stage 1, Stage 2 and Stage 3 and POCI as described below:

Stage 1

When financial assets are first recognised and continue to perform in accordance with the contractual terms and condition after initial recognition, the Bank recognises an allowance based on 12mECLs. Stage 1 financial assets also include facilities where the credit risk has improved and the financial asset has been reclassified from Stage 2.

Stage 2

When financial assets have shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. Stage 2 loans and investments also include facilities, where the credit risk has improved and the loan or investment has been reclassified from Stage 3.

Stage 3

Loans and investments considered credit-impaired (as outlined in Note 18.2). The Bank records an allowance for the LTECLs.

POCI

Purchased or originated credit impaired (POCI) assets are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognised based on a credit-adjusted EIR. ECLs are only recognised or released to the extent that there is a subsequent change in the ECLs.

For financial assets for which the Bank has no reasonable expectations of recovering either the entire outstanding amount, or a proportion thereof, the gross carrying amount of the financial asset is reduced. This is considered a (partial) derecognition of the financial asset.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

- 2. Significant accounting policies (continued)
 - 2.5 Summary of significant accounting policies (continued)

g) Impairment of financial assets (continued)

ii) The calculation of ECLs

The Bank calculates ECLs based on the historical measure of cash shortfalls, discounted at the instrument's coupon rate. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive.

The mechanics of the ECL calculations are outlined below and the key elements are as follows:

- PD The Probability of Default is an estimate of the likelihood of default over a given period of time. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio. The concept of PDs is further explained in Note 18.2.4.
- EAD The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments.
- LGD The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realisation of any collateral. It is usually expressed as a percentage of the EAD.

When estimating the ECLs, the Bank considers among other factors the risk rating category and aging of the financial asset. Each of these is associated with different PDs, EADs and LGDs. When relevant, it also incorporates how defaulted loans and investments are expected to be recovered, including the value of collateral or the amount that might be received for selling the asset.

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

g) Impairment of financial assets (continued)

ii) The calculation of ECLs (continued)

With the exception of credit cards and other revolving facilities, for which the treatment is separately set out, the maximum period for which the credit losses are determined is the contractual life of a financial instrument.

Impairment losses and recoveries are accounted for and disclosed separately.

Provisions for ECLs for undrawn loan commitments are assessed as set out in Note 21.2.3 The calculation of ECLs (including the ECLs related to the undrawn element) of revolving facilities such as credit cards is explained below.

The mechanics of the ECL method are summarised below:

Stage 1

The 12mECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Bank calculates the 12mECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD which are derived as explained under Stage 3 for loans and using Global Credit Loss tables for traded investments and modified with management overlays when not traded.

Stage 2

When a financial asset has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. The mechanics are similar to those explained above, but PDs and LGDs are estimated over the lifetime of the instrument. The LGDs are derived as explained under Stage 3 for loans and using Global Credit Loss tables for traded investments and modified with management overlays when not traded.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

g) Impairment of financial assets (continued)

ii) The calculation of ECLs (continued)

Stage 3

For financial assets considered credit-impaired (as defined in Note 18.2), the Bank recognises the LTECLs for these loans and investments. The method is similar to that for Stage 2 assets, with the PD set at 100%.

POCI

POCI assets are financial assets that are credit impaired on initial recognition. The Bank only recognises the cumulative changes in LTECLs since initial recognition, based on a probability-weighting of the four scenarios, discounted by the credit adjusted EIR.

In most instances, LGDs are determined on an individual loan or investment basis, including discounting the expected cash flows at the original EIR. Stage 3 LGDs are grouped by similar types to provide percentage averages to be applied for Stage 1 and Stage 2 loans.

In limited circumstances within the Bank, where portfolios were small and the products homogenous with minimal history of defaults, a simplified ECL approach was applied using historical loss rates and staged based on the sovereign rating of the residence of the loan.

High risk

The portfolio was assessed for exposure on highly volatile sectors against the backdrop of uncertain economic shocks and the lingering impact of the COVID-19 pandemic. Management considered the financial strength of these customers and the likelihood and timing of any eventual default. In this regard varying PDs and LGDs were ascribed. The other mechanics are similar to those described above. The ECL on the loans included in the high risk assessment is \$1.1 million in stage 1 and \$0.73 million in Stage 2.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

g) Impairment of financial assets (continued)

iii) Credit cards, overdrafts and other revolving facilities

The Bank's product offering includes a variety of corporate and retail overdraft and credit cards facilities, in which the Bank has the right to cancel and/or reduce the facilities. The Bank limits its exposure on these revolving facilities to the outstanding balance for non-performing facilities. For Stage 1 and Stage 2 facilities, the Bank calculates ECL on a percentage utilisation of the credit card and overdraft limit based on the Bank's expectations of the customer behaviour, its likelihood of default and the Bank's future risk mitigation procedures, which could include reducing or cancelling the facilities.

The ongoing assessment of whether a significant increase in credit risk has occurred for revolving facilities is similar to other lending products. This is based on shifts in the customer's internal credit grade, as explained in Note 18.2.4, but emphasis is also given to qualitative factors such as changes in usage and repayment patterns.

The interest rate used to discount the ECLs for credit cards is based on the interest rate that is expected to be charged over the expected period of exposure to the facilities. This estimation takes into account that many facilities are repaid in full each month and are consequently charged no interest.

iv) Treasury bills, Statutory deposits with Central Bank and Due from banks

Treasury bills, Statutory deposits with Central Bank and Due from banks are short term funds placed with Central Bank in the country where the Bank is engaged in the full range of banking and financial activities and correspondent banks.

v) Financial guarantees, letters of credit and undrawn loan commitments

The Bank issues financial guarantees, letters of credit and loan commitments.

Financial guarantees, letters of credit and loan commitments are off-balance sheet instruments and have no history of default.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

g) Impairment of financial assets (continued)

vi) Forward looking information

In its ECL models, the Bank considers a broad range of forward looking information as economic inputs, such as:

- Currency rates
- GDP growth
- Unemployment rates
- Industry risk
- Real estate price trends
- Commodity price inflation rates

Statistical correlation between the overall performance of the economies and historic loss trends were established and used to correlate macroeconomic expectations to adjustments within the ECL models.

The Bank however recognised that the inputs and models used for calculating ECLs may not always capture all characteristics and expectations of the market at the date of the financial statements. To reflect this, management adjustments or overlays are made by assessing the macroeconomic factors and applying judgements, when such differences are significantly material.

h) Collateral valuation

To mitigate its credit risks on financial assets, the Bank seeks to use collateral, where possible. The collateral comes in various forms, such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories and other non-financial assets. Collateral, unless repossessed, is not recorded on the Bank's statement of financial position. However, the fair value of collateral affects the calculation of ECLs. It is generally assessed at inception and re-assessed on a periodic basis.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

h) Collateral valuation (continued)

To the extent possible, the Bank uses active market data for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models. Non-financial collateral, such as real estate, is valued based on independent valuations and other data provided by third parties.

i) Collateral repossessed

In its normal course of business, should the Bank repossess properties or other assets in its retail portfolio, it sometimes engages external agents to assist in the sale of these assets to settle outstanding debt. Any surplus funds are returned to the customers/obligors. As a result of this practice, the residential properties under legal repossession processes are not recorded on the statement of financial position.

j) Write-offs

The Bank's accounting policy is for financial assets to be written off either partially or in their entirety only when the Bank has stopped pursuing the recovery. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to other income.

k) Leases

The Bank assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Bank as a lessee

The Bank applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Bank recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

k) Leases (continued)

Right-of-use assets

Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the lease term.

Lease liabilities

At the commencement date of the lease, the entity recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (less any lease incentives receivable), variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the entity and payments of penalties for terminating the lease, if the lease term reflects exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Bank uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term or a change in the lease payments (e.g., changes to future payments resulting from a change in rate used to determine such lease payments).

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

k) Leases (continued)

Lease liabilities (continued)

The Bank applies the short-term lease recognition exemption to its short-term leases of property etc. (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of IT equipment that are considered to be low-value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

I) Premises and equipment

Premises and equipment are stated at cost less accumulated depreciation.

Subsequent costs are included in the asset's carrying amount or are recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Bank and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the statement of income during the financial period in which they are incurred.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each statement of financial position date. Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These are included in the statement of income.

Leasehold improvements and leased equipment are depreciated on a straight-line basis over the period of the lease. Depreciation other than on leasehold improvements and leased equipment is computed on a straight line basis at rates expected to apportion the cost of the assets over their estimated useful lives.

The depreciation rates used are as follows:

Leasehold premises Freehold premises Equipment, furniture and fittings Vehicles

NOTES TO THE FINANCIAL STATEMENTS

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

m) Impairment of non-financial assets

Further disclosures relating to impairment of non-financial assets are also provided in the following notes:

- Disclosures for significant assumptions (Note 3)
- Premises and equipment (Note 6)
- Intangible assets (Note 8)

The Bank assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Bank estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows available to shareholders are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the bank estimates the asset's or CGU's recoverable amount.

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

n) Business combinations and goodwill

The Bank uses the purchase method of accounting to account for acquisitions. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any non-controlling interests in the acquiree. For each business combination, the Bank elects to measure the non-controlling interests in the acquiree at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred.

If the business combination is achieved in stages, any previously held equity interest is remeasured at its acquisition date fair value and any resulting gain or loss is recognised in the statement of income.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests, and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Bank re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in the statement of income.

As at acquisition date, any goodwill acquired is allocated to each of the CGU expected to benefit from the combination's synergies. After initial recognition, goodwill is measured at cost less any accumulated impairment losses.

Goodwill is reviewed for impairment, annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired.

Impairment is determined by assessing the recoverable amount of the cash-generating unit, to which goodwill relates. Where the recoverable amount of the cash-generating unit is less than the carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

o) Employee benefits/obligations

i) Pension assets

The Bank operates a defined benefit plan, the assets of which are held in separate trustee-administered funds. The pension plan is generally funded by payments from the Bank, taking account of the recommendations of independent qualified actuaries who carry out the full valuation of the Plan every three years. Annually, the Bank's independent actuaries conduct a valuation exercise to measure the effect of the employee benefit plan. For defined benefits plans, the pension accounting costs are assessed using the projected unit credit method.

Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the statement of financial position with a corresponding debit or credit to retained earnings through other comprehensive income (OCI) in the period in which they occur. Remeasurements are not reclassified to the statement of income in subsequent periods.

Past service costs are recognised in the statement of income on the earlier of: a) The date of the plan amendment or curtailment, and

b) The date that the Bank recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Bank recognises the following changes in the net defined benefit obligation under 'operating expenses' in the statement of income:

- a) Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements
- b) Net interest expense or income

The defined benefit plan mainly expose the Bank to risks such as investment risk, interest rate risk and longevity risk.

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

o) Employee benefits/obligations (continued)

i) Pension assets (continued)

The above accounting requirement in no way affects the pension plan which continue to be governed by the approved Trust Deed and Rules and remain under the full control of the appointed Trustees.

The full results of the valuation exercise are disclosed in Note 9 to these financial statements.

ii) Other post-retirement obligations

The Bank provides post-retirement medical and group-life benefits to its retirees. The entitlement to these benefits is usually based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment, using a methodology similar to that for defined benefit pension plan. Independent qualified actuaries carry out a valuation of these obligations.

iii) Profit sharing scheme

The Bank operates an employee profit sharing scheme, and the profit share to be distributed to employees each year is based on the terms outlined in the Union Agreement. Employees receive their profit share in cash. The Bank accounts for the profit share as an expense through the statement of income.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

p) Taxation

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the statement of financial position date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised where it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Income tax payable on profits, based on the applicable tax law, is recognised as an expense in the period in which profits arise. The tax effects of income tax losses available for carry forward are recognised as an asset when it is probable that future taxable profits will be available against which these losses can be utilised.

q) Statutory reserve

The Banking Act of Grenada (No. 45 of 2015) requires every licensed financial institution to maintain a reserve fund and shall, out of its net profits of each year transfer to that fund a sum equal to not less than twenty per cent of profits whenever the amount of the reserve fund is less than a hundred per cent of the paid-up or, or as the case may be, assigned capital of the licensed financial institution. This reserve is not available for distribution as dividends or for any other form of appropriation. Statutory reserves amounted to \$26.7 million (2021: 24.2 million) at year end.

r) Earnings per share

Data on basic earnings per share has been computed by dividing the net profit attributable to equity holders by the weighted average number of ordinary shares in issue during the year.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

s) Foreign currency translation

Monetary assets and liabilities denominated in foreign currencies are translated into Eastern Caribbean Dollars (the Bank's functional and reporting currency) at rates of exchange prevailing at the date the financial statement and non-monetary assets and liabilities are translated at historic rates. Revenue and expenses denominated in foreign currencies are translated into Eastern Caribbean dollars at mid-exchange rates. Realised gains and losses on foreign currency positions are reported in the statement of income.

t) Intangible assets

The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses.

The useful lives of intangible assets are assessed as finite and are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of income in the expense category that is consistent with the function of the intangible assets.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of income when the asset is derecognised.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

u) Revenue recognition

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Bank expects to be entitled in exchange for goods or services. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duty. The Bank has concluded that it is the principal in all of its revenue arrangements since it is the primary obligor in all the revenue arrangements, has pricing latitude and is also exposed to credit risks.

The specific recognition criteria described below must also be met before revenue is recognised.

The effective interest rate method

Interest income and expense is recorded using the EIR method for all financial instruments measured at amortised cost. The EIR is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument or, when appropriate, a shorter period, to the net carrying amount of the financial asset.

The EIR (and therefore, the amortised cost of the asset) is calculated by taking into account any discount or premium on acquisition, fees and costs that are an integral part of the EIR. The Bank recognises interest income using a rate of return that represents the best estimate of a constant rate of return over the expected life of the loan. Hence, it recognises the effect of potentially different interest rates charged at various stages, and other characteristics of the product life cycle (including prepayments, penalty interest and charges).

If expectations regarding the cash flows on the financial asset are revised for reasons other than credit risk. The adjustment is booked as a positive or negative adjustment to the carrying amount of the asset in the statement of financial position with an increase or reduction in interest income. The adjustment is subsequently amortised through Interest and similar income in the income statement.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

u) Revenue recognition (continued)

Interest income and expense

The Bank calculates interest income and expense by applying the EIR to the gross carrying amount of financial assets and liabilities other than credit-impaired assets. For purchased or originated credit-impaired financial assets a credit-adjusted effective interest rate is applied to the amortised cost of the financial asset.

Interest income on all trading assets and financial assets mandatorily required to be measured at FVPL is recognised using the contractual interest rate in net trading income and net gains/(losses) on financial assets at fair value through profit or loss, respectively.

Fee and commission income

Unless included in the effective interest calculation, fees and commissions are recognised on an accruals basis as the service is provided. Fees and commissions not integral to effective interest arising from negotiating, or participating in the negotiation of a transaction from a third party are recognised on completion of the underlying transaction. Portfolio and other management advisory and service fees are recognised based on the applicable service contracts.

Credit card fees and commissions are recognised at an amount that reflects the consideration to which the Bank expects to be entitled in exchange for providing the services. Credit card fees and commissions are therefore net of amounts paid, the expenses for the direct cost of satisfying the performance obligation is netted against the revenues received.

Dividends

Dividend income is recognised when the right to receive the payment is established.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

v) Fair value

The Bank measures financial instruments at fair value at each statement of financial position date. Fair value related disclosures for financial instruments and non-financial assets that are measured at fair value, where fair values are disclosed, are shown in Note 21 to the financial statements.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

i) In the principal market for the asset or liability, or

ii) In the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1

Included in the Level 1 category are financial assets and liabilities that are measured in whole or in part by reference to published quotes in an active market. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

v) Fair value (continued)

Level 2

Included in the Level 2 category are financial assets and liabilities that are measured using a valuation technique based on assumptions that are supported by prices from observable current market transactions and for which pricing is obtained via pricing services, but where prices have not been determined in an active market. This includes financial assets with fair values based on broker quotes, investments in private equity funds with fair values obtained via fund managers and assets that are valued using the Bank's own models whereby the majority of assumptions are market observable.

Level 3

Included in the Level 3 category are financial assets and liabilities that are not quoted as there are no active markets to determine a price. These financial instruments are held at cost, being the fair value of the consideration paid for the acquisition of the investment, and are regularly assessed for impairment.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Bank determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Where the Bank's investments are not actively traded in organised financial markets, the fair value is determined using discounted cash flow analysis, which requires considerable judgement in interpreting market data and developing estimates. Accordingly, estimates contained herein are not necessarily indicative of the amounts that the Bank could realise in a current market exchange. The use of different assumptions and/or estimation methodologies may have a material effect on the estimated fair values. The fair value information for available-for-sale investments is based on information available to management as at the dates presented. Management is not aware of any factors that would significantly affect the estimated fair value amounts.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

v) Fair value (continued)

Level 3 (continued)

Investments classified as 'at fair value through profit or loss' are actively traded in organised markets and fair value is determined by reference to the market price at year end or on the last trade date prior to year end.

Financial instruments where carrying value is equal to fair value:- Due to their shortterm maturity, the carrying value of certain financial instruments is assumed to approximate their fair values. These include cash and cash equivalents, investment interest receivable, customers' deposit accounts, other fund raising instruments, other assets and other liabilities.

Advances are net of specific and other provisions for impairment. The fair values of advances is based on a current yield curve appropriate for the remaining term to maturity.

For balances due to banks, where the maturity period is less than one year, the fair value is assumed to equal carrying value. Where the maturity period is in excess of one year, these are primarily floating rate instruments, the interest rates of which reset with market rates, therefore the carrying values are assumed to equal fair values.

The fair value of fixed rate debt securities carried at amortised cost is estimated by comparing market interest rates when they were first recognised with current market rates offered for similar financial instruments. The estimated fair value of fixed interest-bearing deposits is based on discounted cash flows using prevailing money market interest rates for facilities with similar credit risk and maturity.

w) Customers' liabilities under acceptances, guarantees, indemnities and letters of credit

These represent the Bank's potential liability, for which there are equal and offsetting claims against its customers in the event of a call on these commitments. These amounts are not recorded on the Bank's statement of financial position but are detailed in Note 24(b) of these financial statements.

NOTES TO THE FINANCIAL STATEMENTS

2. Significant accounting policies (continued)

2.5 Summary of significant accounting policies (continued)

x) Equity reserves

The reserves recorded in equity on the Bank's statement of financial position include:

Stated capital - Ordinary stated capital is classified within equity and is recognised at the fair value of the consideration received by the Bank.

Statutory reserves that qualify for treatment as equity are discussed in Note 2.5(q).

General contingency reserve - This represents the difference between regulatory provision requirements and specific provisions under IFRSs and is an appropriation of retained earnings.

3. Significant accounting judgements, estimates and assumptions

The preparation of the Bank's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Other disclosures relating to the Bank's exposure to risks and uncertainties include:

- a) Risk management (Note 18)
- b) Capital management (Note 20)

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are described below. The Bank based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Bank. Such changes are reflected in the assumptions when they occur.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

3. Significant accounting judgements, estimates and assumptions

Impairment losses on financial assets (Note 4 and 5)

The measurement of impairment losses under IFRS 9 across all categories of financial assets requires judgement. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Bank's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

- The estimation of the amount and timing of future cash flows and collateral values when determining impairment losses
- The Bank's internal credit grading model, assigns PDs for corporate facilities, and this was the basis for grouping PDs
- The Bank's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a LTECL basis and the qualitative assessment
- Development of ECL models, including the various formulas and the choice of inputs
- Determination of the existence of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels and collateral values, and the effect on PDs, EADs and LGDs
- The inclusion of overlay adjustments based on judgement and future expectations

Other assumptions

Employee benefits/obligations (Note 9)

In conducting valuation exercises to measure the effect of all employee benefit plans throughout the Bank, the Banks' independent actuaries use judgement and assumptions in determining discount rates, salary increases, NIS ceiling increases, pension increases and the rate of return on the assets of the Plans.

Goodwill (Note 8)

The Bank's financial statements include goodwill arising from acquisitions. In accordance with IFRS 3, goodwill was reviewed for impairment, as at September 30, 2022 using the 'value in use' method. This requires the use of estimates for determination of future cash flows expected to arise from each CGU and an appropriate perpetuity discount rate to calculate present value.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

3. Significant accounting judgements, estimates and assumptions (continued)

Other assumptions (continued)

Deferred taxes (Note 10)

In calculating the provision for deferred taxation, management uses judgement to determine the probability that future taxable profits will be available to facilitate utilisation of temporary tax differences which may arise.

Judgements

In the process of applying the Bank's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the financial statements:

Premises and equipment (Note 6)

Management exercises judgement in determining whether costs incurred can accrue sufficient future economic benefits to the Bank to enable the value to be treated as a capital expense. Further judgement is used upon annual review of the residual values and useful lives of all capital items to determine any necessary adjustments to carrying value.

Leases (Note 7)

The Bank determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Bank has several lease contracts that include extension and termination options. The Bank applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Bank reassesses the lease term if there is a significant event or change in circumstances that is within its control that affects its ability to exercise or not to exercise the option to renew or to terminate (e.g., construction of significant leasehold improvements or significant customisation of the leased asset).

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

3. Significant accounting judgements, estimates and assumptions (continued)

Judgements (continued)

Leases (Note 7) (continued)

The Bank cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate ('IBR') to measure lease liabilities. The IBR is the rate of interest that the Bank would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Bank 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Bank estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain specific adjustments (such as credit rating, or to reflect the terms and conditions of the lease).

4. Advances (continued)

c) Restructured / Modified Loans

Within the retail portfolio, management will in the normal course of business modify the terms and conditions of facilities in the case of difficulties by the borrower. These modifications rarely result in an impairment loss and if it does, it is not material.

The Bank occasionally makes modifications to the original terms of large commercial and corporate loans as a response to the borrower's financial difficulties, rather than taking possession or to otherwise enforce collection of collateral. These modifications are made only when the Bank believes the borrower is likely to meet the modified terms and conditions. Indicators of financial difficulties include defaults on covenants, overdue payments or significant concerns raised by the Credit Risk Department. Once the terms have been renegotiated, any impairment is measured using the original effective interest rates (EIR) as calculated before the modification of terms.

Restructured loans are carefully monitored. Restructured large commercial and corporate loans are classified as Stage 2 and amounted to \$148 million as at September 30, 2022 (\$14 million as at September 30, 2021).

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated (Continued)

8. Intangible assets (continued)

Goodwill (continued)

Impairment testing of goodwill

In accordance with IFRS 3, all assets that gave rise to goodwill were reviewed for impairment using the 'value in use' method. In each case, the cash flow projections are based on financial budgets approved by senior management and the values assigned to key assumptions reflects past performance.

The impact of COVID-19 and the global economy exacerbated by the Ukraine/Russia war, has created uncertainty in the estimation of cash flow projections, discount rates and terminal growth rates. The goodwill impairment tests were conducted using sensitivity analysis, including a range of growth rates, interest rates, recovery assumptions, macro-economic outlooks and discount rates for each entity in arriving at a probability-weighted expected cash flow projection.

Core deposits	2022	2021
Cost At beginning and end of year	7,560	7,560

Closing defined benefit obligation	(27,054)	(26,842)	(4,539)	(2,597)

d) Liability profile

The defined benefit obligation is allocated between the Plan's members as follows:

		Defined benefit pension plan	Post- retirement medical	Group life obligations
-	Active members	65.00%	57.00%	48.00%
-	Deferred members	4.00%	0.00%	0.00%
-	Pensioners	31.00%	43.00%	52.00%

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated (Continued)

9. Employee benefits/obligations (continued)

d) Liability profile (continued)

Pension

The weighted average duration of the defined benefit obligation as at September 30, 2022 was 12.8 years.

12% of the defined benefit obligation is defined contribution in nature.

Nearly 100% of the value of the benefits for active members is vested.

40% of the defined benefit obligation for active members is conditional on future salary increases.

Medical

The weighted average duration of the defined benefit obligation as at September 30, 2022 was 16.3 years.

34% of the benefits for active members are vested.

Group Life

The weighted average duration of the defined benefit obligation as at September 30, 2019 was 14.0 years.

49% of the benefits for active members are vested.

18% of the defined benefit obligation for active members was conditional on future salary increases.

f) Plan asset allocation as at September 30

	Defined benefit pension plan			
	Fair v	alue	% Alloc	cation
	2022	2021	2022	2021
Regional equity securities	212	227	1%	1%
Debt securities	5,608	1,550	18%	5%
Other short term securities	2,120	2,129	7%	7%
Money market				
instruments /cash and				
cash equivalents	23,931	27,668	<u>75%</u>	<u>88%</u>
Total	31,871	31,574	<u>100%</u>	<u>100%</u>

The Plan's investment strategy is determined by the Plan's Trustees with the agreement of the Bank. This strategy is largely dictated by statutory constraints and the availability of suitable investments. There are no asset-liability matching strategies used by the plan.

The regional equities held by the pension plan relates to Eastern Caribbean Financial Holdings and has a quoted price but the market is illiquid. Approximately 6% of the Plan's bond portfolio is made up of a bond issued by the Government of Grenada which was substantially impaired in 2013 and restructured in 2016.

9. Employee benefits/obligations (continued)

i) Summary of principal actuarial assumptions as at September 30 (continued)

Assumptions regarding future mortality are based on published mortality rates. The life expectancies underlying the value of the defined benefit obligation as at September 30, 2022 are as follows:

	Defined benefit pension plan		Post-retirement and group life ob	
	2022	2021	2022	2021
Life expectancy at age 60 for current pensioner in				
years:				
Male	21.8	21.8	21.9	21.8
Female	26.1	26.1	26.1	26.1
Life expectancy at age 60 for current members age 40 in years:				
Male	22.7	22.7	22.7	22.7
Female	27.0	27.0	27.1	27.0

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated (Continued)

9. Employee benefits/obligations (continued)

j) Sensitivity analysis

The calculation of the defined benefit obligation is sensitive to the assumptions used. The following table summarizes how the defined benefit obligation as at September 30, 2022 would have changed as a result of reasonable changes in key assumptions used.

	Defined benefit pension plan		Post-retiremen and group life o	
	1% p.a.	1% p.a.	1% p.a.	1% p.a.
	increase	decrease	increase	decrease
	\$'000	\$'000	\$'000	\$'000
Discount rate	(2,921)	3,621	(631)	791
Future salary increases	3,326	(2,490)	21	(20)
Medical cost increases	-	_	666	(541)

An increase of 1 year in the assumed life expectancies shown above would increase the defined benefit obligation at September 30, 2022 by \$0.365 million and the post-retirement medical benefit by \$0.129 million but decrease group life obligation by \$0.059 million

These sensitivities were calculated by re-calculating the defined benefit obligations using the revised assumptions.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated (Continued)

9. Employee benefits/obligations (continued)

k) Funding

The Bank meets the balance of the cost of funding the defined benefit pension plan. The funding requirements are based on regular actuarial valuations of the Plan made every three years and the assumptions used to determine the funding required may differ from those set out above. The Bank expects to pay \$1.9 million to the pension plan in the 2023 financial year.

The Bank operates the post-retirement medical benefit plan as a self-insured arrangement administered by insurance brokers. Retirees meet 40% of the total premium due and the bank meets the remaining 60%. Assuming no change in premium the bank expects to pay \$0.092 million in retirees medical premium in the 2023 financial year.

The Bank pays premiums to meet the cost of insuring the plan's benefits. Assuming no change in premium rates the Bank expects to pay premiums of around \$0.019 million to the group life plan in the 2023 financial year.

18. Risk management

18.1 General

The Bank's prudent banking practices are founded on solid risk management. In an effort to keep apace with its dynamic environment, the Bank has established a comprehensive framework for managing risks, which is continually evolving as the Bank's business activities change in response to market, credit, product and other developments.

The basic principles of risk management followed by the Bank include:

- Managing risk within parameters approved by the Board of Directors and Executives;
- Assessing risk initially and then consistently monitoring those risks through their life cycle;
- Abiding by all applicable laws, regulations and governance standards;
- Applying high and consistent ethical standards to our relationships with all customers, employees and other stakeholders; and
- Undertaking activities in accordance with fundamental control standards. These controls include the disciplines of planning, monitoring, segregation, authorization and approval, recording, safeguarding, reconciliation and valuation.

The Board of Directors has ultimate responsibility for the management of risk within the Bank. Acting with authority delegated by the Board, the Credit, Audit, Asset Liability Committee, and Audit and Enterprise Risk Committee, review specific risk areas.

The Internal Audit function audits Risk Management processes throughout the Bank by examining both the adequacy of the procedures and the Bank's compliance with these procedures. Internal Audit discusses the results of all assessments with Management and reports its findings and recommendations to the Audit Committee.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated (Continued)

18. Risk management (continued)

18.1 General (continued)

The Bank's activities are primarily related to the use of financial instruments. The Bank accepts funds from customers and seeks to earn above average interest margins by investing in high quality assets such as government and corporate securities as well as equity investments and seeks to increase these margins by lending for longer periods at higher rates, while maintaining sufficient liquidity to meet all claims that might fall due.

The main risks arising from the Bank's financial instruments are credit risk, liquidity risk and market risk (interest rate risk, foreign currency risk and operational risk). The Bank reviews and agrees policies for managing each of these risks as follows:

18.2 Credit risk

Credit risk is the potential that a borrower or counterparty will fail to meet its stated obligations in accordance with agreed terms. The objective of the Bank's credit risk management function is to maximize the Bank's risk-adjusted rate of return by maintaining credit risk exposure within acceptable parameters. The effective management of credit risk is a key element of a comprehensive approach to risk management and is considered essential to the long-term success of the Bank.

The Bank's credit risk management process operates on the basis of a hierarchy of discretionary authorities. A Board Credit Committee, chaired by the Chairman of the Board and including executive and non-executive directors, is in place, with the authority to exercise the powers of the Board on all risk management decisions.

The Risk Management unit is accountable for the general management and administration of the Bank's credit portfolio, ensuring that lendings are made in accordance with current legislation, sound banking practice and in accordance with the applicable general policy of the Board of Directors. The Risk Management function is kept separate from and independent of the business development aspect of the operations.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated (Continued)

18. Risk management (continued)

18.2 Credit risk (continued)

The Bank uses a risk rating system which groups commercial/corporate accounts into various risk categories to facilitate the management of risk on both an individual account and portfolio basis. For retail lending, a computerised Credit Scoring system with preset risk management criteria is in place at all branches to facilitate decision-making. Trend indicators are also used to evaluate risk as improving, static or deteriorating. The evaluation of the risk and trend inform the credit decision and determines the intensity of the monitoring process.

The debt securities within the Bank's investment security portfolio are exposed to credit risk and are managed by investment grading or country exposure with preset exposure limits as approved by the Board of Directors. The credit quality of each individual security is assessed based on the financial strength, reputation and market position of the issuing entity and the ability of that entity to service the debt.

The Bank avoids exposure to undue concentrations of risk by placing limits on the amount of risk accepted from a number of borrowers engaged in similar business activities, or activities in the same geographic region or with similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Such risks are controlled and monitored on a revolving basis and are subject to an annual or more frequent review. Limits on the level of credit risk by product, industry sector, client and geography are approved by the Board of Directors.

The Bank's credit control processes emphasize early detection of deterioration and prompt implementation of remedial action and where it is considered that recovery of the outstanding balance may be doubtful or unduly delayed, such accounts are transferred from performing to non-performing status.

	2,037,234	1,830,848

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

18. Risk management (continued)

18.2 Credit risk (continued)

18.2.2 Impairment Assessment

Financial asset provisions are reviewed quarterly in accordance with established guidelines and recommended provisions arising out of this review are submitted to the Board for approval. Non-performing debts recommended for write-off are also reviewed quarterly and action taken in accordance with prescribed guidelines. The Bank's impairment assessment and measurement approach is set out below.

18.2.3 Default and Recovery

The Bank considers a financial instrument defaulted and therefore Stage 3 (creditimpaired) for ECL calculations in cases when the borrower becomes 90 days past due on its contractual payments.

As a part of a qualitative assessment of whether a customer is in default, the Bank also considers a variety of instances that may indicate unlikeliness to pay. When such events occur, the Bank carefully considers whether the event should result in treating the customer as defaulted and therefore assessed as Stage 3 for ECL calculations or whether Stage 2 is appropriate.

It is the Bank's policy to consider a financial instrument as 'cured' and therefore reclassified out of Stage 3 when none of the default criteria have been present for at least six consecutive months. The decision whether to classify an asset as Stage 2 or Stage 1 once cured depends on the updated credit grade, at the time of the cure, and whether this indicates there has been a significant increase in credit risk compared to initial recognition.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

18. Risk management (continued)

18.2 Credit risk (continued)

18.2.4 The Bank's internal rating and PD estimation process

Commercial and corporate lending and mortgages

The Bank has an independent internal credit risk department. Risk ratings were selected as cohort for PD analyses. A vintage approach was applied looking at the movements of ratings over a period of time. Historical PDs were developed and there being no correlation between macro economic trends and historical default rates, management applied judgmental overlays based on expectations. As previously mentioned, LGD percentage estimates were developed based on historical loss trends for non-performing loans which are assessed on an individual level including estimating the present value of future cash flows. EAD equals the loan balance outstanding plus accrued interest.

Retail lending and mortgages

Product types were selected as cohort for PD analyses for retail lending and retail mortgages. A vintage approach was applied looking at the number of defaults by segment over a period of time. Historical PDs were developed and there being no correlation between macro economic trends, management applied judgmental overlays based on expectations. LGD percentage estimates were developed based on historical loss trends for non-performing loans which are assessed on both an individual and collective level. EAD equals the loan balance outstanding plus accrued interest.

Overdrafts and Credit Cards

Many corporate customers are extended overdraft facilities and the PDs developed for the Corporate portfolio were applied. LGDs for the Corporate portfolio was also utilised for overdrafts. EADs were developed based on historical trends in utilisation of overdraft limits. ECL percentages for the Retail portfolio were utilised for retail overdrafts. PDs for the credit card portfolio were developed using default percentages over a period of time. EADs were developed based on historical trends in utilisation of credit card limits and LGD percentage estimates were developed based on historical loss trends for a sample of credit card nonperforming facilities.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

18. Risk management (continued)

18.2 Credit risk (continued)

18.2.4 The Bank's internal rating and PD estimation process (continued)

Overdrafts and Credit Cards (continued)

Management judgmentally applied overlays as required as there was no noted correlation between macro economic trends and historical default rates.

Investment securities

PD's and LGD's for traded instruments were based on the global credit ratings assigned to the instrument. PD's and LGD's for non traded instruments were based on one notch below the credit rating of the sovereign in which the instrument is issued or on company ratings where they existed. Management applied judgmental overlays on local debt instruments. EAD equals the amortised security balance plus accrued interest.

Treasury bills and Due from banks

Treasury bills, Statutory deposits with Central Bank and Due from bank are short term funds placed with the Eastern Caribbean Central Bank and correspondent banks and the Bank therefore considers the risk of default to be very low. These facilities are highly liquid and without restriction and based on management's review of the underlying instruments the ECL on these instruments were determined to be zero.

Financial guarantees, letters of credit and undrawn loan commitments The Bank issues financial guarantees, letters of credit and loan commitments.

Financial guarantees, letters of credit and loan commitments are off-balance sheet instruments and have no history of default. As a result, the Bank considers the risk of default to be very low and the ECLs on these instruments were determined to be zero.

18.2 Credit risk (continued)

18.2.5 Significant increase in credit risk

The Bank continuously monitors all assets subject to ECLs. In order to determine whether an instrument or a portfolio of instruments is subject to 12mECL or LTECL, the Bank assesses whether there has been a significant increase in credit risk since initial recognition.

The Bank also applies a secondary qualitative method for triggering a significant increase in credit risk for an asset. Regardless of the change in credit grades, if contractual payments are more than 30 days past due, the credit risk is deemed to have increased significantly since initial recognition.

When estimating ECLs on a collective basis for a group of similar assets (as set out in Note 18.2.6), the Bank applies the same principles for assessing whether there has been a significant increase in credit risk since initial recognition.

18.2.6 Grouping financial assets measured on a collective basis

As explained in Note 2.5 (g) (i) dependent on the factors below, the Bank calculates ECLs either on a collective or an individual basis. Asset classes where the Bank calculates ECL on an individual basis include:

- All Stage 3 assets, regardless of the class of financial assets
- The Commercial and corporate lending and overdraft portfolio
- The Mortgage portfolio
- The Retail lending portfolio

Asset classes where the Bank calculates ECL on a collective basis include:

- The retail overdraft portfolio
- Past due not yet relegated credit facilities

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

18. Risk management (continued)

18.2 Credit risk (continued)

18.2.7 Analysis of Gross Carrying Amount and corresponding ECLs are as follows:

Advances	2022 %	2021 %
Stage 1	77.5	86.9
Stage 2	19.5	9.9
Stage 3	<u>2.9</u>	<u>3.2</u>
	<u>100.0</u>	<u>100.0</u>

In response to the continuing impact of COVID-19 and the global economic uncertainty exacerbated by the Ukraine/Russia war, the Bank undertook a review of its loan portfolios, determining the high-risk sectors and the ECL for each. The review considered the macroeconomic outlook, customer credit quality, type and value of collateral held, exposure at default and the effect of payment deferral options as at the reporting date.

The ECL methodology and definition of default remained consistent with prior periods. Calculation inputs, including forward-looking information, together with the determination of the staging of exposures were however revised.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000) except where otherwise stated (Continued)

18. Risk management (continued)

18.2 Credit risk (continued)

18.2.7 Analysis of Gross Carrying Amount and corresponding ECLs are as follows: (continued)

	Retail lending	Commercial & Corporate lending	Mortgages	Overdrafts	Credit cards	Total
Stage 1			Septem	ber 30, 2022		
Gross Loans ECL	76,894 (2,441) 74,453	48,376 (543) 47,833	559,520 (8,207) 551,313	13,186 (25) 13,161	17,715 (507) 17,208	715,691 (11,723) 703,968
ECL as a % of Gross Loans	3.2	1.1	1.5	0.2	2.9	1.6
Stage 1			Septem	ber 30, 2021		
Gross Loans ECL	78,444 (2,173) 76,271	38,929 (290) 38,639	607,271 (10,530) 596,741	16,008 (146) 15,862	29,170 (160) 29,010	769,822 (13,299) 756,523
ECL as a % of Gross Loans	2.8	0.7	1.7	0.9	0.5	1.7

The decrease in ECLs of Stage 1 portfolios was driven by a decrease in gross loans and the decrease in the overlay for mortgages.

NOTES TO THE FINANCIAL STATEMENTS

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated (Continued)

18. Risk management (continued)

18.3 Liquidity risk

Liquidity risk is defined as the risk that the Bank either does not have sufficient financial resources available to meet all its obligations and commitments as they fall due, or can access these only at excessive cost.

Liquidity management is therefore primarily designed to ensure that funding requirements can be met, including the replacement of existing funds as they mature or are withdrawn, or to satisfy the demands of customers for additional borrowings. Liquidity management focuses on ensuring that the Bank has sufficient funds to meet all of its obligations.

Three primary sources of funds are used to provide liquidity – retail deposits, wholesale deposits and the capital market. A substantial portion of the Bank is funded with "core deposits". The Bank maintains a core base of retail and wholesale funds, which can be drawn on to meet ongoing liquidity needs. The capital markets are accessed for medium to long-term funds as required, providing diverse funding sources to the Bank. Facilities are also established with correspondent banks, which can provide additional liquidity as conditions demand.

The Asset/Liability Committee (ALCO) sets targets for daily float, allowable liquid assets and funding diversification in line with system liquidity trends. While the primary asset used for short-term liquidity management is the Treasury bill, the Bank also holds investments in other Government securities, which can be used for liquidity support. The Bank continually balances the need for short-term assets, which have lower yields, with the need for higher asset returns.

18.3.1 Analysis of financial liabilities by remaining contractual maturities

The table below summarizes the maturity profile of the Bank's financial liabilities at September 30, based on contractual undiscounted repayment obligations, over the remaining life of those liabilities. These balances include interest to be paid over the remaining life of the liabilities and will therefore be greater than the carrying amounts on the statement of financial position. See Note 22 for a maturity analysis of assets and liabilities.

18. Risk management (continued)

18.4 Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates, foreign exchange rates and equity prices.

18.4.1 Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments. The Bank has an Asset/Liability Committee which reviews on a monthly basis the noncredit and non-operational risk for the Bank. Asset and Liability management is a vital part of the risk management process of the Bank. The mandate of the Committee is to approve strategies for the management of the non-credit risks of the Bank, including interest rate, foreign exchange, liquidity and market risks.

The primary tools currently in use are gap analysis, interest rate sensitivity analysis and exposure limits for financial instruments. The limits are defined in terms of amount, term, issuer, depositor and country. The Bank is committed to refining and defining these tools to be in line with international best practice.

Interest on financial instruments classified as floating is repriced at intervals of less than one year while interest on financial instruments classified as fixed is fixed until the maturity of the instrument.

18.4.2 Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Bank's exposure to the effects of fluctuations in foreign currency exchange rates arises mainly from its investments and related parties and associates. The Bank's policy is to match the initial net foreign currency investment with funding in the same currency. The Bank also monitors its foreign currency position for both overnight and intra-day transactions.

Changes in foreign exchange rates affect the Bank's earnings and equity through differences on the re-translation of the net assets.

18. Risk management (continued)

18.5 Operational risk

The growing sophistication of the banking industry has made the Bank's operational risk profile more complex. Operational risk is inherent within all business activities and is the potential for financial or reputational loss arising from inadequate or failed internal controls, operational processes or the systems that support them. It includes errors, omissions, disasters and deliberate acts such as fraud.

The Bank recognizes that such risk can never be entirely eliminated and manages the risk through a combination of systems and procedures to monitor and document transactions. The Bank's operational risk department oversees this and where appropriate, risk is transferred by the placement of adequate insurance coverage.

The Bank has developed contingency arrangements and established facilities to support operations in the event of disasters. Independent checks on operational risk issues are also undertaken by the internal audit function.

NOTES TO THE FINANCIAL STATEMENTS

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated (Continued)

19. Related parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operating decisions. A number of banking transactions are entered into with related parties in the normal course of business. These transactions are both secured and unsecured and were carried out on commercial terms and conditions, at market rates. As at September 30, 2022 and 2021 there were no allowances for impairment against related parties.

Advances, investments and other assets	2022	2021

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated (Continued)

19. Related parties (continued)

Key Management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Bank.

Key management compensation	2022	2021
Short-term benefit Post employment benefits	1,170 48	890 39
	1,218	929

20. Capital management

For the purpose of the Bank's capital management, capital includes issued share capital and other equity reserves. The Bank's policy is to diversify its sources of capital, to allocate capital within the Bank efficiently and to maintain a prudent relationship between capital resources and the risk of its underlying business. Equity increased by \$1.92 million to \$230.73 million during the year under review. This was mainly as a result of profit after tax of \$10.39 million for fiscal 2022, a decrease of \$1.6 million in defined benefit reserve and dividend paid of \$6.87 million.

Capital adequacy is monitored by the Bank, employing techniques based on the guidelines developed by the Basel Committee on Banking Regulations and Supervisory Practice (the Basel Committee), as implemented by the Eastern Caribbean Central Bank for supervisory purposes. The Basel risk-based capital guidelines require a minimum ratio of core capital (Tier 1) to risk-weighted assets of 4%, with a minimum total qualifying capital (Tier 2) ratio of 8%. Core capital (Tier 1) comprises mainly shareholders' equity.

Capital adequacy ratio	2022	2021
Tier 1 Capital	11.21%	15.15%
Total Capital	11.98%	16.21%

At September 30, 2022 and 2021 the Bank exceeded the minimum levels required for adequately capitalized institutions.

Interim dividend for 2022: \$1.10	4,152	
Total dividends paid	6,869	_

Proposed and approved by the Board of Directors (not recognised as a liability as at September 30)

	2022	2021
Equity dividends on ordinary shares:		
Final dividend for 2022: \$0.30 (2021: \$0.72)	1,132	2,717

24. Contingent liabilities, commitments and leasing arrangements

a) Litigation

As at September 30, 2022 there were certain legal proceedings outstanding against the Bank. No provision has been made as professional advice indicates that it is unlikely that any significant loss will arise or that it would be premature at this stage of the action to determine the eventuality.

b) Customers' liability under acceptances, guarantees, indemnities and letters of credit

		2022	2021
	Guarantees and indemnities Letters of credit	30,879 11,783	24,107 10,580
		42,662	34,687
c)	Sectoral information		
	Corporate and commercial	42,662	34,687
		42,662	34,687

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2022

Expressed in thousands of Eastern Caribbean dollars (\$'000), except where otherwise stated (Continued)

25. Segmental information

As at September 30, 2022 and 2021, the Bank's entire operations are in the retail and commercial banking class of business in Grenada.

26. Prior year restatements

The financial statements for the years ended 30 September 2021 and 2020, excluded the following:

- 1. Deferred tax relating to core deposit intangibles
- 2. The impact on the carrying value of goodwill relating to deferred tax on expected credit losses (ECL) on Stage 1 and Stage 2 loans as well as depreciation, arising from the acquisition of the Bank of Nova Scotia Grenada branches on 1 November 2019.

These errors were corrected in 2022 in accordance with IAS 8 (Accounting Policies, Changes in Accounting Estimates and Errors) and presented in accordance with IAS 1 (Presentation of Financial Statements).

The impact of these corrections to the statement of financial position for the prior period are as follows:

	As previously		
	stated	Adjustments	Restated
	2021	2021	2021
Intangible assets	56,726	3,115	59,841
Deferred tax liabilities	1,371	1,520	2,891
Retained earnings	85,697	1,595	87,292
